The Issuer has confirmed to the dealers set forth on the cover page (each, a "**Dealer**" and together, the "**Dealers**") that this Prospectus contains all information which is material in the context of the Programme and the issue, offering and sale of Instruments thereunder; that the information contained in this Prospectus is accurate in all material respects and is not misleading in any material respect; that the opinions, predictions or intentions expressed herein are honestly held and that there are no other facts the omission of which would make this Prospectus as a whole or any of such information or the expression of any such opinions, predictions or intentions misleading. The Issuer confirms that any information from third party sources has been accurately reproduced and that, as far as it is aware and is able to ascertain from information published by such third party, no facts have been omitted which would render the reproduced information inaccurate or misleading.

No person has been authorised by the Issuer to give any information or to make any representation which is not contained in or not consistent with this Prospectus or any other information supplied in connection with the Programme and, if given or made, such information or representation must not be relied upon as having been authorised by or on behalf of the Issuer or any of the Dealers.

This Prospectus is valid until its expiration on 14 June 2025 and any supplement hereto as well as any Final Terms reflect the status as of their respective dates of issue. There is no obligation to supplement this Prospectus in the event of significant new factors, material mistakes or material inaccuracies when this Prospectus is no longer valid. The offering, sale or delivery of any Instruments may not be taken as an implication that the information contained in such documents is accurate and complete subsequent to their respective dates of issue or that there has been no adverse change in the financial condition of the Issuer since such date or that any other information supplied in connection with the Programme is accurate at any time subsequent to the date on which it is supplied or, if different, the date indicated in the document containing the same.

The Issuer has undertaken with the Dealers to amend or supplement this Prospectus by a supplement to it or to publish a new Prospectus if and when the information herein should become materially inaccurate or incomplete, and has further agreed with the Dealers to furnish a supplement to this Prospectus in the event of any significant new factor, material mistake or material inaccuracy relating to the information included in this Prospectus which is capable of affecting the assessment of the Instruments and which arises or is noted between the time when this Prospectus has been approved and when trading of any tranche of Instruments on a regulated market begins, in respect of Instruments issued on the basis of this Prospectus.

In the case of an offer by a Dealer, the Dealer must inform potential investors of the terms and conditions of the Instruments at the time of the offer.

The Issuer will comply with its respective obligations under the Prospectus Regulation to prepare a supplement to this Prospectus or a new Prospectus in the event that any significant new factor, material mistake or inaccuracy relating to the information included in this Prospectus which is capable of affecting the assessment of the Instruments arises or is noted after the date of this Prospectus.

Neither the Arranger nor any Dealer nor any person mentioned in this Prospectus, excluding the Issuer, accepts any responsibility for the accuracy and completeness of the information contained in this Prospectus or any supplement hereof, or any other document incorporated by reference nor for the information contained in any Final Terms.

The language of this Prospectus is English. Any part of this Prospectus in the German language constitutes a translation. In respect of the issue of any Tranche of Instruments under the Programme, the German text of the Conditions may be controlling and binding if so specified in the relevant Final Terms.

The distribution of this Prospectus and any Final Terms and the offering, sale and delivery of the Instruments in certain jurisdictions may be restricted by law. Persons into whose possession this Prospectus or any Final Terms comes are required to inform themselves about and observe any such restrictions. For a description of the restrictions applicable in the European Economic Area, the United States of America, the United Kingdom, Japan and Luxembourg see "**Selling Restrictions**". In particular, the Instruments have not been and will not be registered under the United States Securities Act of 1933, as amended, or with any securities regulatory authority of any state or other jurisdiction of the United States of America and are subject to the tax law requirements of the United States of America; subject to certain exceptions, Instruments may not be offered, sold or delivered within the United States of America or to, or for the account or benefit of, U.S. persons.

Amounts payable under the Instruments may be calculated by reference to EURIBOR, which is currently provided by European Money Markets Institute ("**EMMI**"), STIBOR, which is currently provided by Swedish Financial Benchmark Facility ("**SFBF**"), SONIA, Compounded Daily SONIA, SONIA Compounded Index, which are currently provided by the Bank of England, SOFR, Compounded Daily SOFR, SOFR Compounded Index, which are currently provided by the Federal Reserve Bank of New York, CMS (constant maturity swap) rates, which are currently provided by ICE Benchmark Administration Limited (IBA), €STR, Compounded Daily €STR, which are provided by the European Central Bank or other indices which are deemed benchmarks for the purposes of Regulation (EU) 2016/1011 (as amended, the "**Benchmark Regulation**"). As at the date of this Prospectus, EMMI and SFBF appear on the register of administrators and benchmarks established and maintained by the European Securities and Markets Authority ("**ESMA**") pursuant to Article 36 of the Benchmark Regulation (the "**Benchmarks Register**"), while IBA, the Bank of England, the Federal Reserve Bank of New York and the European Central Bank do not appear on the Benchmarks Register. As far as the Issuer is aware, the Bank of England, the Federal Reserve Bank of New York and the European Central Bank do not fall within the scope of the Benchmarks Regulation as at the date of this Prospectus and are not required to obtain authorization or registration (or, if located outside the European Union or the UK, recognition, endorsement or equivalence).

In case Instruments are issued which make reference to another benchmark or in case there was a change to one of the above named benchmarks, the relevant Final Terms will specify the name of the specific benchmark and the relevant administrator. In such case, the relevant Final Terms will further specify if the relevant administrator is included in the ESMA register or whether Article 2 of the Benchmarks Regulation applies.

If the relevant Final Terms in respect of any Instruments include a legend entitled "Prohibition of Sales to European Economic Area Retail Investors", the Instruments are not intended to be offered, sold or otherwise made available to and, with effect from such date, should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("EEA"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; (ii) a customer within the meaning of Directive 2016/97/EU (as amended, the "Insurance Distribution Directive"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the "PRIIPs Regulation") for offering or selling the Instruments or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Instruments or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

If the relevant Final Terms in respect of any Instruments specify "Prohibition of Sales to European Economic Area Retail Investors" as "Not Applicable", except to the extent subparagraph (ii) below may apply, any offer of Instruments in any Member State of the EEA (each, a "**Relevant Member State**") will be made pursuant to an exemption under the Prospectus Regulation from the requirement to publish a prospectus for offers of Instruments. Accordingly any person making or intending to make an offer in that Relevant Member State of Instruments which are the subject of an offering/placement contemplated in this Prospectus as completed by Final Terms or a drawdown prospectus in relation to the offer of those Instruments may only do so (i) in circumstances in which no obligation arises for the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation, in each case, in relation to such offer, or (ii) if a prospectus for such offer has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State and (in either case) published, all in accordance with the Prospectus Regulation, provided that any such prospectus has subsequently been completed by Final Terms which specify or is a drawdown prospectus which specifies that offers may be made other than pursuant to Article 1(4) of the Prospectus Regulation in that Relevant Member State and such offer is made in the period beginning and ending on the dates specified for such purpose in such prospectus or Final Terms or drawdown prospectus, as applicable and the Issuer has consented in writing to its use for the purpose of such offer. Except to the extent sub-paragraph (ii) above may apply, neither the Issuer nor any Dealer have authorised, nor do they authorise, the making of

any offer of Instruments in circumstances in which an obligation arises for the Issuer or any Dealer to publish or supplement a prospectus for such offer.

If the relevant Final Terms in respect of any Instruments includes a legend entitled "Prohibition of Sales to United Kingdom Retail Investors", the Instruments are not intended to be offered, sold or otherwise made available to and, with effect from such date, should not be offered, sold or otherwise made available to any retail investor in the UK. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 ("EUWA"); (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 (as amended, "FSMA") and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in the Prospectus Regulation as it forms part of domestic law by virtue of the EUWA. Consequently, no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "UK PRIIPs Regulation") for offering or selling the Instruments or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Instruments or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

If the relevant Final Terms in respect of any Instruments specify "Prohibition of Sales to United Kingdom Retail Investors" as "Not Applicable", except to the extent subparagraph (ii) below may apply, any offer of Instruments in the UK will be made pursuant to an exemption under the Prospectus Regulation as it forms part of domestic law by virtue of the EUWA from the requirement to publish a prospectus for offers of Instruments. Accordingly any person making or intending to make an offer in the UK of Instruments which are the subject of an offering/placement contemplated in this Prospectus as completed by Final Terms or a drawdown prospectus in relation to the offer of those Instruments may only do so (i) in circumstances in which no obligation arises for the Issuer or any Dealer to publish a prospectus pursuant section 85 of the FSMA or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation as it forms part of domestic law by virtue of the EUWA, in each case, in relation to such offer, or (ii) if a prospectus for such offer has been approved by the competent authority in the UK or, where appropriate, approved in the UK and notified to the competent authority in the UK and (in either case) published, all in accordance with the Prospectus Regulation as it forms part of domestic law by virtue of the EUWA, provided that any such prospectus has subsequently been completed by Final Terms which specify or is a drawdown prospectus which specifies that offers may be made other than pursuant to Article 1(4) of the Prospectus Regulation as it forms part of domestic law by virtue of the EUWA in the UK and such offer is made in the period beginning and ending on the dates specified for such purpose in such prospectus or Final Terms or drawdown prospectus, as applicable and the Issuer has consented in writing to its use for the purpose of such offer. Except to the extent sub-paragraph (ii) above may apply, neither the Issuer nor any Dealer have authorised, nor do they authorise, the making of any offer of Instruments in circumstances in which an obligation arises for the Issuer or any Dealer to publish or supplement a prospectus for such offer.

This Prospectus may only be used for the purpose for which it has been published.

Neither this Prospectus nor any Final Terms constitute an offer or an invitation by or on behalf of the Issuer or the Dealers to any person to subscribe for or to purchase any Instruments. Neither this Prospectus nor any Final Terms may be used for the purpose of an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorised or to any person to whom it is unlawful to make such an offer or solicitation.

MIFID II PRODUCT GOVERNANCE / TARGET MARKET – The Final Terms in respect of any Instruments may include a legend entitled "MiFID II Product Governance" which will outline the target market assessment by the manufacturer(s) in respect of the Instruments and which channels for distribution of the Instruments are appropriate. Any person subsequently offering, selling or recommending the Instruments (a "**Distributor**") should take into consideration the target market assessment; however, a Distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Instruments (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the MiFID II Product Governance rules under EU Delegated Directive 2017/593 (the "**MiFID II Product Governance Rules**"), any Dealer subscribing for any Instruments is a manufacturer in respect of such Instruments, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID II Product Governance Rules.

UK MiFIR PRODUCT GOVERNANCE / TARGET MARKET – The Final Terms in respect of any Instruments may include a legend entitled "UK MiFIR Product Governance" which will outline the target market assessment by the manufacturer(s) in respect of the Instruments and which channels for distribution of the Instruments are appropriate. A Distributor should take into consideration the target market assessment; however, a Distributor subject to the Financial Conduct Authority ("**FCA**") Handbook Product Intervention and Product Governance Sourcebook (the "**UK MiFIR Product Governance Rules**") is responsible for undertaking its own target market assessment in respect of the Instruments (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the UK MiFIR Product Governance Rules any Dealer subscribing for any Instruments is a manufacturer in respect of such Instruments, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the UK MiFIR Product Governance Rules. Furthermore, the Issuer is not a manufacturer or Distributor for the purposes of the UK MiFIR Product Governance Rules.

IN CONNECTION WITH THE ISSUE OF ANY TRANCHE OF INSTRUMENTS, THE DEALER OR DEALERS (IF ANY) NAMED AS THE STABILISATION MANAGER(S) (OR PERSONS ACTING ON BEHALF OF ANY STABILISATION MANAGER(S)) IN THE APPLICABLE FINAL TERMS MAY OVER-ALLOT INSTRUMENTS OR EFFECT TRANSACTIONS WITH A VIEW TO SUPPORTING THE MARKET PRICE OF THE INSTRUMENTS AT A LEVEL HIGHER THAN THAT WHICH MIGHT OTHERWISE PREVAIL. HOWEVER, STABILISATION MAY NOT NECESSARILY OCCUR. ANY STABILISATION ACTION MAY BEGIN ON OR AFTER THE DATE ON WHICH ADEQUATE PUBLIC DISCLOSURE OF THE TERMS OF THE OFFER OF THE RELEVANT TRANCHE OF INSTRUMENTS IS MADE AND, IF BEGUN, MAY CEASE AT ANY TIME, BUT IT MUST END NO LATER THAN THE EARLIER OF 30 DAYS AFTER THE ISSUE DATE OF THE RELEVANT TRANCHE OF INSTRUMENTS AND 60 DAYS AFTER THE DATE OF THE ALLOTMENT OF THE RELEVANT TRANCHE OF INSTRUMENTS. ANY STABILISATION ACTION OR OVER-ALLOTMENT MUST BE CONDUCTED BY THE RELEVANT STABILISATION MANAGER(S) (OR PERSON(S) ACTING ON BEHALF OF ANY STABILISATION MANAGER(S)) IN ACCORDANCE WITH ALL APPLICABLE LAWS AND RULES.

In this Prospectus all references to "**€**", "**EUR**" or "**Euro**" are to the currency introduced at the start of the third stage of the European economic and monetary union, and as defined in Article 2 of Council Regulation (EC) No 974/98 of 3 May 1998 on the introduction of the Euro, as amended.

FORWARD LOOKING STATEMENTS

This Prospectus contains certain forward-looking statements, in particular statements using the words "believes", "anticipates", "intends", "expects" or other similar terms. This applies in particular to statements under the caption "AAREAL BANK" and statements elsewhere in this Prospectus relating to, among other things, the future financial performance, potential synergies to be realized in connection with potential acquisitions, plans and expectations regarding developments in the business of the Aareal Bank Group. These forward-looking statements are subject to a number of risks, uncertainties, assumptions and other factors that may cause the actual results, including the financial position and profitability of Aareal Bank, to be materially different from or worse than those expressed or implied by these forward-looking statements. Aareal Bank does not assume any obligation to update such forward-looking statements and to adapt them to future events or developments.

GREEN FINANCE FRAMEWORK AND SECOND PARTY OPINION

The Final Terms relating to any specific series of Instruments may provide that it will be the Issuer's intention to use an amount equivalent to the net proceeds from the issuance of those Instruments specifically to finance or re-finance in whole or in part commercial property financing loans relating to assets, which fulfil the eligibility criteria (as described under "*General Information – Use of Proceeds*" and in the Green Finance Framework, as defined below, each an "**Eligible Asset**"). Aareal Bank has established the "Aareal Green Finance Framework – Liabilities" dated October 2023 which further specifies the eligibility criteria for Eligible Assets (as supplemented, amended or replaced from time to time, the "**Green Finance Framework**") based on the recommendations included in the voluntary process guidelines for issuing green bonds published by the International Capital Market Association ("**ICMA**") ("**ICMA Green Bond Principles (June 2021)**") and which is available on the website of Aareal Bank (https://www.aareal-bank.com/en/responsibility/implementing-solutions/refinancing-business).

A second party opinion on the alignment of the Green Finance Framework with the ICMA Green Bond Principles (June 2021) has been provided by Sustainalytics GmbH ("**Second Party Opinion**") and is available on the website of Aareal Bank (https://www.aareal-bank.com/en/responsibility/implementing-solutions/refinancing-business).

Neither the Green Finance Framework nor the Second Party Opinion is incorporated into or form part of this Prospectus. None of the Arranger, the Dealers, any of their respective affiliates or any other person mentioned in this Prospectus makes any representation as to the suitability of such Notes to fulfil environmental, social and/or sustainability criteria required by any prospective investors. The Arranger and the Dealers have not undertaken, nor are responsible for, any assessment of the Green Finance Framework or the Eligible Assets, any verification of whether any Eligible Assets meet the criteria set out in the Green Finance Framework or the monitoring of the use of proceeds.

Instruments issued under this Programme will not qualify as "European Green Bonds" or "EuGB". Any Series of Instruments issued under this Programme and referred to as "green bonds" will only be issued on the basis of the Green Finance Framework.

GENERAL DESCRIPTION OF THE PROGRAMME

General

Under this Programme, Aareal Bank may from time to time issue Instruments to one or more of the Dealers.

Deutsche Bank Aktiengesellschaft acts as arranger in respect of the Programme (the "**Arranger**").

The maximum aggregate principal amount of the Instruments at any time outstanding under the Programme will not exceed EUR 25,000,000,000 (or its equivalent in any other currency). The Issuer may increase the amount of the Programme from time to time.

Instruments may be issued on a continuing basis to one or more of the Dealers. Instruments may be distributed on a syndicated or non-syndicated basis. The method of distribution of each Tranche (as defined below) will be stated in the Final Terms. Instruments may be offered to non-qualified and qualified investors unless the applicable Final Terms include a legend entitled "Prohibition of Sales to European Economic Area Retail Investors" or "Prohibition of Sales to United Kingdom Retail Investors".

Instruments may be issued on a continuous basis in tranches (each a "**Tranche**"), each Tranche consisting of Instruments which are identical in all respects. One or more Tranches, which are expressed to be consolidated and forming a single series and identical in all respects, but having different issue dates, interest commencement dates, issue prices and dates for first interest payments may form a series ("**Series**") of Instruments. Further Instruments may be issued as part of existing Series. The specific terms of each Tranche (which will be supplemented, where necessary, with supplemental terms and conditions) will be set forth in the Final Terms.

Instruments will be issued in such denominations as may be agreed between the Issuer and the relevant Dealer(s) and as indicated in the Final Terms save that the minimum denomination of the Instruments will be, if in Euro, EUR 1,000, if in any currency other than Euro, in an amount in such other currency nearly equivalent to EUR 1,000 at the time of the issue of Instruments.

Instruments may be issued at an issue price which is at par or at a discount to, or premium over, par, as stated in the Final Terms. The issue price for Instruments to be issued will be determined at the time of pricing on the basis of a yield which will be determined on the basis of the orders of the investors. Orders will specify a minimum yield and may only be confirmed at or above such yield. The resulting yield will be used to determine an issue price, all to correspond to the yield. The Instruments are freely transferable.

Application has been made to list Instruments on the official list of the Luxembourg Stock Exchange and to trade Instruments on the Regulated Market "*Bourse de Luxembourg*" which is a regulated market for the purposes of MiFID II. Instruments may further be issued under the Programme which will be listed on the Frankfurt Stock Exchange or the Düsseldorf Stock Exchange, or which will not be listed on any stock exchange.

Instruments will be accepted for clearing through one or more clearing systems as specified in the Final Terms. These systems will include those operated by Clearstream Banking AG, Clearstream Banking S.A. and Euroclear Bank SA/NV.

Deutsche Bank Aktiengesellschaft will act as fiscal agent with respect to Instruments cleared through Clearstream Banking S.A. and Euroclear Bank SA/NV and Aareal Bank will act as fiscal agent with respect to Instruments cleared through Clearstream Banking AG (each a "**Fiscal Agent**"). The Fiscal Agents and other institutions, all as indicated in the Final Terms, will act as paying agents (each a "**Paying Agent**").

Ranking

Instruments to be issued under the Programme may have the following ranking:

Senior Notes which shall not qualify as MREL-eligible debt

The obligations under the Notes constitute unsecured and unsubordinated obligations of the Issuer ranking *pari passu* among themselves and *pari passu* with all other unsecured and unsubordinated obligations of the Issuer except for such unsecured and unsubordinated obligations of the Issuer which are preferred by statutory provisions or which are subordinated by virtue of their terms or by statutory provisions.

Senior Notes which shall qualify as MREL-eligible senior preferred debt pursuant to § 46f(5) KWG

The Notes are intended to qualify as eligible liabilities for the minimum requirement for own funds and eligible liabilities of the Issuer ("**MREL**"). The obligations under the Notes constitute unsecured and unsubordinated obligations of the Issuer and, save for applicable laws and regulations, rank *pari passu* among themselves and *pari passu* with all other unsecured and unsubordinated obligations of the Issuer (except for obligations under debt instruments (*Schuldtitel*) pursuant to § 46f(6) and (9) of the German Banking Act (*Kreditwesengesetz*, "**KWG**") or any successor provision which rank junior to the Notes), subject, however, to statutory priorities conferred to certain unsecured and unsubordinated obligations in the event of resolution measures imposed on the Issuer or in the event of the dissolution, liquidation, insolvency, composition proceedings or other proceedings for the avoidance of insolvency of, or against, the Issuer.

Senior Notes which shall qualify as MREL-eligible senior non-preferred debt pursuant to § 46f(6) KWG

The Notes are intended to qualify as eligible liabilities for the minimum requirement for own funds and eligible liabilities of the Issuer (*MREL*). The obligations under the Notes constitute unsecured and unsubordinated senior non-preferred obligations of the Issuer under debt instruments (*Schuldtitel*) within the meaning of § 46f(6) KWG or any successor provision ("**Debt Instruments**") and, save for applicable laws and regulations, rank *pari passu* among themselves and *pari passu* with all other unsecured and unsubordinated senior non-preferred obligations under Debt Instruments of the Issuer, including senior non-preferred obligations under Debt Instruments referred to in § 46f(9) KWG, but junior to all other unsecured and unsubordinated obligations of the Issuer, subject, however, to statutory priorities conferred to certain unsecured and unsubordinated obligations in the event of resolution measures imposed on the Issuer or in the event of the dissolution, liquidation, insolvency, composition proceedings or other proceedings for the avoidance of insolvency of, or against, the Issuer.

Pfandbriefe

The obligations under the Pfandbriefe constitute direct, unconditional and unsubordinated obligations of the Issuer ranking *pari passu* among themselves. The Pfandbriefe are covered in accordance with the Pfandbrief Act and rank at least *pari passu* with all other obligations of the Issuer under Pfandbriefe.

Subordinated Notes

The obligations under the Notes constitute unsecured and subordinated obligations of the Issuer ranking *pari passu* among themselves and *pari passu* with all other subordinated obligations of the Issuer except as otherwise provided by applicable law or the terms of any such other obligations. In the event of resolution measures imposed on the Issuer and in the event of the dissolution, liquidation, insolvency, composition proceedings or other proceedings for the avoidance of insolvency of, or against, the Issuer, the obligations under the Notes shall be fully subordinated to the claims of other unsubordinated creditors of the Issuer so that in any such event no amounts shall be payable in respect of the Notes until the claims of such other unsubordinated creditors of the Issuer have been satisfied in full. No Holder (as defined in the terms and conditions) may set off his claims arising under the Notes against any claims of the Issuer. Considering this subordination provision the Issuer is free to meet its obligations under the Notes also out of other free assets. No security or guarantee of whatever kind is, or shall at any time be, provided by the Issuer or any other person securing rights of the Holders under the Notes.

No subsequent agreement may limit the subordination or shorten the term of the Notes or any applicable notice period. If the Notes are redeemed or repurchased by the Issuer or as a result of an early redemption, then the amounts redeemed or paid must be returned to the Issuer irrespective of any agreement to the contrary unless the supervisory authority of the Issuer has given its consent to such early redemption or repurchase. Any cancellation or redemption of the Notes or any repurchase of the Notes prior to their scheduled maturity requires the prior consent of the supervisory authority of the Issuer.

RISK FACTORS

Before deciding to purchase the Instruments, prospective investors should carefully review and consider the following risk factors and the other information contained in this Prospectus. Investing in the Instruments involves certain risks. Prospective investors should consider, among other things, the following:

The following is a disclosure of risk factors that are material with respect to the Issuer and the Instruments issued under the Programme in order to assess the risks associated with these Instruments. Prospective investors should consider these risk factors before deciding to purchase Instruments issued under the Programme.

Prospective investors should consider all information provided in this Prospectus and consult with their own professional advisers (including their financial, accounting, legal and tax advisers) if they consider it necessary. Should one or more of the risks described below materialise, this may have a material adverse effect on the cash flows, results of operations and financial condition of the Issuer. Moreover, if any of these risks materialises, the market value of the Instruments and the likelihood that the Issuer will be in a position to fulfil its payment obligations under the Instruments may decrease, in which case the Holders could lose all or part of their investments.

The Issuer describes only those risk factors it is currently aware of and which could impair its ability to fulfil its obligations under the Instruments. Additional risks and uncertainties, which are currently not known to the Issuer or which the Issuer currently believes are immaterial, could likewise impair the business operations of the Issuer and have a material adverse effect on the Issuer's business, cash flows, results of operations and the Issuer's financial condition. Prospective investors should consider these risk factors before deciding to purchase Notes issued under the Programme. Investors may lose the value of their entire investment or part of it in the event one or more of the risks regarding the Issuer described below materialises.

In addition, prospective investors should be aware that the risks described below may combine and thus, intensify each other.

A. Risk Factors relating to Aareal Bank

Any investment in the Instruments issued by Aareal Bank involves risks relating to the Issuer. If any of the following risks actually occurs, the Issuer's ability to fulfil its obligations under the Instruments might be affected and/or the trading price of the Instruments of the Issuer could decline and investors could lose all or part of their investment.

Aareal Bank's risk exposure is largely concentrated on risks generally associated with banking. Some of its subsidiaries, however, are exposed to a variety of other types of risk outside typical banking risk.

The risk factors regarding Aareal Bank are presented in the following categories:

- Risks related to the Issuer's financial situation
- Regulatory Risks
- Risks related to the Issuer's business activities and industry
- Environmental, Social and Governance Risks

1. Risks related to the Issuer's financial situation

Credit Risk

Aareal Bank defines credit risk as the risk of losses being incurred due to (i) a business partner defaulting on contractual obligations (counterparty default risk); (ii) a deterioration in a business partner's credit quality (migration risk); (iii) the effects of adverse exchange rate developments in the real estate financing portfolio (FX Lending risk). Both credit business and trading activities may be subject to counterparty default risk. Counterparty default risk exposure from trading activities may refer to risk exposure *vis-à-vis* counterparties or issuers.

Counterparty Default Risk in connection with Structured Property Financing

In connection with its Structured Property Financing assets, credit risk for Aareal Bank depends on a number of factors including, but not limited to, the respective borrower's creditworthiness, the relevant property's capacity to generate earnings, the ability of tenants to pay rents to borrowers, the price trend in the relevant segment of the real estate sector, the demand for real estate in the respective locations and the general economic situation as well as socioeconomic changes. If the trend in any of these factors is negative compared to the assumptions made when property financing was extended, there is an increased risk of credit defaults.

Counterparty Default Risk from Trading Activities

The Issuer defines counterparty risk from trading activities as the potential losses in value or foregone profit, which may occur through unexpected default or deterioration of the credit quality of trading counterparties with whom Aareal Bank has entered into securities or money market transactions, interest rate or currency derivatives, as well as securities repurchase transactions.

Market Risk

Market risk is defined as the negative change in the value of Aareal Bank's overall portfolio as a result of price fluctuations or changes in parameters influencing price. This refers to market risks which are not assigned to the interest rate risk. In particular, this also encompasses any type of spread risk exposure of instruments which are sensitive to changes in interest rates, and which are neither included in interest rate risk nor in counterparty credit risk. The source of these market risks may arise from changes in credit spreads (credit spread risk); foreign exchange rates (spot and forward FX risk); risks from adjustments to the credit valuation of OTC-derivatives (CVA risk); risks from fluctuations in the value of fund assets (fund risk) and risks from the trading book.

Interest Rate Risk

Interest rate risk in the banking book (IRRBB) is defined as the risk exposure of instruments held in the banking book which are sensitive to changes in interest rates, caused by yield curve shifts. This includes risks arising from maturity transformation (gap risk), spreads to the general yield curve including tenor spread risk but excluding credit spread risk (basis risk), explicit and implied interest rate options (option risk); and risks from changes in Aareal Bank's specific funding spreads (funding risk).

Pension Risk

Pension risk arises from adverse changes in the net defined benefit liability. This encompasses movements in the pension liability primarily caused by decreasing interest rates as well as negative changes in the market values of the corresponding plan assets.

Liquidity Risk

Aareal Bank is exposed to liquidity risk, i.e., the risk of being unable to meet current or future payment obligations or of being unable to fulfil such obligations in a timely manner and in all currencies it operates with. Liquidity risk can take various forms and may also be triggered by circumstances that are unrelated to Aareal Bank's business and may be outside of its control. Moreover, larger-scale losses, rating changes, a general decline in business activity in the financial sector, regulatory action, and a wide range of other reasons may have an adverse impact on Aareal Bank's access to liquidity and may, therefore, seriously affect its business performance and future prospects.

Investment Risk

Aareal Bank defines investment risk as the threat of unexpected losses incurred due to an impairment of the carrying value of equity investments, or a default of loans to equity investments. The concept of investment risk also encompasses risks arising from contingencies vis-à-vis relevant Group entities. Aareal Bank Group acquires equity investments strictly for the purpose of positioning the Group as an international property financing specialist and provider of property-related services.

Risk of a downgrading of the Issuer's ratings

The rating agencies Fitch Ratings Ireland Limited and Moody's Deutschland GmbH have assigned various credit ratings (*inter alia* short-term and long-term issuer ratings) to Aareal Bank, including ratings by Moody's Deutschland GmbH for Pfandbriefe. Aareal Bank's rating is an important comparative element in competition with other banks. If these ratings of Aareal Bank were to be downgraded in the future, this might impair Aareal Bank's access to refinancing sources and/or cause refinancing costs to rise.

Step-in Risks

Aareal Bank associates step-in risks with the risk that Aareal Bank may provide financial support to an entity beyond or in the absence of any contractual obligations to avoid consequential losses for Aareal Bank like reputational damages or default of important customers.

Risks relating to the European Sovereign Debt Crisis

The European sovereign debt crisis might potentially raise its head again in Europe as the problem of high levels of indebtedness is still there. With the expiry of the net bond purchase programs and the ongoing monetary tightening of central banks, risk premiums for highly indebted countries could rise. Given high levels of debt, a rise in risk premiums is accompanied by an increase in debt burden, which may cast doubt on the sustainability of the fiscal stance of countries concerned. Although the ECB has created a tool to ensure the smooth normalization of the Eurozone's monetary policy and prevent excessive tightening of financial conditions for individual member states, the effectiveness of this instrument has not yet been tested. Regulatory and political actions by European governments may not be sufficient to prevent a crisis from spreading or prevent the departure of one or more member countries from the common currency. In particular, anti-austerity populism in member countries of the Eurozone could undermine confidence in the continued viability of those countries' participation in the euro. The default or departure from the euro of any one or more countries could have unpredictable political consequences as well as consequences for the financial system and the greater economy, potentially leading to a disruption of Aareal Bank's business, causing write-downs of assets and material losses. The Aareal Bank's ability to protect itself against these risks is limited.

Risks attached to the Banking & Digital Solutions segment

There is a risk that current economic developments, such as the shortage of skilled labor in the skilled trades sector, increased labor and interest costs, and the interest rate competition activated following the turnaround in interest rates, could have a diminishing effect on the amount of deposits deposited with Aareal Bank by the housing industry and related industries. This would have a negative impact on the amount of fee income that can be generated accordingly.

Risks relating to Aareon AG

In relation to Aareon AG the main risk groups are financial, market, management and organisational risks, risks from incidental and ambient conditions as well as production risks, which are often interrelated.

Financial risks are considered to encompass liquidity, cost and revenue risk. Market risks include customer and competition risks, risks relating to associations' and advisory councils' opinion leadership, supplier risks and risks arising from inorganic growth. The management and organizational risks category combines risks relating to personnel and internal processes. The incidental and ambient conditions category comprises product and project risks as well as risks relating to information security.

There is a risk that products or consultancy services offered by Aareon AG may not meet customer expectations and that its competitors develop products or provide consultancy services which clients consider to be superior to those of Aareon AG. If that were to happen, it could result in less revenue based on consultancy fees and royalties. In the event that the software provided by Aareon AG is faulty, or if it failed temporarily or totally, this might result in an attempt of customers to seek indemnity from Aareal Bank Group for losses suffered by them, and Aareal Bank Group could be required to patch the software systems manufactured by it at its own expense.

Risks relating to Aareal First Financial Software GmbH

Regarding First Financial Software GmbH, Mainz, Germany the main risk groups are management and organizational risks as well as operational risks regarding the further development and operation of systems, as well as market risks due to the close relationship with Aareal Bank as main customer of First Financial and the distribution in respect to banking products offered predominantly to customers by Aareal Bank.

2. Regulatory Risks

Risks for the Issuer in connection with own funds and liquidity requirements as well as the leverage ratio

With a view to Directive 2013/36/EU of 26 June 2013 on access to the activity of credit institutions and the prudential supervision of credit institutions and investment firms, amending Directive 2002/87/EC and repealing Directives 2006/48/EC and 2006/49/EC (as amended, the "**CRD IV Directive**") and the capital requirement regulation (EU) No. 575/2013 of 26 June 2013 on prudential requirements for credit institutions

and investment firms (as amended, the "**CRR**"), (CRD IV Directive and CRR together referred to "**CRD IV Package**"), the capital requirements for credit institutions have and continue to become significantly tighter in terms of quality and materially increase in terms of required quantity.

The CRD IV Package itself has been substantially amended through a revised banking package. This package consists of Regulation (EU) 2019/876 amending the CRR (the "**CRR II**") and Directive (EU) 2019/878 amending the CRD IV (the "**CRD V**") as well as Regulation (EU) 2019/877 amending Regulation (EU) No. 806/2014, as amended ("**SRM Regulation**") (the "**SRM II**") and Directive (EU) 2019/879 amending the Directive for the recovery and resolution of credit institutions and investment firms (Directive 2014/59/EU, the "**BRRD**") (the "**BRRD II**") (together, the "**EU Banking Package**"). The SRM II is applicable since 28 December 2020, while CRD V and BRRD II have been implemented into national law by the German Risk Reduction Act (*Gesetz zur Reduzierung von Risiken und zur Stärkung der Proportionalität im Bankensektor*). The CRR II has been fully applied since 28 June 2021, which had a significant impact on regulatory requirements. In October 2021 the EU commission issued a first draft for a further revision of the EU banking package foreseeing amendments to CRR (2021/0342 (COD), the "**CRR III**") and CRD (2021/0341 (COD), the "**CRD VI**") in order to implement the remaining elements of the Basel III reform into EU law, which will have a significant impact on the capital requirements of credit institutions. The EU trilogue has been successfully concluded in December 2023. Even though the publication of the final legislation in the EU Official Journal is still pending, no further changes to the framework are expected at this stage.

Pursuant to the CRR, credit institutions are required to maintain a minimum ratio of Tier 1 capital of 6% and a minimum ratio of Common Equity Tier 1 capital of 4.5% The minimum total capital ratio of own funds (being the sum of the Tier 1 capital and the Tier 2 capital) is 8%. The German Banking Act by transposing the CRD IV package into national law also requires banks to maintain a mandatory capital conservation buffer of 2.5% and authorises the Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht*, "**BaFin**") to require credit institutions to build an additional countercyclical buffer during periods of high credit growth. In addition, BaFin may require credit institutions to build up a systemic risk buffer as a matter of prevention against long-term non-cyclical systemic or macro-prudential risks, in particular if risk aspects are not fully covered by the capital requirements under the CRR or if the risk-bearing capability is endangered. In January 2022 BaFin announced a so called "macroprudential measures package" which contains a reintroduction of a countercyclical capital buffer of 0.75% and a sectoral systemic risk buffer of 2.00% for exposures secured by residential real estate both to be applied since 1 February 2023. Furthermore it can also be observed that also other jurisdictions that implemented the Basel framework started to (re-)introduce countercyclical capital buffers, which apply to all exposures within their territory, meaning that also foreign banks are required to hold additional capital for their exposures in respective jurisdictions.

Additionally, the Issuer is subject to further regulatory requirements such as the Liquidity Coverage Ratio (the "**LCR**") (which requires credit institutions to maintain certain liquid assets for a 30-day period against the background of a stress scenario) and the Net Stable Funding Ratio (the "**NSFR**") (which requires credit institutions to refinance their long term assets under regular as well as under stressed market conditions with respective long term stable funding). The Issuer is required to maintain a minimum LCR of 100% The NSFR (binding minimum quota of 100% since 28 June 2021) is calculated as the ratio of available stable funding resources across all maturities to the required stable funding and imposes further obligations on the Issuer.

If the Issuer fails to address, or appears to fail to address, appropriately any changes or initiatives in banking regulation, its reputation could be harmed and regulatory authorities could, among other things, bring administrative or judicial proceedings against the Issuer, which could result, among other things, in suspension or revocation of the Issuer's licences, cease and desist orders, increase of own funds requirements, conditions, fines, civil penalties, criminal penalties or other disciplinary action.

Given that own funds and/or liquidity requirements will increase and further regulatory requirements may change or be implemented, this may increase the Issuer's refinancing costs or require the Issuer to raise own funds instruments, increase other forms of capital or reduce its RWAs to a greater extent which in turn may result in an adverse effect on the Issuer's long term profitability. As a consequence, this may potentially have an adverse effect on the economic or legal position of creditors of the Issuer. Any of the aforementioned changes may also have a material adverse effect on the operating results and financial position of the Issuer.

Risks for the Issuer in connection with the Single Supervisory Mechanism (SSM) and/or the Supervisory Review and Evaluation Process (SREP)

Since November 2014, the ECB, supported by the participating national competent authorities (NCAs, such as BaFin), is responsible for conducting banking supervision in the euro area based *inter alia* on the regulation on the single supervisory mechanism (Council Regulation (EU) No. 1024/2013 of 15 October 2013, the "**SSM Regulation**" and the "**SSM**", respectively) which confers specific tasks on the ECB concerning policies relating to the prudential supervision of credit institutions. The SSM is considered

as the first pillar of the so-called EU Banking Union. Since then, the Issuer is a "significant" credit institution (and thus subject to direct ECB supervision, the ECB acting with the day-to-day assistance of the NCAs) under the SSM.

With a view to fulfil the supervisory tasks assumed by it, the ECB is empowered, in particular as part of the Supervisory Review and Evaluation Process ("**SREP**"), to *inter alia*, analyse the business model, reliability of internal control arrangements (including the internal models to measure adequacy of capital and liquidity also referred to as "Internal Capital Adequacy Assessment Process" (ICAAP) and "Internal Liquidity Adequacy Assessment Process" (ILAAP), respectively), risk governance of individual groups of significant credit institutions (such as the Issuer) and to require those to comply with own funds, leverage and liquidity adequacy requirements which may exceed regular regulatory requirements or to take early correction measures to address potential problems.

The key result of the application of the SREP is a common scoring which may result in specific additional individual capital, leverage and liquidity requirements for the supervised credit institutions subject to the SSM (including the Issuer). As a result, each affected credit institution receives a SREP decision by the ECB imposing, among other, individual capital requirements applicable. On 31 March 2024, the Total SREP Capital Requirements (TSCR) of Aareal Bank Group amounts to 11,00% and comprises the minimum own funds requirement pursuant to Article 92 (1) of the CRR and the Pillar 2 Requirement (P2R). The Overall Capital Requirement (OCR) of the Group amounts to 14,06% and additionally includes the combined buffer requirement (currently composed of capital conservation buffer, countercyclical buffer and systemic risk buffer).

Procedures within the SSM and other regulatory initiatives could change interpretation of regulatory requirements applicable to the Issuer and lead to additional regulatory requirements, increased cost of compliance and reporting for the Issuer. Furthermore, such developments may require re-adjustment of its business plan or may have other material adverse effects on its business, results from operations or financial condition.

Risks from changes in the regulatory requirements or enforcement activities

The Issuer is subject to banking and financial services laws and government regulation in each of the jurisdictions in which it conducts business as well as intense supervision by bank regulators and central banks in several of these jurisdictions. The competent regulatory authorities have an extensive administrative surveillance authority over many aspects of the financial services business, including (but not limited to), *inter alia*, liquidity, capital adequacy and permitted investments, market behaviour requirements, organisational requirements, anti-money laundering, privacy, record keeping, as well as marketing and selling practices. The Issuer is therefore, among other requirements, obliged to meet minimum capital (own funds) requirements (on a group level) and to maintain a complex, sophisticated and expensive risk management system. The regulatory framework is subject to permanent developments and changes in legislation or administrative practice not only at the national level. Also international bodies such as the Financial Stability Board and the Basel Committee as well as the lawmakers and regulatory authorities in Europe are continuously working on additional recommendations, regulations, standards, etc. It is likely that in future further regulations need to be considered which might adversely affect the positions of creditors of credit institutions (such as the Issuer).

If the Issuer fails to address, or appears to fail to address, appropriately any changes or initiatives in banking or financial services regulation, its reputation could be harmed and regulatory authorities could, among other things, bring administrative or judicial proceedings against the Issuer, which could result, among other things, in suspension or revocation of the Issuer's licences, cease and desist orders, increase of own funds requirements, conditions, fines, civil penalties, criminal penalties or other disciplinary action.

Any of such changes and enforcement actions may result in the necessity for the Issuer to raise additional own funds or other forms of capital, to restrict or modify its business or to reduce its risk weighted assets (RWAs) to a greater extent which in turn may result in an adverse effect on the Issuer's long term profitability. Moreover, compliance with amended or newly-imposed rules may lead to an increase in administrative expenses (including the expense of maintaining capital resources as required by own funds provisions), cost of compliance and reporting and consequently to higher cost ratios for the Issuer. The general administrative expenses of the Issuer may also increase as a consequence of increased supervisory fees. New regulatory requirements and in particular a failure of the Issuer to meet them as well as enforcement activities could also have other material adverse effects on the Issuer's financial position and results of operations.

Bank Crisis Management and deposit insurance framework

On 18 April 2023, the European Commission adopted a legislative proposal to adjust the EU's bank crisis management and deposit insurance ("**CMDI Framework**"). The package implies the review of the BRRD and SRM Regulation as well as a separate legislative proposal to amend the Deposit Guarantee Schemes Directive (Directive 2014/49/EU as regards the scope of deposit protection, use of deposit guarantee schemes funds, cross-border cooperation, and transparency, the "**DGSD**"), all of which aim at further preserving financial stability, protecting taxpayers and depositors, and supporting the real economy and its competitiveness. The proposals enable authorities to organise the orderly market exit for a failing bank of any size and business model and consists of three pillars: (i) preserving financial stability and protecting taxpayers' money through facilitating the use of deposit guarantee schemes in crisis situations; (ii) shielding the real economy from the impact of bank failure by allowing authorities to fully use resolution as a key component of the crisis management toolbox; and (iii) better protecting depositors. The European Commission's proposal harmonises the standards of depositor protection across the EU and further extends the new framework of depositor protection to public entities. Furthermore, the proposal harmonises the protection of temporary high balances on bank accounts in excess of EUR 100,000 linked to specific life events. In particular, the new rules introduce a new depositor preference, according to which the "super-preference" of deposit guarantee schemes is removed and a single-tier ranking for all deposits (covered deposits and deposit guarantee schemes' claims, non-covered deposits of households and small and medium enterprises, other non-covered deposits) is created. Furthermore, the new rules foresee that all deposits relative to ordinary unsecured claims are preferred. However, there is a high degree of uncertainty with regards to the proposed adjustments to the CMDI Framework and when they will be finally implemented in the EU. Therefore, as at the date of this Prospectus, the exact impact of these adjustments and the potential effects on the Issuer cannot be assessed yet.

Risks relating to changes in the legal framework on covered bonds

In order to harmonise the European covered bonds market, Regulation (EU) 2019/2160 of the European Parliament and of the Council of 27 November 2019 amending Regulation (EU) No 575/2013 as regards exposures in the form of covered bonds (the "**Covered Bond Regulation**") and Directive (EU) 2019/2162 of the European Parliament and of the Council of 27 November 2019 on the issue of covered bonds and covered bond public supervision and amending Directives 2009/65/EC and 2014/59/EU (the "**Covered Bond Directive**") have been issued in 2019.

The Covered Bond Regulation in particular amends Article 129 of the CRR, specifying Loan-to Value Limits (LTV limits) as soft coverage limits, meaning that while there are no limits to the size of an underlying loan, such a loan can act as collateral only within the LTV limits for the assets. LTV limits should also apply throughout the entire lifetime of the loan.

The legislation has significantly increased requirements for issuers of covered bonds like Pfandbriefe, such as the Issuer. If the Issuer fails to address, or appears to fail to address, these requirements appropriately, its reputation could be harmed and regulatory authorities could, among other things, bring administrative or judicial proceedings against the Issuer, which could result, among other things, in suspension or revocation of the Issuer's licences, cease and desist orders, conditions, fines, civil penalties, criminal penalties or other disciplinary action.

In Germany, the Covered Bond Directive was implemented by a law transposing the Covered Bond Directive (the "**CBD Implementation Act**") which has, *inter alia*, lead to changes in the German Pfandbrief Act (*Pfandbriefgesetz*, the "**Pfandbrief Act**"). Pursuant to § 30(2a) Pfandbrief Act the administrator of a cover pool (*Sachwalter*, "**Cover Pool Administrator**") may extend the maturity of Pfandbriefe by up to 12 months. Further, the Cover Pool Administrator may defer the payment of any interest due within one month of its appointment to the end of this one-month period. Deferred amounts shall bear interest for the duration of the deferral pursuant to the conditions applicable until the deferral. Deferred interest payments shall be deemed to be principal amounts.

Holders of Pfandbriefe should note that neither the extension of the maturity itself nor, in the event of such an extension, the failure to redeem the Pfandbriefe at the original maturity date, will result in an event of default. Holders should further note that the extension of the maturity of one Pfandbrief issue may lead to the deferral of the maturity of other Pfandbrief issues. Due to the deferral and possibility to redeem Pfandbriefe at any time between the original maturity and the end of the deferral period, Holders would receive the outstanding principal amount later than expected or at an unexpected time and there is a risk that they may only be able to reinvest the amount to conditions less favourable compared to the market conditions at the time of the initial maturity.

There are uncertainties as to possible changes in the legal interpretations in relation to the issuance of Pfandbriefe. These uncertainties could require increased costs of compliance for the Issuer or subject the Issuer to additional legal risk, which in turn could lead to lower revenues, cash flows and worsen the overall financial condition of the Issuer and potentially subsequently have an adverse effect on the economic or legal position of creditors of the Issuer.

Risks related to regulatory actions the Issuer is subject to

In January 2013 the Basel Committee on Banking Supervision has published the paper "Principles for effective risk data aggregation and risk reporting ("**BCBS 239 Principles**"). The objective of the regulation is to improve banks' risk data aggregation capabilities and internal risk reporting practices, thus enhancing the risk management and decisions making processes at banks. The BCBS 239 Principles constitute the first concrete regulatory requirements in relation to the IT structure and data management of banks, which shall ensure an overall view of the data and processes. As a consequence, banks will need to maintain significantly higher standards regarding the quality and consistency of their risk data as well as the speed and flexibility of their reporting. On a national level, the recommendations presented by the BCBS 239 Principles have been implemented in 2017 by the 5th amendment to the circular of the BaFin "*Mindestanforderungen an das Risikomanagement*" (MaRisk). Non-compliance with the BCBS 239 Principles can result in several penalties or repercussions (including, but not limited to, fines and sanctions as well as restrictions on certain business activities being imposed by regulators).

3. Risks related to the Issuer's business activities and industry

Risks specific for Structured Property Financing, including risks relating to geopolitics and to monetary policy tightening

There are various risks and uncertainties regarding the macro-economic environment which have become relevant or could be relevant if they were to materialise to a considerable extent for the financial and capital markets as well as for the commercial real estate markets and thus negatively affect Aareal Bank's business:

The economy, financial markets and commercial property are all exposed to a number of different risks in 2024. The ongoing consequences of the Russian invasion of Ukraine and mutual sanctions between the Western countries and Russia are continuing to have a strong negative impact on many economies, which may persist or be exacerbated if the conflict continues. Since Russia is a major exporter of oil, gas, nickel and palladium, while Ukraine is a major exporter of grain, this war continues to create the potential for considerable volatility on the commodity and financial markets. This, together with an increased risk of cyberattacks, heightened investor reluctance, and the risk of critical infrastructure sabotage, puts economic growth at serious risk. In this context, it can be assumed that the economic relationship between Russia and the West will not normalise completely in the near term, even if the war should end.

In addition, Russia and China are apparently forming an alliance against the Western world. Since China has a major role in global supply chains, escalating trade conflicts could significantly damage the global economy and would certainly be exacerbated if China attacked Taiwan. Meanwhile, after the Covid-19 pandemic had demonstrated the vulnerability of global supply chains, decoupling processes and general efforts towards de-globalisation can already be observed. Other geopolitical risks, such as terrorism and military conflicts, could also have enormous effects on the markets and their participants: following Hamas's attack on Israel and Israel's invasion of the Gaza Strip, the threat of terrorism has increased not only in the Middle East, but also in Western countries. This conflict also harbours the risk of increased volatility in energy prices. In particular, there is a risk of the conflict spreading further in the Middle East, which in turn might disrupt global oil supplies.

Although inflationary pressures abated in 2023, the still elevated level of core inflation indicates that companies are passing on higher prices to customers. Also, the deflation of energy price is diminishing in US and Eurozone. Given the still elevated inflation, which is sensitive to geopolitical shocks, central banks are likely to maintain their restrictive monetary policy for longer than expected at the beginning of the year, representing a considerable risk for financial and property markets. The extend of an excessively long tightening could have serious and lead to a rise in yields on the bond markets and negative corrections on the equity and property markets. Liquidity-limited refinancing markets could also exert considerable pressure on financial institutions and, in conjunction with uncertainties about economic momentum, restrict banks' lending activities. Furthermore, the ECB's decision to set the interest rate on minimum reserves at 0%, together with the increase in regulatory requirements, represents a burden on the profitability of banks. This would be exacerbated by the possibility of increasing the minimum reserve rates, which is being discussed in individual national central banks of the Euro system.

Upcoming US elections will affect the US economy beyond 2024 and are a major source of near-term uncertainty. Assuming full Republican control of government after the 2024 election, inflation is likely to be pushed above the baseline projections and trade policy will likely remain protectionist through imposing more

tariffs on the rest of the world. Moreover, looser fiscal policy relative to current law and tighter labour markets because of less immigration can exert further inflationary pressure in the US.

Another risk is that government debt and bond yields have substantially risen due to the massive fiscal support during the Covid-19 pandemic, but also as a result of the economic slowdown and the difficulties in reforms (e.g., in UK and Eurozone). Although many governments are close to or are already running budget surpluses, high interest rates and low GDP growth continue to build up debt-to-GDP ratios. With the expiry of the net bond purchase programmes and the continued tightening of monetary policy by central banks, the risk premiums for highly indebted countries as well as emerging and developing countries have already risen. Non-financial corporate debt has also climbed to a high level in many advanced economies, mainly reflecting bond issuance. Reduced macro-economic activity or other risks could be a reason for downgrading the rating of these bonds.

The efforts of many countries and companies to limit global warming require a profound transformation of the entire economy. At the same time, the macroeconomic impact of this transformation is uncertain, and its effect depends on a variety of factors. Likewise, this transformation involves costs that are likely to burden both businesses and consumers. In this context, the decarbonization of the economy not only encompasses energy supply, but also requires significant changes in industry, transport, construction, and agriculture. In addition to the transition costs incurred in decarbonizing the global economy, the costs directly caused by climate change will also increase in the medium term. Extreme weather events, temperature fluctuations, and more frequent extreme heat events cause physical damage that will intensify over time. The extent to which these physical damages increase will depend on how well the global community succeeds in reducing greenhouse gas emissions.

The risks and adverse effects on the economic development including the financial and capital markets as well as on commercial property markets could have a material adverse effect on Aareal Bank's profitability. Profitability may also be adversely affected where Aareal Bank decides to prolong loans rather than to insist on repayment in order to avoid defaults on repayment obligations.

There are several risks and uncertainties for commercial property. Despite the expected interest rate cuts in 2024, the monetary policy environment will remain tight, causing considerable uncertainty for commercial properties. The elevated cost of capital associated with higher interest rates, for example, will result in a lower valuation of commercial properties if these costs are not offset by rent increases. This risk will grow if higher interest rates go along with more restrictive lending standards, which can limit the financing options for potential property buyers.

Other uncertainty factors and risks in the macro-economic environment also remain relevant; increasing political and geopolitical uncertainty, a dragging economic recovery or investor reticence all might negatively affect property values. In fact, restrictive lending standards, persistently low investor confidence, high borrowing costs, and the gradual transmission of interest rate changes to the market are making a timely recovery difficult. Historically low transaction volume for commercial real estate exacerbates the finding of the market values for properties. The fact that the gradual refinancing of fixed-rate loans means that the average effective interest rate paid by the market will continue to rise in the near term. Especially when fixed-rate periods or hedging instruments expire, this may have a negative impact on the viability of debt service or on the investors' free cash flow after having serviced their debt. A loss of tenants due to negative economic developments and the resulting lower demand may even exacerbate the situation.

Should the trend towards increased remote working continue or even intensify, more and more companies may decide to rent less office space. The transition to such a new way of working could exert pressure on rental prices for office properties and on the demand for office space. It can be assumed that the impact varies depending on the market, the country, and a property's quality. On the other hand, communal and flexible working space will be increasingly sought after in a changing world of work, halting or even reversing the pre-pandemic trend of decreasing office space per employee. There is also the possibility that office properties that do not meet the changed tenant requirements may permanently leave the market, which could lead to a shortage of office supply and could counteract a decline in rent levels.

Due to these factors, there is the risk that these developments could have negative effects not only on cash-flows but also on property values the Aareal Bank Group holds in its property financing portfolio and could also have an adverse effect on the amount of non-performing loans, the staging of loans, and on the allowances for credit losses of Aareal Bank Group.

Against the backdrop of the currently reduced economic momentum, increased interest rate levels and financing costs, general conditions for the real estate market remain challenging. With a view to the financing markets for commercial properties, Aareal Bank anticipates that strong competitive pressure will persist, particularly in regions and for property types that have already experienced high demand in recent years. Higher financing costs and more restrictive lending standards should counteract an increase in loan-to-value ratios. Nevertheless, changes in the market environment could increase pressure on margins (gross as well

as net) or lead to moderate increases in loan-to-value ratios. As lenders are expected to prefer financing first-class properties in top locations, just like for investors, the shortage of properties and reduced transaction volumes in this segment as well as the uncertainty regarding the further economic development could constrain financing opportunities. The developments in competition and economic development could adversely affect the profitability of Aareal Bank and its risk position. Deteriorating economic forecasts and prolonged recovery periods for defaulted loans must be seen as a risk which in general could lead to higher risk provisioning.

Operational Risk

According to Article 4(52) CRR, Aareal Bank defines operational risk as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events and includes legal risk. Aareal Bank classifies various material non-financial risk sub-types below the definition of operational risk and takes them into account along the risk management cycle. Each of these sub-types can lead to a material adverse effect on Aareal Bank's business performance, financial situation and future prospects.

Fraud Risk

Risks to the asset, income or liquidity position of the institution that arise from intentional and unlawful acts. These are primarily the offenses of fraud and breach of trust according to §§ 263 *et. seq* of the German Criminal Code (*Strafgesetzbuch*), as well as crimes in which the act and the subjective aspect of the crime are similar to fraud.

ICT Risk

Risks to the asset, income or liquidity position of the institution arising from the ICT risk may result from a variety of different aspects: ICT availability and continuity risk, ICT security risk, ICT modification risk, ICT data integrity risk.

Outsourcing Risk

Risk owing to the regular performance of Aareal Bank-specific tasks by third party service companies (dependence on external service providers); this also includes ICT outsourcing risks.

BCM Risk

Risks to the asset, income or liquidity position of the institution resulting from suddenly occurring events (e.g. loss of IT/infrastructure, buildings, service providers/suppliers or employees), which can impair sound business operations.

Legal Risk

Aareal Bank defines legal risks as risks for the institution's assets, earnings or liquidity situation arising from non-identification or non-compliance with regulatory and/or legal obligations or a disadvantageous interpretation and/or unenforceability of contractual provisions. This also includes retroactive changes to the legal situation (or changes to general legal opinion) that affect existing contractual provisions and the failure to pursue legal positions.

Tax Risk

It describes the risks to the asset, income or liquidity position of the institution arising from non-identification or non-compliance with regulatory and/or legal obligations in relation to tax matters. This also includes the retroactive change in the legal situation/legal opinion in tax matters, the failure to pursue legal positions as well as payments resulting from (alleged) legal violations through late payment surcharges, late payment surcharges, administrative offense fines, etc.

Model Risk

The model risk is the risk of faulty steering decisions owing to an inappropriate reflection of reality by the models in question. The model risk first of all comprises the specific risk of underestimating the regulatory capital requirements of models subject to mandatory approval (e.g. models based on internal assessments for assessing credit risk). In addition, it comprises the risk of incorrect model-based steering decisions in reality, resulting in adverse impacts on the asset, income or liquidity position.

Personnel Risk

Risks to the asset, income or liquidity position of the institution resulting from staff shortages, fluctuations or performance. In addition, risks arising from (changes to) the employee structure (e.g. age structure) are covered hereunder.

Project Risk

Project risks encompass all potential events that may have an adverse impact in the course of a project on the project goal itself or also on parts of a project. This also includes the project management risk. In particular, these include consequences that jeopardise the project plan and can cause loss or damage to Aareal Bank.

In addition, there are risks from inadequate processes or human errors in processes as well as other operational risks from external factors such as floods, storms, fire, bodily harm, vandalism and arson or political/social developments such as war, terrorism or strikes.

Reputational Risks

Aareal Bank defines reputational risk as the risk of loss events or other events having a negative impact on the value of the "Aareal" brand. Reputational risks can lead to a material adverse effect on Aareal Bank's business performance, financial situation and future prospects.

Risks in connection with acquisitions

In the course of any acquisition of a business, a delayed or inefficient implementation of integration measures, unexpectedly high integration expenses or risks may result in any integration synergies and / or unexpected underperformance of the business being less than anticipated. Furthermore, it cannot be excluded that liabilities and risks may not have been identified or precisely determined in the acquisition process. As a result, Aareal Bank Group may be confronted with risks that only become apparent following completion of the acquisition in the wake of integration efforts including impairment risks.

Business Risk

Business risk represents potential risks of a general nature, which could potentially jeopardize the achievement of corporate goals and which may arise, for example, from changes in the competitive environment or due to unsuitable strategic positioning in the macroeconomic environment.

Systemic Risks

Aareal Bank associates systemic risk with the risk of the collapse of the entire financial system or an entire market. Systemic risks can lead to a material adverse effect on Aareal Bank's business performance, financial situation and future prospects.

4. Environmental, Social and Governance Risks

The Issuer may be exposed to environmental, social and governance (ESG) risks, which include risks of negative impact resulting from climate change (physical risks (e.g. natural disasters) and transitory risks (e.g. impact of political actions / regulatory measures to foster the transition towards a low-carbon economy)) and breach or insufficient consideration of ESG aspects in business activities.

The business activities of the Issuer's customers may be adversely affected by the effects of climate change, such as extreme weather events and the associated catastrophe losses, which could, *inter alia*, impact the value of real estate collateral.

Climate change concerns could also disrupt the Issuer's business, affect client activity levels and credit-worthiness and damage the Issuer's reputation as a result of increasing stakeholder expectations with respect to the Issuer's contribution to a low-carbon resource-efficient economy, a lack of a broad range of green products / services offering as well as from its involvement, or its client's involvement in troubled business activities from a sustainability point of view or when dealing with controversial clients.

Climate change may cause extreme weather events – and with respect to adaption – significant costs that could have a negative impact on certain industries which may negatively affect the Issuer's ability to service and interact with its clients or have a negative impact on the financial condition of the Issuer's clients, which may decrease revenues from those clients and increase the credit risk, associated with loans and other credit exposures to those clients.

In addition, political adaption measures aimed at reducing greenhouse gases could have a significant impact due to modernization needs of so called non-green (brown) buildings which may negatively affect the value of real estate collateral. Corresponding disclosure requirements, apart from the associated costs of ESG regulation, might damage the Issuer's or the Issuer's customers reputation e.g. when showing only a small proportion of green business compared to main competitors.

All these risks can worsen the creditworthiness of the Issuer's customers and negatively affect the value of real estate collateral with adverse effects on the Issuer's financial position and profitability.

B. Risk Factors relating to the Instruments

An investment in the Instruments may not be suitable for all prospective investors. Each prospective purchaser of the Instruments must determine the suitability of that investment in light of his own circumstances. In particular, each prospective investor should:

- have sufficient knowledge and experience to make a meaningful evaluation of the relevant Instruments, the merits and risks of investing in the relevant Instruments and the information contained or incorporated by reference in this Prospectus or any applicable supplement;
- have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation and the investment(s) it is considering, an investment in the Instruments and the impact the Instruments will have on its overall investment portfolio;
- have sufficient financial resources and liquidity to bear all of the risks of an investment in the relevant Instruments, including where the currency for principal and interest payments is different from the prospective investor's currency;
- understand thoroughly the terms of the relevant Instruments and be familiar with the behaviour of any relevant indices and financial markets; and
- be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Some Instruments are complex financial instruments. Sophisticated institutional investors generally do not purchase complex financial instruments as stand-alone investments. They purchase complex financial instruments as a way to reduce risk or enhance yield with an understood, measured, appropriate addition of risk to their overall portfolio. A prospective investor should not invest in the Instruments which are complex financial instruments unless he has the expertise (either alone or with a financial adviser) to evaluate how the Instruments will perform under changing conditions, the resulting effects on the value of the Instruments and the impact this investment will have on the prospective investor's overall investment portfolio.

The risk factors regarding the Instruments are presented in the following categories:

- Risks related to the payout of the Instruments
- Risks related to the status of the Notes
- Risks related to early termination
- Risks related to references rates
- Risks relating to Green Bonds
- Risks related to the investment in the Instruments
- Risks related to tax and legal matters

5. Risks related to the payout of the Instruments

Risks relating to Fixed Rate Instruments Option I of the Terms and Conditions for Senior Fixed Rate Notes and Options IV of the Terms and Conditions for Fixed Rate Pfandbriefe and risks relating to Fixed to Floating Rate Instruments Option III of the Terms and Conditions for Senior Fixed to Floating Rate Notes and Options VII of the Terms and Conditions for Fixed to Floating Rate Pfandbriefe

Risks relating to Fixed Rate Instruments

A Holder of an Instrument with fixed interest rates ("**Fixed Rate Instrument**") is exposed to the risk that the price of such Instrument falls as a result of changes in the market interest rate. While the nominal interest rate of a Fixed Rate Instrument as specified in the applicable Final Terms is fixed during the life of such Instruments, the current interest rate on the capital market ("**market interest rate**") typically changes on a daily basis. As the market interest rate changes, the price of a Fixed Rate Instrument also changes, but in the opposite direction. If the market interest rate increases, the price of a Fixed Rate Instrument typically falls, until the yield of such Instruments is approximately equal to the market interest rate. If the market interest rate falls, the price of a Fixed Rate Instrument typically increases, until the yield of such Instruments is approximately equal to the market interest rate. If the Holder of a Fixed Rate Instrument holds such Instruments until maturity, changes in the market interest rate are without relevance to such Holder as the Instruments will be redeemed at a specified redemption amount, usually the principal amount of such Instruments.

Risks relating to Callable Fixed Rate Reset Notes

The Holders of the Notes are exposed to the risk that the price of the Notes falls as a result of changes in the market interest rate. While the nominal interest rate of a fixed rate note is fixed during the life of such notes, the current interest rate on the capital market ("market interest rate") typically changes on a daily basis. As the market interest rate changes, the price of a fixed rate note also changes, but in the opposite direction. If the market interest rate increases, the price of a fixed rate note typically falls, until the yield of such notes is approximately equal to the market interest rate. If the market interest rate falls, the price of a fixed rate reset note typically increases, until the yield of such notes is approximately equal to the market interest rate. If the Holder of Notes holds such Notes until maturity, changes in the market interest rate are without relevance to such Holder as the Notes will be redeemed at the principal amount of the Notes.

The same risk applies to notes which bear different fixed interest rates for different interest periods, such as the Notes. In addition, the Holders of the Notes are exposed to the risk that the interest rate for the interest periods commencing on the Reset Date is lower than the rate of interest for the previous interest periods. According to the conditions of issue, the interest rate for the interest periods commencing on the Reset Date are calculated on an interest level, which is equal to Five Year Euro Swap Rate plus a margin per annum. The Five Year Euro Swap Rate is subject to fluctuation.

Risks relating to Zero Coupon Instruments

Zero Coupon Instruments do not pay current interest but are issued at a discount from their nominal value or on an accumulated interest basis. Instead of periodical interest payments, the difference between the redemption price and the issue price constitutes interest income until maturity and reflects the market interest rate. A Holder of a Zero Coupon Instrument is exposed to the risk that the price of such Instrument falls as a result of changes in the market interest rate. The price of such Instruments will fall if the market interest rate is greater than the return at any point in time. Prices of Zero Coupon Instruments are more volatile than prices of Fixed Rate Instruments and are likely to respond to a greater degree to market interest rate changes than interest bearing instruments with a similar maturity.

Risks relating to Floating Rate Instruments Option II of the Terms and Conditions for Senior Floating Rate Notes and Options V of the Terms and Conditions for Floating Rate Pfandbriefe and risks relating to Fixed to Floating Rate Instruments Option III of the Terms and Conditions for Senior Fixed to Floating Rate Notes and Options VII of the Terms and Conditions for Fixed to Floating Rate Pfandbriefe

Risks relating to Floating Rate Instruments (Money Market Rate)

Instruments with floating interest rates ("**Floating Rate Instrument**") can be volatile investments. A Holder of a Floating Rate Instrument with reference to a money market rate such as the Euro Interbank Offered Rate ("**EURIBOR**") is exposed to the risk of fluctuating interest rate levels and uncertain interest income, which could even result in no interest payments at all. As the Instruments are governed by German law, interest will not be negative. However, fluctuating interest rate levels make it impossible to determine the profitability of Floating Rate Instruments in advance.

If Floating Rate Instruments are structured to include multipliers or other leverage factors, a positive or negative margin or caps or floors, or any combination of those features or other similar related features, their market value may be more volatile than those for securities that do not include these features. If the amount of interest payable is determined in conjunction with a multiplier greater than one or by reference to some other leverage factor, the effect of changes in the interest rates on interest payable will be magnified. The effect of a cap is that the amount of interest will never rise above and beyond the predetermined cap, so that the Holder will not be able to benefit from any actual favorable development beyond the cap. The yield could therefore be considerably lower than that of similar Floating Rate Instruments without a cap.

Floating Rate Instruments with a reverse interest structure have an interest rate which is determined as the difference between a fixed interest rate and an interest rate based upon a money market rate which means that the interest income on such Instruments falls if the reference interest rate increases. Typically, the market value of Floating Rate Instruments with a reverse interest structure is more volatile than the market value of other more conventional floating rate instruments based on the same reference rate (and with otherwise comparable terms) because an increase in the reference rate not only decreases the interest payable on the Instruments, but may also reflect an increase in prevailing interest rates, which may further adversely affect the market value of such Instruments.

Neither the current nor the historical value of the relevant floating rate should be taken as an indication of the future development of such floating rate during the term of any Instruments.

Risks relating to Floating Rate Instruments (Swap Rate)

Instruments with floating interest rates can be volatile investments. A Holder of a Floating Rate Instrument at a rate determined on the basis of the annual fixed leg of a fixed-for-floating euro interest swap transaction is exposed to the risk of fluctuating interest rate levels and uncertain interest income, which could even result in no interest payments at all. As the Instruments are governed by German law, interest will not be negative. However, fluctuating interest rate levels make it impossible to determine the profitability of Floating Rate Instruments in advance.

If Floating Rate Instruments are structured to include multipliers or other leverage factors, a positive or negative margin or caps or floors, or any combination of those features or other similar related features, their market value may be more volatile than those for securities that do not include these features. If the amount of interest payable is determined in conjunction with a multiplier greater than one or by reference to some other leverage factor, the effect of changes in the interest rates on interest payable will be magnified. The effect of a cap is that the amount of interest will never rise above and beyond the predetermined cap, so that the Holder will not be able to benefit from any actual favorable development beyond the cap. The yield could therefore be considerably lower than that of similar Floating Rate Instruments without a cap.

Floating Rate Instruments with an inverse interest structure have an interest rate which is determined as the difference between a fixed interest rate and a floating rate which means that interest income on such Instruments falls if the reference interest rate increases. Typically, the market value of Floating Rate Instruments with an inverse interest structure is more volatile than the market value of other more conventional floating rate instruments based on the same reference rate (and with otherwise comparable terms). Floating Rate Instruments with an inverse interest structure are more volatile because an increase in the reference rate not only decreases the interest payable on the Instruments, but may also reflect an increase in prevailing interest rates, which may further adversely affect the market value of such Instruments.

Neither the current nor the historical value of the relevant floating rate should be taken as an indication of the future development of such floating rate during the term of any Instruments.

Risks in connection with Caps

If the interest rate of an issue of Instruments is not fixed but will be determined according to the structure of Instruments as set out in the relevant Final Terms of the Instruments, these issues may also be equipped with a cap. The effect of a cap is that the amount of interest will never rise above and beyond the predetermined cap, so that the Holder will not be able to benefit from any actual favourable development beyond the cap. The yield could therefore be considerably lower than that of similarly structured Instruments without a cap.

Risks relating to Fixed to Floating Rate Instruments Option III of the Terms and Conditions for Senior Fixed to Floating Rate Notes and Options VII of the Terms and Conditions for Fixed to Floating Rate Pfandbriefe

Risks relating to Fixed to Floating Rate Instruments

Fixed to Floating Rate Instruments bear interest at a rate that converts from one fixed rate to a floating rate. Such conversion may affect the secondary market and the market value of the Instruments. The spread on the Fixed to Floating Rate Instruments may be less favourable than then prevailing spreads on comparable Floating Rate Instruments relating to the same reference rate. In addition, the new floating rate at any time may be lower than the interest rates payable on other Instruments.

6. Risks related to the status of the Notes

Risks relating to subordinated Notes

The obligations under subordinated Notes constitute unsecured and subordinated obligations of the Issuer ranking *pari passu* among themselves and *pari passu* with all other subordinated obligations of the Issuer, except for such unsecured and subordinated obligations of the Issuer which are preferred by statutory provisions or which are subordinated by virtue of their terms or by statutory provisions, including according to § 46f(7a) KWG. In the event of the dissolution, liquidation, insolvency, composition proceedings or other proceedings for the avoidance of insolvency of, or against, the Issuer, such obligations will be subordinated to the claims of all unsubordinated creditors of the Issuer and to the claims of all subordinated creditors of the Issuer whose obligations are prior ranking according to applicable law or the terms of such obligation, so that in any such event no amounts shall be payable under such obligations until the claims of all unsubordinated and all prior ranking subordinated creditors of the Issuer shall have been satisfied in full.

Risks in relation to subordination and changes in the hierarchy of claims in respect of Notes

In transposition of a requirement under the BRRD, in § 46f(5) to (7) KWG the German legislator changed the hierarchy of claims (*Haftungskaskade*) in regular insolvency proceedings and implemented a preferential treatment for certain claims of depositors. Hence, Holders might rank below certain depositors' claims and therefore have an increased likelihood of being subject to the risks arising from resolution measures.

The resolution regime applicable to credit institutions stipulates that holders of common equity tier 1 capital instruments (as shareholders) and holders of other own funds instruments shall bear losses first and that creditors shall bear losses after such holders of common equity tier 1 capital and other own funds instruments generally in accordance with the order of creditors applicable in regular insolvency proceedings. As an expression of the so called no creditor worse-off principle (NCWO), creditors should generally not incur a greater loss than they would have incurred if the institution had been wound up under regular insolvency proceedings. However, the NCWO principle does not prevent the competent resolution authority from using any resolution tool or measure, but only provides for a potential compensation claim that may be raised by the affected person. In a resolution scenario applicable to a credit institution, the competent resolution authority will, in general, take measures under the bail-in tool in a particular sequence so that (i) common equity tier 1 capital instruments are written down first in proportion to the relevant losses, (ii) thereafter, the principal amount of other capital instruments (additional tier 1 capital instruments and tier 2 capital instruments) are written down on a permanent basis or converted into common equity tier 1 capital instruments in accordance with their order of priority and (iii) thereafter, certain eligible liabilities (potentially including some liabilities under and in connection with Notes other than subordinated Notes) in accordance with the hierarchy of claims of the Issuer's creditors in normal insolvency proceedings are written down on a permanent basis or converted into common equity tier 1 capital instruments.

Pursuant to § 46f(5) KWG obligations of the Issuer under certain senior unsecured debt instruments (*Schuldtitel*) as defined in § 46f(6) KWG would, in the event of initiation of insolvency proceedings or the implementation of resolution measures affecting the Issuer rank junior to all other outstanding senior unsecured obligations of the Issuer ("**non-preferred senior debt**"). This order of priority would apply to insolvency proceedings or in the event of resolution measures commenced on or after 1 January 2017 and would also affect any senior unsecured debt instruments outstanding at this time. As a consequence, this could lead to increased losses for creditors of non-preferred senior debt in a regular insolvency scenario and consequently also when resolution measures are implemented, in particular by application of the bail-in tool. Instruments constituting senior unsecured debt instruments issued by reference to this Prospectus could be considered to be non-preferred senior debt.

In addition, Holders of non-preferred senior debt instruments are exposed to risks associated therewith, in particular, without limitation, that the potential subordination negatively affects the market value of the Notes, a reduced liquidity for trading such Notes or reduced options to successfully post Notes as (ECB) central bank collateral or for other collateral purposes.

The changes to the KWG furthermore provide that debt instruments issued before the entry into force of the implementing act are still considered non-preferred senior debt, if they fulfil the conditions of the KWG in its version of 23 December 2016 (i.e. also when there was no contractual provision as non-preferred senior debt at the issue date). In insolvency proceedings, non-preferred senior debt issued in accordance with the KWG in the version of 23 December 2016 have the same rank in insolvency proceedings as non-preferred senior debt in accordance with the amended KWG implementing the proposed changes.

Also, it cannot be excluded that the hierarchy of claims will be further amended (also with retroactive effect) including with the result of a subordinated treatment and thereby allocating claims in relation to Notes (affecting claims under certain Notes partially or wholly) to have a lower and subordinated ranking in comparison to claims of ordinary unsecured non-preferred creditors of the Issuer.

Risks of total loss due to regulatory measures in respect of Notes

In the event of a crisis of the Issuer and thus, already prior to any liquidation or insolvency or such procedures being instigated, investors will be exposed to a risk of suffering a partial or full loss of their invested capital, or that the Notes or other debt will be subject to a conversion into one or more equity instruments (e.g. shares) of the Issuer. Extraordinary public financial support for troubled banks, if any, may only be used as a last resort after having assessed and exploited, to the maximum extent practicable, the resolution measures, including the bail-in tool.

Prospective investors in the subordinated Notes should note that they are issued with the intention of being recognized as tier 2 capital pursuant to CRR, the SRM Regulation, the SAG as well as the BRRD and the related bail-in tool. Prospective investors in subordinated instruments should in particular take into consideration that they may be significantly affected by such aforementioned procedures and measures (which may lead to the loss of the entire investment). Further, any other creditor of the Issuer may also be affected by such measures.

As a consequence, the Single Resolution Board established by the European Union as a central resolution authority (the "**Single Resolution Board**") or any other competent resolution authority might in any such situation be entitled, *inter alia*, to demand that any interest may not be paid and that the nominal amount of Notes (and in particular subordinated Notes) be reduced to zero, variation of the terms and conditions of the Notes in other aspects (e.g. variation of the maturity of a debt instrument) or impose other regulatory measures, including, but not limited to, conversion of the respective Notes or any other debt into one or more equity instruments (e.g. capital stock). Any such regulatory measure may release the Issuer from its obligations under the terms and conditions of the Notes or any other debt. In such circumstances, Holders would not be entitled to terminate, or otherwise demand early redemption of, the Notes or any other debt, or to exercise any other rights in this respect. In this context, in particular the hierarchy of claims of the Issuer's creditors in normal insolvency proceedings and the liability cascade provided for by the applicable resolution framework must be taken into account.

Also, the aforementioned measures may produce comparable results from an economic point of view for creditors concerned, e.g. the initial debtor (i.e. the Issuer) may be replaced by another debtor (who may have a fundamentally different risk profile or creditworthiness than the Issuer). Alternatively, the claims of bank creditors against the institution concerned may continue to exist while the institution's assets, its area of activity or creditworthiness are no longer the same. Alternatively, the claims may remain with the original debtor, but the Issuer's legal or economic situation regarding the debtor's assets, business activity and/or creditworthiness may not be identical (and may have significantly deteriorated compared to the situation prevailing prior to the application of the relevant measure), to the situation prior to the application of the measure.

Further, even though any measure, tool or power in connection with the resolution regime of the SRM may not in all cases directly interfere with the rights of Holders or other creditors of the Issuer, already the mere fact that the Single Resolution Board or another competent authority prepares or applies any such measure, tool or power towards the Issuer or even a different credit institution may have a negative effect, e.g. on the market value, pricing or liquidity of liabilities issued by the Issuer, their volatility, on the rating of the Issuer or on the Issuer's ability to refinance itself or its refinancing costs or otherwise have a material adverse effect on the operating results and financial position of the Issuer.

Risks in connection with a resolution regime and "bail-in rules" for credit institutions in respect of Notes

The Notes are subject to provisions enabling the competent resolution authorities to apply under certain circumstances loss absorbency regimes to the Notes, even if such regimes are not referred to in the Terms and Conditions or the Final Terms. The consequence of such loss absorbency rules is that the investors of the Notes would have to share in the losses of the Issuer, might lose the value of their entire investment or their rights might be severely affected.

These provisions are *inter alia* laid down in the German Recovery and Resolution Act (*Sanierungs- und Abwicklungsgesetz* – the "**SAG**") which implemented the BRRD into German law. Additionally and in addition to the BRRD, within the European Union ("**EU**") a Single Resolution Mechanism (the "**SRM**") was established by the SRM Regulation, establishing uniform rules and a uniform procedure for the resolution of credit institutions and certain investment firms and a Single Resolution Fund. The predominant part of the provisions of the SRM Regulation is applicable since 1 January 2016.

As a result of the SRM Regulation, most of the responsibilities of the national resolution authorities in the relevant Member State under the BRRD were shifted from the national level to the European level, in particular to the Single Resolution Board, for the purposes of a centralised and uniform application of the resolution regime for those credit institutions that are considered to be systemically relevant. The Single Resolution Board may adopt resolution decisions, write down capital instruments and take other early intervention measures in collaboration with the respective national resolution authority. The obligation to meet minimum requirements of eligible liabilities may increase the Issuer's refinancing costs and may adversely affect its ability to meet the payment obligations under the Notes.

Besides, the Single Resolution Board is *inter alia* responsible for resolution planning of the credit institutions which are directly supervised by the ECB, and for, setting the minimum requirement for own funds and eligible liabilities ("**MREL**").

Further, as a result of the interplay of the SRM and the BRRD (as nationally transposed) among other things, (i) credit institutions and resolution authorities are obliged to draw up recovery and resolution plans on how to deal with situations of financial stress, (ii) competent authorities are entitled to take early intervention measures, (iii) a set of resolution tools which resolution authorities can apply to preserve critical functions without the need to bail out a credit institution (or its creditors) has been introduced, and (iv) resolution funds are being set up to finance and facilitate the effective and efficient resolution of credit institutions.

With respect to the above mentioned early intervention measures, the competent authority may take various actions and measures, depending on the relevant situation, e.g. require changes to legal/and or operational structures, require the drawing up of detailed recovery plans which set out how stress scenarios or cases of systemic instability could be addressed or request reduction of the Issuer's risk profile, measures enabling recapitalisation measures, improving the liquidity situation or otherwise require improvement actions regarding the resilience of the core business lines and critical functions and even require the management to be removed/replaced.

Any such legal provisions and/or regulatory measures may severely affect the rights of the Holders and may have a negative impact on the market value of the Notes also prior to the effectiveness of such measures or resolution.

Holders are further subject to the risk of the application of the so-called bail-in tool. Pursuant to this measure claims for payment of principal, interest or other amounts under the Notes may be subject to a permanent reduction, including to zero, variations of the terms and conditions of the Notes in other aspects (e.g. changes of the debt instrument's maturity) or a conversion into one or more instruments that constitute common equity tier 1 capital instruments (such as share capital) by intervention of the competent resolution authorities. These measures entail the risk that creditors such as Holders whose claims are affected (i) suffer a partial or complete write-down of the nominal amount of their outstanding claim, (ii) may otherwise lose all or part of their investment e.g. by being subject to a permanent reduction, including to zero, or variation of the terms and conditions of the Notes in other aspects (e.g. extension of the maturity of a debt instrument) or (iii) receive shares or other instruments of the core capital (*hartes Kernkapital*) in exchange for their claims (whereby such equity instruments may be highly diluted and have a value close to zero). Pursuant to the applicable provisions, any write-down (or conversion) in accordance with the bail-in tool or the write-down tool would not constitute an event of default under the terms of the relevant instruments. Consequently, any amounts so written down would be irrevocably lost and the holders of such instruments would cease to have any claims thereunder. The competent resolution authority may, however, restore the position of the holders of bail-in or write-down instruments should the position of the respective institution improve. Payments made in breach of the order of the competent resolution authority would have to be reimbursed.

In addition to the bail-in tool, the competent resolution authorities may apply a broad range of other resolution tools, measures and powers. This includes *inter alia* the formation of a bridge institution (*Brückeninstitut*), the sale of the relevant entity (*Unternehmensveräußerung*) or its shares or the separation of valuable assets from the impaired assets of a failing credit institution, any transfer of rights and obligations (such as the Issuer's obligations under the Notes) to another entity, other amendment of the terms and conditions of the Notes (including their cancellation) or even the change of the legal form of the Issuer.

These aforementioned tools, measures and powers are binding on the Holders. Therefore, Holders would in particular have no claim or any other right against the Issuer arising out of any resolution measure to make payments under the Notes or relevant other securities against the Issuer. This would occur if the Issuer is

considered to be systemically relevant and becomes, or is deemed by the competent authority to have become, failing or likely to fail (in particular if its continued existence is at risk (*Bestandsgefährdung*)) or, alternatively, require extraordinary public financial support and certain other conditions are met (as set forth in the SRM Regulation, the SAG and other applicable rules and regulations).

Whether, and if, to which extent the Instruments (if not or not fully exempted by way of protective provisions) may be subject to aforementioned tools, powers and measures (in particular resolution tools such as the bail-in tool) will depend on a number of factors that are outside of the Issuer's control, and it will be difficult to predict when, if at all, this may occur. The exercise of any resolution measure would in particular not constitute any right of a creditor to terminate the Notes. In case the Issuer is subject to any resolution measure exercised by a competent resolution authority, Holders and other creditors of the Issuer face the risk that they may lose all or part of their investment, including the principal amount plus any accrued interest, or that the obligations under the Notes are subject to any change or variation in the terms and conditions of the Notes (which change will be to the detriment of the Holder), or that the Notes would be transferred to another entity (which may lead to a detrimental credit exposure) or are subject to any other measure if resolution measures occur.

7. Risks related to early termination

Risk of Early Redemption in respect of Senior Notes

Unless in the case of any particular Tranche of Notes the relevant Final Terms specify otherwise, in the event that the Issuer would be obliged to increase the amounts payable in respect of any Notes due to any withholding or deduction for or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature imposed, levied, collected, withheld or assessed by or on behalf of the Federal Republic of Germany or any political subdivision thereof or any authority therein or thereof having power to tax, the Issuer may redeem all outstanding Notes in accordance with the applicable Conditions.

In respect of certain Notes such as MREL-eligible Notes specific restrictions and limitations relating to their early redemption apply. In addition, if in the case of any particular Tranche of Notes the relevant Final Terms specify that the Notes are redeemable at the Issuer's option, the Issuer may choose to redeem the Notes at times when prevailing interest rates may be relatively low. In such circumstances an investor may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as that of the relevant Instruments.

Risk of Early Redemption in respect of Pfandbriefe

If in the case of any particular Tranche of Pfandbriefe the relevant Final Terms specify that the Pfandbriefe are redeemable at the Issuer's option, the Issuer may choose to redeem the Pfandbriefe at times when prevailing interest rates may be relatively low. In such circumstances an investor may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as that of the relevant Pfandbrief.

Risk of Early Redemption in respect of subordinated Notes

If in the case of any particular Tranche of subordinated Notes the relevant Final Terms specify that the Notes are redeemable at the Issuer's option, the Issuer may at its option, by giving prior notice, early redeem the Notes if at least five years have passed since the issue of the Notes, subject to the fulfilment of certain further conditions, in particular, the permission of the competent authority must have been granted. In this context, it should be noted that it is not yet clear how applicable CRR II requirements will be construed by competent authorities. Delegated legislations may be enacted or regulatory guidance may be published which effectively modify these requirements. In the event of an early redemption an investor may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as that of the relevant Notes.

The Issuer may at its option, by giving prior notice, early redeem the subordinated Notes before five years have passed since the issue of the Notes if there is a change in the regulatory classification of those instruments that would be likely to result in their exclusion from own funds and certain further conditions are met, in particular, the permission of the competent authority must have been granted. In this context, it should be noted that it is not yet clear how applicable CRR II requirements will be construed by competent authorities. Delegated legislation may be enacted which modifies these requirements. In the event of an early redemption an investor may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as that of the relevant notes.

8. Risks related to reference rates

Risks in relation to certain benchmark rates, including EURIBOR, in case these benchmark rates may be discontinued or reformed in the future

The Euro Interbank Offered Rate ("**EURIBOR**") and other interest rates or other types of rates and indices which are deemed to be benchmarks are the subject of ongoing national and international regulatory discussions and proposals for reform. Some of these reforms are already effective whilst others are still to be implemented.

Regulation (EU) No. 2016/1011 (the "**EU Benchmarks Regulation**") applies, subject to certain transitional provisions, to the provision of benchmarks, the contribution of input data to a benchmark and the use of a benchmark, within the EU. Regulation (EU) 2016/1011 as it forms part of domestic law in the United Kingdom (the "**UK**") by virtue of the European Union (Withdrawal) Act 2018, among other things, applies to the provision of benchmarks and the use of a benchmark in the UK. Similarly, it prohibits the use in the UK by UK supervised entities of benchmarks of administrators that are not authorised by the FCA or registered on the FCA register (or, if non-UK based, not deemed equivalent or recognised or endorsed).

Such benchmark reforms may cause benchmarks to perform differently than in the past, to disappear entirely, or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on any Instruments linked to or referencing such a benchmark.

In particular, the EU Benchmarks Regulation could have a material adverse impact on any Instruments linked to EURIBOR or another benchmark rate or index, notably if the methodology or other terms of the benchmark are changed in order to comply with the terms of the EU Benchmarks Regulation, and such changes could (amongst other things) have the effect of reducing or increasing the rate or level, or affecting the volatility of the published rate or level, of the benchmark. More broadly, any of the international, national or other proposals for reform, or the general increased regulatory scrutiny of benchmarks, could increase the costs and risks of administering or otherwise participating in the setting of a benchmark and complying with any such regulations or requirements. Such factors may have the effect of discouraging market participants from continuing to administer or contribute to certain reference rates or other types of rates and indices which are deemed "benchmarks" (each a "**Benchmark**" and together, the "**Benchmarks**"), trigger changes in the rules or methodologies used in certain Benchmarks or lead to the discontinuance or unavailability of quotes of certain Benchmarks.

As an example of such benchmark reforms, on 21 September 2017, the European Central Bank announced that it would be part of a new working group tasked with the identification and adoption of a "risk free overnight rate" which can serve as a basis for an alternative to current benchmarks used in a variety of financial instruments and contracts in the euro area. On 13 September 2018, the working group on Euro risk-free rates recommended the new Euro short-term rate ("**€STR**") as the new risk-free rate for the euro area. The €STR was published for the first time on 2 October 2019. Although EURIBOR has subsequently been reformed in order to comply with the terms of the Benchmark Regulation, it remains uncertain as to how long it will continue in its current form, or whether it will be further reformed or replaced with €STR or an alternative benchmark.

The elimination of EURIBOR or any other benchmark, or changes in the manner of administration of any benchmark, could require or result in an adjustment to the interest calculation provisions of the relevant Terms and Conditions (as further described in the relevant Terms and Conditions), or result in adverse consequences to Holders of any Instruments linked to such benchmark (including Floating Rate Instruments whose interest rates are linked to EURIBOR or any other such benchmark that is subject to reform). Furthermore, even prior to the implementation of any changes, uncertainty as to the nature of alternative reference rates and as to potential changes to such benchmark may adversely affect such benchmark during the term of the relevant Instruments, the return on the relevant Instruments and the trading market for securities (including the Instruments) based on the same benchmark.

The Terms and Conditions of Floating Rate Instruments provide for certain fallback arrangements in the event that a published benchmark (including any page on which such benchmark may be published (or any other successor service)) becomes unavailable or a Benchmark Event (as defined in the relevant Terms and Conditions) otherwise occurs. Such an event may be deemed to have occurred prior to the issue date for a Series of Instruments. Such fallback arrangements include the possibility that the rate of interest could be set by reference to a successor rate or an alternative rate and that such successor rate or alternative reference rate may be adjusted (if required) in accordance with the recommendation of a relevant governmental body or in order to reduce or eliminate, to the extent reasonably practicable in the circumstances, any economic prejudice or benefit (as applicable) to investors arising out of the replacement of the relevant benchmark, although the application of such adjustments to the Instruments may not achieve this objective. Any such changes may result in the Instruments performing differently (which may include payment of a lower interest rate) than if the original benchmark continued to apply. In certain circumstances

the ultimate fallback of interest for a particular Interest Period may result in the rate of interest for the last preceding Interest Period being used.

This may result in the effective application of a fixed rate for Floating Rate Instruments based on the rate which was last observed on the relevant screen page. In addition, due to the uncertainty concerning the availability of successor rates and alternative reference rates and the involvement of an Independent Adviser (as defined in the relevant Terms and Conditions) in certain circumstances, the relevant fallback provisions may not operate as intended at the relevant time.

Under the terms of the EU Benchmarks Regulation, the European Commission was also granted powers to designate a replacement for certain critical benchmarks contained in contracts governed by the laws of an EU Member State (such as the Instruments), where that contract does not already contain a suitable fallback. There can be no assurance, that the fallback provisions of the Instruments would be considered suitable. Accordingly, there is a risk that any Instruments linked or referencing a Benchmark would be transitioned to a replacement Benchmark selected by the European Commission. There is no certainty at this stage what any such replacement Benchmark would be.

Any such consequences could have a material adverse effect on the value of and return on any such Instruments.

Investors should consult their own independent advisers and make their own assessment about the potential risks arising from the possible cessation or reform of certain reference rates in making any investment decision with respect to any Instruments linked to or referencing a benchmark.

Risks in connection with usage of risk-free rates (including overnight rates) as reference rates for Floating Rate Instruments

The use of risk-free rates - including the Sterling Overnight Index Average ("**SONIA**"), the Secured Overnight Financing Rate ("**SOFR**") and the €STR - as reference rates for Eurobonds continues to develop. This relates not only to the substance of the calculation and the development and adoption of market infrastructure for the issuance and trading of bonds referencing such rates, but also how widely such rates and methodologies might be adopted.

The market or a significant part thereof may adopt an application of risk-free rates that differs significantly from that set out in the relevant Terms and Conditions and used in relation to Instruments that reference risk-free rates issued under this Programme. The Issuer may in the future also issue Instruments referencing SONIA, SOFR or €STR that differ materially in terms of interest determination when compared with any previous Instruments issued by it under this Programme. The development of risk-free rates for the Eurobond markets could result in reduced liquidity or increased volatility, or could otherwise affect the market price of any Instruments that reference a risk-free rate issued under this Programme from time to time.

In addition, the manner of adoption or application of risk-free rates in the Eurobond markets may differ materially compared with the application and adoption of risk-free rates in other markets, such as the derivatives and loan markets. Investors should carefully consider how any mismatch between the adoption of such reference rates in the bond, loan and derivatives markets may impact any hedging or other financial arrangements which they may put in place in connection with any acquisition, holding or disposal of Instruments referencing such risk-free rates.

In particular, investors should be aware that several different methodologies have been used in risk-free rate notes issued to date. No assurance can be given that any particular methodology, including the compounding formula in the terms and conditions of the Instruments, will gain widespread market acceptance. In addition, market participants and relevant working groups are still exploring alternative reference rates based on risk-free rates, including various ways to produce term versions of certain risk-free rates (which seek to measure the market's forward expectation of an average of these reference rates over a designated term, as they are overnight rates) or different measures of such risk-free rates. If the relevant risk-free rates do not prove to be widely used in securities like the Instruments, the trading price of such Instruments linked to such risk-free rates may be lower than those of instruments referencing indices that are more widely used.

Investors should consider these matters when making their investment decision with respect to any Instruments which reference SONIA, SOFR, €STR or any related indices.

Risks relating to the fact that risk-free rates may differ from EURIBOR, LIBOR and other inter-bank offered rates in a number of material respects

Risk-free rates may differ from the London Interbank Offered Rate ("**LIBOR**"), EURIBOR and other inter-bank offered rates in a number of material respects. These include (without limitation) being backwards-looking, in most cases, calculated on a compounded or weighted average basis, risk-free, overnight rates and, in the case of SOFR, secured, whereas such interbank offered rates are generally expressed on the basis of a forward-looking term, are unsecured and include a risk-element based on interbank lending. As such, investors should be aware that risk-free rates may behave materially differently to interbank offered rates as interest reference rates for the Instruments. Furthermore, SOFR is a secured rate that represents overnight secured funding transactions, and therefore will perform differently over time to an unsecured rate. For example, since publication of SOFR began on 3 April 2018, daily changes in SOFR have, on occasion, been more volatile than daily changes in comparable benchmarks or other market rates.

Risk-free rates offered as alternatives to interbank offered rates also have a limited history. For that reason, future performance of such rates may be difficult to predict based on their limited historical performance. The level of such rates during the term of the Instruments may bear little or no relation to historical levels. Prior observed patterns, if any, in the behaviour of market variables and their relation to such rates such as correlations, may change in the future. Investors should not rely on historical performance data as an indicator of the future performance of such risk-free rates nor should they rely on any hypothetical data.

Furthermore, interest on Instruments which reference a backwards-looking risk-free rate is only capable of being determined immediately prior to the relevant Interest Payment Date. It may be difficult for investors in Instruments which reference such risk-free rates reliably to estimate the amount of interest which will be payable on such Instruments, and some investors may be unable or unwilling to trade such Instruments without changes to their IT systems, both of which could adversely impact the liquidity of such Instruments. Further, in contrast to Instruments linked to interbank offered rates, if Instruments referencing backwards-looking rates are redeemed early on a date which is not an Interest Payment Date, the final rate of interest payable in respect of such Instruments shall be determined by reference to a shortened period ending immediately prior to the date on which the Instruments become due and payable or are scheduled for redemption.

The administrator of SONIA, SOFR or €STR or any related indices may make changes that could change the value of SONIA, SOFR or €STR or any related index, or discontinue SONIA, SOFR or €STR or any related index

The Bank of England, the Federal Reserve, Bank of New York or the European Central Bank (or their successors) as administrators of SONIA, SOFR or €STR, respectively, may make methodological or other changes that could change the value of these risk-free rates and/or indices, including changes related to the method by which such risk-free rate is calculated, eligibility criteria applicable to the transactions used to calculate SONIA, SOFR or €STR, or timing related to the publication of SONIA, SOFR or €STR or any related indices. In addition, the administrator may alter, discontinue or suspend calculation or dissemination of SONIA, SOFR or €STR or any related index (in which case a fallback method of determining the interest rate on the Instruments will apply). The administrator has no obligation to consider the interests of noteholders when calculating, adjusting, converting, revising or discontinuing any such risk-free rate.

9. Risks in relation to Green Bonds

Risks associated with a specific use of proceeds, such as in the case of Green Bonds

The Issuer may decide to use an amount equivalent to the net proceeds from any series of Instruments issued under this Programme for green or environmental purposes (each such series of Instruments (Notes or Pfandbriefe), a "**Green Bond**"). Further information on the envisaged use of proceeds can be found below under "*General Information – Use of Proceeds*" and in the relevant Final Terms of each Green Bond issued under this Programme.

Green Bonds may not be a suitable investment for all investors seeking exposure to green assets. Prospective investors who intend to invest in Green Bonds must determine for themselves the relevance of the information in this Prospectus (in particular, regarding the reasons for the offer and the use of proceeds) for the purpose of any investment in the Green Bonds together with any other investigation such investors deem necessary or appropriate. In particular, no assurance is given by the Issuer, the Arranger or the Dealers that the use of proceeds of the Green Bonds will meet or continue to meet on an ongoing basis, whether in whole or in part, any or all investor expectations or requirements regarding investment in "green bond", "green" or "sustainable" or similar labels.

At the EU level, Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 (the "**EU Taxonomy Regulation**"), which was published in the Official Journal of the European Union on 22 June 2020 and entered into force on 12 July 2020, defines six environmental objectives and establishes a framework to facilitate sustainable investments in the EU. The EU Taxonomy Regulation tasked the European Commission with establishing the actual list of environmentally sustainable activities by defining technical screening criteria for each environmental objective through delegated acts. The technical screening criteria for the activities which contribute to climate change adaptation and climate change mitigation have been in place since 1 January 2022. The technical screening criteria for the other environmental objectives, namely: sustainable use and protection of water and marine resources; transition to a circular economy; pollution prevention and control; and protection and restoration of biodiversity and ecosystems were adopted by Commission Delegated Regulation (EU) 2023/2486 of the European Parliament and of the Council of 27 June 2023, supplementing the EU Taxonomy Regulation.

On 30 November 2023, Regulation (EU) 2023/2631 on European Green Bonds and optional disclosures for bonds marketed as environmentally sustainable and for sustainability-linked bonds was published in the Official Journal of the European Union and will apply from 21 December 2024 (the "**EU Green Bond Regulation**"). The EU Green Bond Regulation introduces the "European Green Bond" or "EuGB" as a voluntary label for issuers of green use of proceeds bonds. In order to use the "European Green Bond" label, issuers have to invest the proceeds from the issuance of the relevant instrument in economic activities aligned with the EU Taxonomy Regulation (subject to a flexibility pocket). Issuers further need to comply with comprehensive process and disclosure requirements.

The Green Bonds issued under this Programme will not at any time be eligible for the Issuer to be entitled to use the designation of "European green bond" or "EuGB" nor is the Issuer under any obligation to take steps to have any Green Bonds become eligible for such designation. There can be no assurance that the Green Finance Framework, the use of an amount equivalent to the proceeds of the Instruments or the Eligible Assets will satisfy, whether in whole or in part, the relevant requirements of the Taxonomy Regulation, the EU Green Bond Regulation or any similar legislative or regulatory requirements, or any present and/or future investor expectations or requirements. Furthermore, there can be no assurance that any Eligible Asset will not be adversely impacted by environmental, social and/or other factors during the implementation thereof.

Due to the ongoing legislative initiatives, it should be noted that there is currently no clear definition (legal, regulatory or otherwise) of, nor market consensus as to what constitutes, a "green" or "sustainable" or an equivalently-labelled project or as to what precise attributes are required for a particular project to be defined as "green" or "sustainable" or such other equivalent label nor can any assurance be given that such a clear definition or consensus will develop over time.

No assurance is given by the Issuer, the Arranger or any of the Dealers that the use of proceeds will satisfy any present or future investment criteria or guidelines with which an investor is required, or intends, to comply, in particular with regard to any direct or indirect environmental or sustainability impact of any project or uses, the subject of or related to, the Green Finance Framework.

While it is the intention of the Issuer to use an amount equivalent to the net proceeds of such Green Bonds specifically for a portfolio of Eligible Assets, there can be no assurance that the relevant project(s) or use(s) (including those the subject of, or related to, any Eligible Assets) will be capable of being implemented in or substantially in such manner and/or in accordance with any timing schedule and that accordingly such proceeds will be totally or partially disbursed for such project(s) or use(s).

No representation or assurance is given by the Issuer, the Arranger, the Dealers or any other person as to the suitability or reliability of the Second Party Opinion or certification of any third party made available in connection with an issue of Instruments issued as Green Bonds.

The Second Party Opinion and any other such opinion or certification is not incorporated in, and does not form part of, this Prospectus. The Second Party Opinion and any other such opinion or certification provides an opinion on certain environmental and related considerations and is not intended to address any credit, market or other aspects of an investment in Green Bonds including without limitation market price, marketability, investor preference or suitability of any security. The Second Party Opinion and any other such opinion or certification is a statement of opinion, not a statement of fact. The Second Party Opinion and any other such opinion or certification is not a recommendation to buy, sell or hold Green Bonds. No assurance is given that the Second Party Opinion and any other such opinion or certification correctly assesses the potential environmental impact of the issue of Green Bonds or the Issuer generally. The Second Party Opinion and any other such opinion or certification generally is only current as of the date it is released and may be updated, suspended, replaced and/or withdrawn by the relevant provider(s) at any time.

As at the date of this Prospectus, the providers of such opinions and certifications are not subject to any specific regulatory or other regime or oversight. Prospective investors must determine for themselves the relevance of any such opinion and certification for the purpose of any investment in Green Bonds. In particular, no assurance or representation is made or given that the Second Party Opinion and any other such opinion or certification reflect any present or future requirements, investment criteria or guidelines which may apply to any investor or its investments. Holders of Green Bonds will have no recourse against the provider(s) of the Second Party Opinion and any other such opinion or certification.

Neither the Issuer, the Arranger, nor any of the Dealers is responsible for any third party assessment of the Green Bonds. Nor is the Arranger or any Dealer responsible for (i) any assessment of Green Bonds, or (ii) the monitoring of the use of proceeds. In the event that any of the Green Bonds are listed, admitted to trading or displayed on any dedicated "green", "environmental", "sustainable", "social" or other similarly labelled segment of any stock exchange or securities market (whether or not regulated), or are included or displayed in any dedicated "green", "environmental", "sustainable" or other equivalently-labelled index, no representation or assurance is given by the Issuer, the Arranger, any of the Dealers or any other person that such listing or admission, or inclusion or display in such index, satisfies, whether in whole or in part, any present or future investor expectations or requirements with respect to any investment criteria or guidelines with which such investor or its investments are required to comply, whether by any present or future applicable law or regulations or by its own by-laws or other governing rules or investment portfolio mandates. Furthermore, it should be noted that the criteria for any such listings or admission to trading or displays may vary from one stock exchange or securities market to another and also the criteria for inclusion in such index may vary from one index to another. No representation or assurance given or made by the Issuer, the Arranger, any of the Dealers or any other person that any such listing or admission to trading, or inclusion or display in any such index, will be obtained in respect of Green Bonds or, if obtained, that any such listing or admission to trading, or inclusion in such index, will be maintained throughout the entire term of any Green Bond.

Any failure to apply an amount equivalent to the net proceeds of Green Bonds as set out in this Prospectus and the Final Terms for an issue of Green Bonds and/or negative change to, or withdrawal or suspension of, the Second Party Opinion and any other such opinion or certification and/or listing, admission to trading or display on any stock exchange or securities market as aforesaid may have a material adverse effect on the value of Green Bonds and/or result in adverse consequences for certain investors with portfolio mandates to invest in green or sustainable securities (which consequences may include the need to sell the Green Bonds as a result of the Green Bonds not falling within the investor's investment criteria or mandate).

Any such event or failure by the Issuer to apply an amount equivalent to the net proceeds of any Green Bonds to Eligible Assets in accordance with the Green Finance Framework, or any failure of the Issuer to provide any reporting or obtain or maintain any opinion or certification in accordance with the Green Finance Framework, will not (i) constitute an event of default under the Green Bonds or a breach of or default under any term thereof, nor a default of the Issuer for any other purpose, (ii) give rise to any claim by a Holder against the Issuer, the Arranger or any Dealer, (iii) result in any right or obligation of the Issuer to redeem the Instruments or be a relevant factor for the Issuer in determining whether or not to exercise any optional redemption rights in respect of any Green Bonds, (iv) give any Holder of Instruments the right to require redemption of its Instruments or (v) affect the eligibility of the Instruments as own funds or MREL-eligible regulatory capital for the Issuer, as applicable (or, if different, such terminology as is employed to denote such concept by relevant resolution laws and regulations as applicable to the Issuer from time to time).

In particular, Holders of MREL-eligible Notes or Notes issued as Tier 2 Capital should note that, regardless of being a Green Bond, the underlying Eligible Assets of such Notes will not be segregated from the rest of the assets and that the capital issued under such Notes will be available to absorb losses incurred on not only the Eligible Assets but on all types of assets. MREL-eligible Notes will be subject to the bail-in tool and to write down and conversion powers and, in general, to the powers that may be exercised by the competent resolution authority, to the same extent and with the same ranking as any other MREL-eligible Notes which are not Green Bonds. As such, the net proceeds of any Green Bonds will be fully available to cover any and all losses arising on the balance sheet of the Issuer regardless of their "green", "sustainability linked", "social" or other similar label and of whether the losses stem from "green", "sustainability linked", "social" assets or other assets of the Issuer without any such label.

Risks stemming from the fact that Green Bonds are not linked to the performance of the relevant Eligible Assets

The performance of any Green Bonds is neither linked to the performance of the relevant Eligible Asset nor to the performance of the Issuer, the Group and/or certain legal entities within the Group in respect of any environmental or similar targets. Consequently, neither payments of principal and/or interest on the Green Bonds nor any rights of Holders depend on the performance of the relevant Eligible Assets or the performance of the Issuer, the Group and/or certain legal entities within the Group in respect of any such environmental or similar targets.

10. Risks related to the investment in the Instruments

Market Price Risk

The market value of the Instruments will be affected by the creditworthiness of the Issuer and a number of additional factors, including the market interest and yield rates and the time remaining to the Maturity Date.

Liquidity Risk

Instruments issued under the Programme will be new securities which may not be widely distributed and for which there is currently no active trading market. If the Instruments are traded after their initial issuance, they may trade at a discount to their initial offering price, depending upon prevailing interest rates, the market for similar securities, general economic conditions and the financial condition of the Issuer. Although application may be made for the Instruments issued under the Programme to be admitted to trading on the regulated market of the Luxembourg Stock Exchange which is a regulated market for the purposes of MiFID II, or other stock exchanges, there is no assurance that such applications will be accepted, that any particular Tranche of Instruments will be so admitted or that an active trading market will develop. Accordingly, there is no assurance as to the development or liquidity of any trading market for any particular Tranche of Instruments. Consequently, any investor in an Instrument must be prepared to hold the Instruments until the maturity date or final redemption of such Instruments.

Currency Risk

Prospective investors in the Instruments should be aware that an investment in the Instruments may involve exchange rate risks.

If an Instrument is denominated in a foreign currency, the Holder is exposed to the risk of changes in currency exchange rates which may affect the yield of such Instrument.

For example, a change in the value of any foreign currency against the euro will result in a corresponding change in the euro value of an Instrument denominated in a currency other than euro. If the underlying exchange rate falls and the value of the euro correspondingly rises, the price of the Instrument expressed in euro falls.

In addition, government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable currency exchange rate. As a result, investors may receive less interest or principal than expected, or no interest or principal.

General Risks in respect of Structured Instruments

In general, an investment in the Instruments by which the interest is determined by reference to one or more values of interest rates or other indices or formulae, either directly or inversely, may entail significant risks not associated with similar investments in a conventional debt security. Such risks include the risks that the Holder of such Instruments will receive no interest at all, or that the resulting interest rate will be less than that payable on a conventional debt security at the same time. In addition, investors should be aware that the market price of such Instruments may be very volatile (depending on the volatility of the relevant interest rate, index or formula).

Neither the current nor the historical value of the relevant interest rates or index or formulae should be taken as an indication of future performance of such interest rates or index or formulae during the term of any such Instruments.

No Events of Default provisions (other than senior notes which shall not qualify as MREL-eligible debt)

The Terms and Conditions of the Instruments (other than senior notes which shall not qualify as MREL-eligible debt) do not provide for any right of early redemption for the Holders upon the occurrence of an event of default. Accordingly, if the Issuer fails to meet any interest payment or other obligation under the Instruments (other than senior notes which shall not qualify as MREL-eligible debt), the Holders will have no right to accelerate repayment of the principal amount of the Instruments (other than senior notes which shall not qualify as MREL-eligible debt).

Credit Rating Risks

Independent credit rating agencies may assign a credit rating to the Instruments. The rating may not reflect the potential impact of all risk related to structure, market, additional factors discussed above, and other factors that may affect the value of the Instruments. A credit rating is not a recommendation to buy, sell or

hold securities and may be revised or withdrawn by the rating agency at any time. Any change or withdrawal of the credit rating assigned to the Issuer and/or the relevant Notes by one or more of the credit rating agencies may adversely affect the cost and terms and conditions of the Issuer's financings. In addition, in the event of a change, suspension or withdrawal of a credit rating, the price and the market value of the Notes may be affected. As a result, an investor may incur financial losses as he may only be able to sell the Notes at a lower price.

No default if payment is not effected due to any law or regulation

The Terms and Conditions of the Instruments provide that, to the extent legally permissible, the Issuer shall not be in default of its payment obligation under the Instruments if payment to the Paying Agent or the Clearing System is not effected due to any law or regulation provided that the Issuer cannot effect payment to the Paying Agent or the Clearing System by reasonable means. In such case, a termination of the Instruments pursuant to § 9(1)(a) of the terms and conditions shall not be possible to this extent and affected (only applies to senior notes which shall not qualify as MREL-eligible debt). Holders may receive payment only once payment to the Paying Agent or the Clearing System can be effected under such law or regulation.

11. Risks related to tax and legal matters

Taxation risk

Prospective investors and sellers of the Instruments should be aware that they may be required to pay taxes or other documentary charges or duties in accordance with the laws and practices of the country where the Instruments are transferred to or of other jurisdictions. In addition, prospective investors are advised to ask for their own tax adviser's advice on their individual taxation with respect to the acquisition, sale and redemption of the Instruments. Only these advisors are in a position to duly consider the specific situation of the prospective investor.

No Tax Gross-up

In the event of the imposition of a withholding or deduction by way of tax on payments of interest and / or principal under the Instruments, no additional amounts will be paid to the Holders so that Holders will receive payments net of such withholding or deduction.

Payments on certain Instruments may be subject to U.S. withholding tax under FATCA

The United States has enacted rules, commonly referred to as "FATCA", that generally impose a new reporting and withholding regime with respect to certain U.S. source payments (including dividends and interest), gross proceeds from the disposition of property that can produce U.S. source interest and dividends and certain payments made by entities that are classified as financial institutions under FATCA. The United States has entered into an intergovernmental agreement regarding the implementation of FATCA with Germany (the "**IGA**"). Under the IGA, as currently drafted, the Issuer does not expect payments made on or with respect to the Instruments to be subject to withholding under FATCA. However, significant aspects of when and how FATCA will apply remain unclear, and no assurance can be given that withholding under FATCA will not become relevant with respect to payments made on or with respect to the Instruments in the future. Prospective investors should consult their own tax advisors regarding the potential impact of FATCA.

Legality of Purchase

Prospective investors of the Instruments should be aware that the lawfulness of the acquisition of the Notes might be subject to legal restrictions potentially affecting the validity of the purchase. Neither the Issuer, the Dealers nor any of their respective affiliates has or assumes responsibility for the lawfulness of the acquisition of the Instruments by a prospective investor in the Instruments, whether under the laws of the jurisdiction of its incorporation or the jurisdiction in which it operates (if different). A prospective investor may not rely on the Issuer, the Dealers or any of their respective affiliates in connection with its determination as to the legality of its acquisition of the Instruments.

Risks in relation to regulatory measures according to § 3 KWG

§ 3 KWG provides that banks – even without the occurrence of a resolution or restructuring event – when reaching certain thresholds are required either to cease certain commercial, loan or guarantee transactions that are deemed to be risky by the German legislator or to assign it to a legally and financially independent financial institution that is a separate, stand-alone legal entity. In addition, since 1 July 2016 the competent authority can prohibit institution-specifically the carrying out of further types of activities in order to avoid risks.

Holders' claims could potentially be adversely affected by the implementation of the measures stipulated in § 3 KWG, in particular, if certain businesses are prohibited or transferred to a separate legal entity. The claims of a Holder might, in the latter case, remain with the Issuer, but the Issuer's assets, business activities and/or creditworthiness may not be identical compared to the situation prior to the transfer order (*Übertragungsanordnung*) being issued. It cannot be excluded that the legal separation of certain trading activities of the Issuer may have negative effects on the business model and/or the profitability of the Issuer, which may in turn affect the Issuer's capability to fulfil its obligations under the Notes *vis-à-vis* the Holders.

Risks in connection with the application of the German Act on Issues of Debt Securities (*Gesetz über Schuldverschreibungen aus Gesamtemissionen***)**

If the relevant provisions are specified in the Final Terms to apply to a certain Tranche of Notes, a Holder is subject to the risk of being outvoted and to lose rights against the Issuer against his will in the case that other Holders agree pursuant to the Conditions to amendments of the Conditions by majority vote according to the German Act on Issues of Debt Securities (*Gesetz über Schuldverschreibungen aus Gesamtemissionen*). In the case of an appointment of a noteholders' representative (*gemeinsamer Vertreter*) for all Holders a particular Holder may lose, in whole or in part, the possibility to enforce and claim his rights against the Issuer regardless of other Holders.

Additional Risk Factors relating to Pfandbriefe

The value of the Pfandbriefe and the assets of the cover pool depend on a number of interrelating factors, including economic, financial and political events in Germany or elsewhere, including factors affecting capital markets generally and the stock exchanges on which the Pfandbriefe are traded. The price at which a Holder will be able to sell the Pfandbriefe prior to maturity may be at a discount, which could be substantial, from the issue price or the purchase price paid by such purchaser.

In case of an insolvency of the Issuer, the Holders of the Pfandbriefe have preferential access to the proceeds from the liquidation of the cover pool assets. Irrespective of the legal requirements under the Pfandbrief Act in connection with the maintenance of a cover pool, it cannot be completely outruled that the cover pool will be insufficient to satisfy all outstanding claims of the Holders. If and to the extent the respective cover pool is not sufficient to fulfil all outstanding payment claims in relation to the Pfandbriefe, the Holders will have a claim against the insolvency estate. However, such claim is likely to result in a loss of the Holders as the insolvency estate may not suffice to cover completely all relevant creditors having claims against the insolvency estate.

Further, from 1 July 2021 in relation to any outstanding Pfandbriefe there is also the risk of a maturity deferral (*Fälligkeitsverschiebung*) effected by a Cover Pool Administrator as described in more detail above in "Risks relating to changes in the legal framework on covered bonds".

- The Final Terms shall be completed as set out therein. The Final Terms shall determine which of Option I, Option II, Option III, Option IV, Option V; Option VI or Option VII including certain further options contained therein, respectively, shall be applicable to the individual issue of Instruments by replicating the relevant provisions and completing the relevant placeholders of the relevant set of Terms and Conditions as set out in the Prospectus in the Final Terms. The replicated and completed provisions of the set of Terms and Conditions shall constitute the Conditions, which will be attached to each global note representing the Instruments of the relevant Tranche.

- Alternatively, the Final Terms shall determine which of Option I, Option II, Option III, Option IV, Option V; Option VI or Option VII and of the respective further options contained in each of Option I, Option II, Option III, Option IV, Option V; Option VI or Option VII are applicable to the individual issue by only referring to the specific sections of the relevant set of Terms and Conditions as set out in the Prospectus. Each of the sets of Terms and Conditions may contain also certain further options (characterised by indicating the optional provision through instructions and explanatory notes set out either on the left of or in the square brackets within the text of the relevant set of Terms and Conditions as set out in the Prospectus) as well as placeholders (characterised by square brackets which include the relevant items) which will be determined by the Final Terms as follows:

Determination of Options

The Issuer will determine which options will be applicable to the individual issue either by replicating the relevant provisions in the Final Terms or by reference in the Final Terms to the sections of the relevant set of Terms and Conditions as set out in the Prospectus. If the Final Terms do not replicate or refer to an alternative or optional provision it shall be deemed to be deleted from the Conditions.

(d) the Issuer irrevocably and unconditionally guarantees in favour of each Holder the payment of all sums payable by the Substitute Debtor in respect of the Notes as set out in the Conditions of the Notes;

(e) there shall have been delivered to the Fiscal Agent one opinion for each jurisdiction affected of lawyers of recognized standing to the effect that paragraphs (a), (b), (c) and (d) above have been satisfied;

(f) the applicability of Resolution Measures described in § 2 is ensured; and

In § 7 an alternative reference to the Federal Republic of Germany shall be deemed to have been included in addition to the reference according to the preceding sentence to the country of domicile or residence for taxation purposes of the Substituted Debtor.

(4) *Rechtsnachfolge.* Im Fall einer Ersetzung folgt die Nachfolgeschuldnerin der Emittentin als Rechtsnachfolgerin nach, ersetzt diese und darf alle Rechte und Befugnisse der Emittentin aus den Schuldverschreibungen mit der gleichen Wirkung geltend machen, als wenn die Nachfolgeschuldnerin in diesen Bedingungen als Emittentin genannt worden wäre, und die Emittentin (bzw. die Gesellschaft, die zuvor die Verpflichtungen der Emittentin übernommen hat) wird von ihren Verpflichtungen als Schuldnerin aus den Schuldverschreibungen befreit.

(4) *Legal Succession.* In the event of any such substitution, the Substituted Debtor shall succeed to, and be substituted for, and may exercise every right and power of, the Issuer under the Notes with the same effect as if the Substituted Debtor had been named as the Issuer herein, and the Issuer (or any corporation which shall have previously assumed the obligations of the Issuer) shall be released from its liability as obligor under the Notes.

(2) *Purchases.* The Issuer may at any time purchase in the open market or otherwise and at any price. Any such notice so given will be deemed to have been validly given on the day of its publication (or, if published more than once, on the day of the first such publication). To the extent the rules of the Luxembourg Stock Exchange so permit, the Issuer may deliver the relevant notice in accordance with § **[**11**][**12**]**(2) instead of publication pursuant § **[**11**][**12**]**(1).

(2) *Notification to Clearing System.* The Issuer may, in lieu of the publication set forth in paragraph (1) above, deliver the relevant notice to the Clearing System, for communication by the Clearing System to the Holder, provided that the rules of the stock exchange on which the Notes are listed permit such form of notice. Any such notice shall be deemed to have been given to the Holders on the seventh day after the day on which the said notice was given to the Clearing System.

Hierbei können die Gläubiger durch Beschluss der in Absatz 2 genannten Mehrheit insbesondere Änderungen zustimmen, welche den Charakter der Bedingungen wesentlich verändern, einschließlich der in § 5 Absatz 3 SchVG genannten Maßnahmen, aber mit Ausnahme der Ersetzung der Emittentin, welche ausschließlich den Bestimmungen von § **[**9**][**10**]** unterliegt. Ein rechtmäßig gefasster Mehrheitsbeschluss ist für alle Gläubiger verbindlich.

Diese Möglichkeit zur Änderung der Bedingungen besteht nur soweit, wie die zuständige Behörde der Änderung – sofern gesetzlich erforderlich – zugestimmt hat.

(3) *Abstimmung ohne Versammlung.* Beschlüsse der Gläubiger können ausschließlich im Wege der Abstimmung ohne Versammlung gefasst werden, wie sie in § 18 SchVG vorgesehen ist. Gläubiger, die insgesamt 5 % des ausstehenden Nennbetrages der Schuldverschreibungen halten, können schriftlich das Abhalten einer Abstimmung ohne Versammlung verlangen, § 9 in Verbindung mit § 18 SchVG. Die Abstimmung wird von einem Notar geleitet, der von der Emittentin bestimmt wird oder, wenn der gemeinsame Vertreter, wie nachfolgend definiert, die Abstimmung anberaumt hat, vom gemeinsamen Vertreter. In particular, the Holders may consent to amendments which materially change the substance of the Conditions, including such measures as provided for under § 5 paragraph (3) SchVG, but excluding a substitution of the Issuer, which is exclusively subject to the provisions in § **[**9**][**10**]**, by resolutions passed by such majority of the votes of the Holders. A duly passed majority resolution shall be binding upon all Holders.

These amendments to the Conditions are subject to the prior approval of the competent authority, if legally required.

(2) *Majority*. Except as provided by the following sentence and provided that the quorum requirements are being met, the Holders may pass resolutions by simple majority of the voting rights participating in the vote. Resolutions which materially change the substance of the Conditions, in particular in the cases of § 5(3) numbers 1 through 9 SchVG, may only be passed by a majority of at least **[**75**][*other percentage*]** per cent. of the voting rights participating in the vote (a "**Qualified Majority**").

(3) *Vote without a Meeting*. Resolutions of the Holders shall exclusively be made by means of a vote without a meeting (*Abstimmung ohne Versammlung*) in accordance with § 18 SchVG. Holders holding Notes in the total amount of 5 per cent. of the outstanding principal amount of the Notes may request, in writing, the holding of a vote without a meeting pursuant to § 9 in connection with § 18 SchVG. The vote will be chaired by a notary appointed by the Issuer or, if the Holders' Representative (as defined below) has convened the vote, by the Holders' Representative. The request for voting as submitted by the chairman (*Abstimmungsleiter*) will provide for the further details relating to the resolutions and the voting procedure. The subject matter of the vote as

ÄNDERUNG DER BEDINGUNGEN DURCH BESCHLUSS DER GLÄUBIGER; GEMEINSAMER VERTRETER

[§ [12][13]
AMENDMENTS TO THE CONDITIONS BY RESOLUTION OF THE HOLDERS; JOINT REPRESENTATIVE

(1) *Änderung der Bedingungen.* Die Emittentin kann gemäß §§ 5 ff. des Gesetzes über Schuldverschreibungen aus Gesamtemissionen (Schuldverschreibungsgesetz, "**SchVG**") in seiner jeweils geltenden Fassung mit den Gläubigern Änderungen an den Bedingungen vereinbaren, wenn die Gläubiger einen entsprechenden Beschluss gefasst haben. Hierbei können die Gläubiger durch Beschluss der in Absatz 2 genannten Mehrheit insbesondere Änderungen zustimmen, welche den Charakter der Bedingungen wesentlich verändern, einschließlich der in § 5 Absatz 3 SchVG genannten Maßnahmen, aber mit Ausnahme der Ersetzung der Emittentin, welche ausschließlich den Bestimmungen von § **[**9**][**10**]** unterliegt. Ein rechtmäßig gefasster Mehrheitsbeschluss ist für alle Gläubiger verbindlich.

(1) *Amendment of the Conditions*. The Issuer may agree with the Holders on amendments to the Conditions by virtue of a majority resolution of the Holders pursuant to §§ 5 *et seqq.* of the German Act on Issues of Debt Securities (*Gesetz über Schuldverschreibungen aus Gesamtemissionen*, "**SchVG**"), as amended from time to time. In particular, the Holders may consent to amendments which materially change the substance of the Conditions, including such measures as provided for under § 5 paragraph 3 SchVG, but excluding a substitution of the Issuer, which is exclusively subject to the provisions in § **[**9**][**10**]**, by resolutions passed by such majority of the votes of the Holders. A duly passed majority resolution shall be binding upon all Holders.

Diese Möglichkeit zur Änderung der Bedingungen besteht nur soweit, wie die zuständige Behörde der Änderung – sofern gesetzlich erforderlich – zugestimmt hat.

These amendments to the Conditions are subject to the prior approval of the competent authority, if legally required.

(2) *Mehrheitserfordernisse.* Vorbehaltlich der Bestimmungen des folgenden Satzes und vorausgesetzt, die Anforderungen an das Quorum sind erfüllt, können die Gläubiger Beschlüsse mit einfacher Mehrheit der abgegebenen Stimmen fassen. Beschlüsse, welche den Charakter der Bedingungen wesentlich verändern, insbesondere in den Fällen des § 5 Absatz 3 Nr. 1 bis 9 SchVG, bedürfen der qualifizierten Mehrheit von mindestens **[**75**][*anderer Prozentsatz*]** % der abgegebenen Stimmen (die "**Qualifizierte Mehrheit**").

(2) *Majority*. Except as provided by the following sentence and provided that the quorum requirements are being met, the Holders may pass resolutions by simple majority of the voting rights participating in the vote. Resolutions which materially change the substance of the Conditions, in particular in the cases of § 5 paragraph (3) numbers 1 through 9 SchVG, may only be passed by a majority of at least **[**75**][*other percentage*]** per cent. of the voting rights participating in the vote (a "**Qualified Majority**").

(3) *Abstimmung ohne Versammlung.* Beschlüsse der Gläubiger können ausschließlich im Wege der Abstimmung ohne Versammlung gefasst werden, wie sie in § 18 SchVG vorgesehen ist. Gläubiger, die insgesamt 5 % des ausstehenden Nennbetrages der Schuldverschreibungen halten, können schriftlich das Abhalten einer Abstimmung ohne Versammlung verlangen, § 9 in Verbindung mit § 18 SchVG. Die Abstimmung wird von einem Notar geleitet, der von der Emittentin bestimmt wird oder, wenn der gemeinsame Vertreter (wie nachfolgend definiert) die Abstimmung anberaumt hat, vom gemeinsamen Vertreter. Die Aufforderung zur Stimmabgabe durch den Abstimmungsleiter enthält weitere Ausführungen hinsichtlich der zu fassenden Beschlüsse und der Abstimmungsmodalitäten. Der Gegenstand der Abstimmung sowie die vorgeschlagenen Beschlüsse werden den Gläubigern zusammen mit der Aufforderung zur Stimmabgabe bekannt gegeben.

(3) *Vote without a Meeting*. Resolutions of the Holders shall exclusively be made by means of a vote without a meeting (*Abstimmung ohne Versammlung*) in accordance with § 18 SchVG. Holders holding Notes in the total amount of 5 per cent. of the outstanding principal amount of the Notes may request, in writing, the holding of a vote without a meeting pursuant to § 9 in connection with § 18 SchVG. The vote will be chaired by a notary appointed by the Issuer or, if the Holders' Representative (as defined below) has convened the vote, by the Holders' Representative. The request for voting as submitted by the chairman (*Abstimmungsleiter*) will provide for the further details relating to the resolutions and the voting procedure. The subject matter of the vote as well as the proposed resolutions shall be notified to Holders together with the request for voting.

(4) *Stimmrecht.* Gläubiger müssen den Nachweis ihrer Berechtigung zur Teilnahme an der Abstimmung zum Zeitpunkt der Stimmabgabe durch eine Bescheinigung der Depotbank, wie in § **[**12**][**13**][**14**]** Absatz 2 geregelt und die Vorlage einer Sperranweisung der depotführenden Bank zugunsten der Zahlstelle als Hinterlegungsstelle für den Zeitraum der Stimmabgabe nachweisen.

(4) *Voting Rights.* Holders must demonstrate their eligibility to participate in the vote at the time of voting by means of a special confirmation of the Depositary Bank in accordance with § **[**12**][**13**][**14**]**(2) hereof and by submission of a blocking instruction by the Depositary Bank for the benefit of the Paying Agent as depository (*Hinterlegungsstelle*) for the voting period.

(5) *Gemeinsamer Vertreter.* Der gemeinsame Vertreter (der "**Gemeinsame Vertreter**") ist **[*Name und Anschrift des Gemeinsamen Vertreters*]**. Der Gemeinsame Vertreter hat die Pflichten und Verantwortlichkeiten und Rechte, die ihm von Gesetzes wegen zustehen. Die Haftung des Gemeinsamen Vertreters ist auf den zehnfachen Betrag seiner jährlichen Vergütung begrenzt, es sei denn, der Gemeinsame Vertreter hat vorsätzlich oder grob fahrlässig gehandelt. Die Vorschriften des SchVG gelten im Hinblick auf die Abberufung des Gemeinsamen Vertreters und die sonstigen Rechte und Pflichten des Gemeinsamen Vertreters.

(5) *Holders' Representative*. The joint representative (the "**Holders' Representative**") shall be **[*name and address of Holders' Representative*]**. The Holders' Representative shall have the duties and responsibilities and powers provided for by law. (f) the applicability of Resolution Measures described in § 2 is ensured; and

(g) eine Zustimmung der hierfür zuständigen Behörde zur Ersetzung vorliegt, sofern gesetzlich erforderlich.

(g) the substitution has been approved by the competent authority, if legally required.

In § 7 an alternative reference to the Federal Republic of Germany shall be deemed to have been included in addition to the reference according to the preceding sentence to the country of domicile or residence for taxation purposes of the Substituted Debtor.

(4) *Rechtsnachfolge.* Im Fall einer Ersetzung folgt die Nachfolgeschuldnerin der Emittentin als Rechtsnachfolgerin nach, ersetzt diese und darf alle Rechte und Befugnisse der Emittentin aus den Schuldverschreibungen mit der gleichen Wirkung geltend machen, als wenn die Nachfolgeschuldnerin in diesen Bedingungen als Emittentin genannt worden wäre, und die Emittentin (bzw. die Gesellschaft, die zuvor die Verpflichtungen der Emittentin übernommen hat) wird von ihren Verpflichtungen als Schuldnerin aus den Schuldverschreibungen befreit.

(4) *Legal Succession.* In the event of any such substitution, the Substituted Debtor shall succeed to, and be substituted for, and may exercise every right and power of, the Issuer under the Notes with the same effect as if the Substituted Debtor had been named as the Issuer herein, and the Issuer (or any corporation which shall have previously assumed the obligations of the Issuer) shall be released from its liability as obligor under the Notes.

(1) *Änderung der Bedingungen.* Die Emittentin kann gemäß §§ 5 ff. des Gesetzes über Schuldverschreibungen aus Gesamtemissionen (Schuldverschreibungsgesetz, "**SchVG**") in seiner jeweils geltenden Fassung mit den Gläubigern Änderungen an den Bedingungen vereinbaren, wenn die Gläubiger einen entsprechenden Beschluss gefasst haben. Hierbei können die Gläubiger durch Beschluss der in Absatz 2 genannten Mehrheit insbesondere Änderungen zustimmen, welche den Charakter der Bedingungen wesentlich verändern, einschließlich der in § 5 Absatz 3 SchVG genannten Maßnahmen, aber mit Ausnahme der Ersetzung der Emittentin, welche ausschließlich den Bestimmungen von § **[**9**][**10**]** unterliegt. Ein rechtmäßig gefasster Mehrheitsbeschluss ist für alle Gläubiger verbindlich.

(1) *Amendment of the Conditions*. The Issuer may agree with the Holders on amendments to the Conditions by virtue of a majority resolution of the Holders pursuant to §§ 5 *et seqq.* of the German Act on Issues of Debt Securities (*Gesetz über Schuldverschreibungen aus Gesamtemissionen*, "**SchVG**"), as amended from time to time. In particular, the Holders may consent to amendments which materially change the substance of the Conditions, including such measures as provided for under § 5(3) SchVG, but excluding a substitution of the Issuer, which is exclusively subject to the provisions in § **[**9**][**10**]**, by resolutions passed by such majority of the votes of the Holders. A duly passed majority resolution shall be binding upon all Holders.

Diese Möglichkeit zur Änderung der Bedingungen besteht nur soweit, wie die zuständige Behörde der Änderung – sofern gesetzlich erforderlich – zugestimmt hat.

These amendments to the Conditions are subject to the prior approval of the competent authority, if legally required.

(3) *Abstimmung ohne Versammlung.* Beschlüsse der Gläubiger können ausschließlich im Wege der Abstimmung ohne Versammlung gefasst werden, wie sie in § 18 SchVG vorgesehen ist. Gläubiger, die insgesamt 5 % des ausstehenden Nennbetrages der Schuldverschreibungen halten, können schriftlich das Abhalten einer Abstimmung ohne Versammlung verlangen, § 9 in Verbindung mit § 18 SchVG. Die Abstimmung wird von einem Notar geleitet, der von der Emittentin bestimmt wird oder, wenn der gemeinsame Vertreter, wie nachfolgend definiert, die Abstimmung anberaumt hat, vom gemeinsamen Vertreter. Die Aufforderung zur Stimmabgabe durch den Abstimmungsleiter enthält weitere Ausführungen hinsichtlich der zu fassenden Beschlüsse und der Abstimmungsmodalitäten. Der Gegenstand der Abstimmung sowie die vorgeschlagenen Beschlüsse werden den Gläubigern zusammen mit der Aufforderung zur Stimmabgabe bekannt gegeben.

(3) *Vote without a Meeting*. Resolutions of the Holders shall exclusively be made by means of a vote without a meeting (*Abstimmung ohne Versammlung*) in accordance with § 18 SchVG. Holders holding Notes in the total amount of 5 per cent. of the outstanding principal amount of the Notes may request, in writing, the holding of a vote without a meeting pursuant to § 9 in connection with § 18 SchVG. The vote will be chaired by a notary appointed by the Issuer or, if the Holders' Representative (as defined below) has convened the vote, by the Holders' Representative. The request for voting as submitted by the chairman (*Abstimmungsleiter*) will provide for the further details relating to the resolutions and the voting procedure. The subject matter of the vote as well as the proposed resolutions shall be notified to Holders together with the request for voting.

(4) *Stimmrecht.* Gläubiger müssen den Nachweis ihrer Berechtigung zur Teilnahme an der Abstimmung zum Zeitpunkt der Stimmabgabe durch eine Bescheinigung der Depotbank, wie in § **[**12**][**13**][**14**]** Absatz 2 geregelt und die Vorlage einer Sperranweisung der depotführenden Bank zugunsten der Zahlstelle als Hinterlegungsstelle für den Zeitraum der Stimmabgabe nachweisen.

(4) *Voting Rights.* Holders must demonstrate their eligibility to participate in the vote at the time of voting by means of a special confirmation of the Depositary Bank in accordance with § **[**12**][**13**][**14**]**(2) hereof and by submission of a blocking instruction by the Depositary Bank for the benefit of the Paying Agent as depository (*Hinterlegungsstelle*) for the voting period.

(5) *Gemeinsamer Vertreter.* Die Gläubiger können durch Mehrheitsbeschluss einen gemeinsamen Vertreter (der "**Gemeinsame Vertreter**") bestellen oder abberufen, die Pflichten, Verantwortlichkeiten und Rechte eines solchen Gemeinsamen Vertreters festlegen, die Übertragung der Rechte der Gläubiger auf den Gemeinsamen Vertreter sowie die Haftungsbegrenzung des Gemeinsamen Vertreters bestimmen. Die Bestellung eines Gemeinsamen Vertreters bedarf einer Qualifizierten Mehrheit, wenn der Gemeinsame Vertreter in Übereinstimmung mit § **[**12**][**13**]** Absatz 2 autorisiert ist, einer wesentlichen Änderung des Charakters der Bedingungen zuzustimmen.

Der Nachfolge-Referenzsatz, ein Zinsanpassungsfaktor oder ein Bruch oder eine Spanne (sofern zutreffend) und die Bedingungen der Änderungen des Referenzzinssatzes sind in der Form des Nachweises (mit Ausnahme von offensichtlichen Fehlern oder Bösgläubigkeit bei der Festlegung des Nachfolge-Referenzsatzes, eines entsprechenden Zinsanpassungsfaktors oder Bruchs oder einer Spanne (sofern zutreffend) oder der Beschreibung der Bedingungen der Änderungen des Referenzzinssatzes) bindend für die Emittentin, die Emissionsstelle, die Berechnungsstelle, – soweit vorhanden – die weitere(n) Zahlstelle(n) und die Gläubiger.

(c) Vorbehaltlich der Verpflichtungen der Emittentin gemäß § 3.2 Absatz **[**5**][**6**][**7**]**(a) und (b) bleiben der **[**€STR**][**SONIA**][**SOFR**]** und die Rückfallregelungen gemäß § 3.2 Absatz 2 bis zum Eintritt eines Benchmark Ereignisses anwendbar. The Successor Reference Rate and the relevant interest adjustment factor or fraction or spread (if any) and the description of the relevant amendments regarding the change of the reference interest rate specified in such certificate will (in the absence of manifest error or bad faith in the determination of such Successor Reference Rate and such interest adjustment factor or fraction or spread (if any) and description of such amendments regarding the change of the reference interest rate) be binding on the Issuer, the Fiscal Agent, the Calculation Agent, the Paying Agent(s) (if any) and the Holders.

(c) Without prejudice to the obligations of the Issuer under § 3.2(**[**5**][**6**][**7**]**)(a) and (b), the **[**€STR**][**SONIA**][**SOFR**]** and the fallback provisions provided for in § 3.2(2) will continue to apply unless and until a Benchmark Event has occurred. AMENDMENTS TO THE CONDITIONS BY RESOLUTION OF THE HOLDERS; JOINT REPRESENTATIVE

(1) *Amendment of the Conditions*. The Issuer may agree with the Holders on amendments to the Conditions by virtue of a majority resolution of the Holders pursuant to §§ 5 *et seqq.* of the German Act on Issues of Debt Securities (*Gesetz über Schuldverschreibungen aus Gesamtemissionen*, "**SchVG**"), as amended from time to time. In particular, the Holders may consent to amendments which materially change the substance of the Conditions, including such measures as provided for under § 5 (3) SchVG, but excluding a substitution of the Issuer, which is exclusively subject to the provisions in § **[**9**][**10**]**, by resolutions passed by such majority of the votes of the Holders. A duly passed majority resolution shall be binding upon all Holders.

These amendments to the Conditions are subject to the prior approval of the competent authority, if legally required.

(2) *Mehrheitserfordernisse.* Vorbehaltlich der Bestimmungen des folgenden Satzes und vorausgesetzt, die Anforderungen an das Quorum sind erfüllt, können die Gläubiger Beschlüsse mit einfacher Mehrheit der abgegebenen Stimmen fassen. Beschlüsse, welche den Charakter der Bedingungen wesentlich verändern, insbesondere in den Fällen des § 5 Absatz 3 Nr. 1 bis 9 SchVG, bedürfen der qualifizierten Mehrheit von mindestens **[**75**][*anderer Prozentsatz*]** % der abgegebenen Stimmen (die "**Qualifizierte Mehrheit**").

(2) *Majority*. Except as provided by the following sentence and provided that the quorum requirements are being met, the Holders may pass resolutions by simple majority of the voting rights participating in the vote. Resolutions which materially change the substance of the Conditions, in particular in the cases of § 5(3) numbers 1 through 9 SchVG, may only be passed by a majority of at least **[**75**][*other percentage*]** per cent. of the voting rights participating in the vote (a "**Qualified Majority**").

(3) *Abstimmung ohne Versammlung.* Beschlüsse der Gläubiger können ausschließlich im Wege der Abstimmung ohne Versammlung gefasst werden, wie sie in § 18 SchVG vorgesehen ist. Gläubiger, die insgesamt 5 % des ausstehenden Nennbetrages der Schuldverschreibungen halten, können schriftlich das Abhalten einer Abstimmung ohne Versammlung verlangen, § 9 in Verbindung mit § 18 SchVG. Die Abstimmung wird von einem Notar geleitet, der von der Emittentin bestimmt wird oder, wenn der gemeinsame Vertreter, wie nachfolgend definiert, die Abstimmung anberaumt hat, vom gemeinsamen Vertreter. Die Aufforderung zur Stimmabgabe durch den Abstimmungsleiter enthält weitere Ausführungen hinsichtlich der zu fassenden Beschlüsse und der Abstimmungsmodalitäten. Der Gegenstand der Abstimmung sowie die vorgeschlagenen Beschlüsse werden den Gläubigern zusammen mit der Aufforderung zur Stimmabgabe bekannt gegeben.

(3) *Vote without a Meeting*. Resolutions of the Holders shall exclusively be made by means of a vote without a meeting (*Abstimmung ohne Versammlung*) in accordance with § 18 SchVG. Holders holding Notes in the total amount of 5 per cent. of the outstanding principal amount of the Notes may request, in writing, the holding of a vote without a meeting pursuant to § 9 in connection with § 18 SchVG. The vote will be chaired by a notary appointed by the Issuer or, if the Holders' Representative (as defined below) has convened the vote, by the Holders' Representative. The request for voting as submitted by the chairman (*Abstimmungsleiter*) will provide for the further details relating to the resolutions and the voting procedure. The subject matter of the vote as well as the proposed resolutions shall be notified to Holders together with the request for voting.

(4) *Stimmrecht.* Gläubiger müssen den Nachweis ihrer Berechtigung zur Teilnahme an der Abstimmung zum Zeitpunkt der Stimmabgabe durch eine Bescheinigung der Depotbank, wie in § **[**12**][**13**][**14**]** Absatz 2 geregelt und die Vorlage einer Sperranweisung der depotführenden Bank zugunsten der Zahlstelle als Hinterlegungsstelle für den Zeitraum der Stimmabgabe nachweisen.

Die Bestellung eines Gemeinsamen Vertreters bedarf einer Qualifizierten Mehrheit, wenn der Gemeinsame Vertreter in Übereinstimmung mit § **[**12**][**13**]** Absatz 2 autorisiert ist, einer wesentlichen Änderung des Charakters der Bedingungen zuzustimmen.

(5) *Holders' Representative*. The Holders may by majority resolution provide for the designation or dismissal of a joint representative (the "**Holders' Representative**"), the duties and responsibilities and the powers of such Holders' Representative, the transfer of the rights of the Holders to the Holders' Representative and a limitation of liability of the Holders' Representative. Designation of a Holders' Representative may only be passed by a Qualified Majority if such Holders' Representative is to be authorised to consent, in accordance with § **[**12**][**13**]**(2) hereof, to a material change in the substance of the Conditions.

STATUS

(1) *Status of the Notes*. The obligations under the Notes constitute unsecured and subordinated obligations of the Issuer, ranking *pari passu* among themselves and subject to applicable law or the terms of any such other obligations *pari passu* with all other equally subordinated obligations of the Issuer. In the event of resolution measures imposed on the Issuer and in the event of the dissolution, liquidation, insolvency, composition proceedings or other proceedings for the avoidance of insolvency of, or against, the Issuer, the obligations under the Notes shall be fully subordinated (i) to the claims of other unsubordinated creditors of the Issuer and, as long as the Notes qualify as own funds (within the meaning of the Regulation (EU) No 575/2013 of the European Parliament and of the Council on prudential requirements for credit institutions and investment firms of 26 June 2013, as amended (the "**CRR**")), (ii) to the statutorily subordinated claims specified in § 39(1) nos. 1 to 5 of the German Insolvency Code (*Insolvenzordnung*) (iii) to the claims of all contractually subordinated creditors of the Issuer within the meaning of § 46f(7a) sentence 3 of the German Banking Act (*Kreditwesengesetz*, "**KWG**"), so that in any such event no amounts shall be payable in respect of the Notes until the claims of all unsubordinated and contractually subordinated creditors of the Issuer in

Kein Gläubiger der Schuldverschreibungen ist berechtigt, mit Ansprüchen aus den Schuldverschreibungen gegen Ansprüche der Emittentin aufzurechnen. Unter Beachtung dieser Nachrangregelung bleibt es der Emittentin unbenommen, ihre Verbindlichkeiten aus den Schuldverschreibungen auch aus dem sonstigen freien Vermögen zu bedienen. Den Gläubigern wird für ihre Rechte aus den Schuldverschreibungen weder durch die Emittentin noch durch Dritte irgendeine Sicherheit oder Garantie gestellt; eine solche Sicherheit oder Garantie wird auch zu keinem späteren Zeitpunkt gestellt werden.

If

(i) it is not possible for the Issuer making reasonable efforts to appoint an Independent Adviser; or

(ii) the Independent Adviser appointed by it fails to determine a Successor Rate or, failing which, an Alternative Rate in accordance with this § 3.2(**[**5**][**6**][**7**]**) five Business Days prior to the immediately following Floating Interest Determination Date,

the **[**Relevant Affected**]** Reference Rate applicable to the immediately following Floating Interest Period shall be the **[**Relevant Affected**]** Reference Rate applicable as at the last preceding Floating Interest Determination Date. If there has not been a first Floating Interest Payment Date, the **[**Relevant Affected**]** Reference Rate shall be the Reference Rate applicable to the first Floating Interest Period. The option of an Early Redemption by the Issuer pursuant to § 3.2(**[**5**][**6**][**7**]**)(h) shall remain unaffected hereby.

Any adjustment pursuant to this § 3.2(**[**5**][**6**][**7**]**) shall apply to the immediately following Floating Interest Periods. Any subsequent Floating Interest Period may be subject to the subsequent operation of this § 3.2(**[**5**][**6**][**7**]**) if a Benchmark Event occurs in relation to the **[**Relevant Affected**]** Reference Rate.

(b) Im Fall, dass der Unabhängige Berater nach billigem Ermessen bestimmt, dass:

(i) es einen Nachfolgezinssatz gibt, dann ist dieser Nachfolgezinssatz (vorbehaltlich etwaiger Änderungen gemäß § 3.2 Absatz **[**5**][**6**][**7**]**(c)) an Stelle des **[**jeweiligen betroffenen**]** Referenzsatzes maßgeblich, um den Variablen Zinssatz für diese Variable Zinsperiode und alle folgenden Variablen Zinsperioden vorbehaltlich der weiteren Anwendbarkeit dieses § 3.2 Absatz **[**5**][**6**][**7**]** zu bestimmen; oder

(b) If the Independent Adviser determines in its discretion that:

(i) there is a Successor Rate, then such Successor Rate shall (subject to adjustment as provided in § 3.2(**[**5**][**6**][**7**]**)(c)) subsequently be used in place of the **[**Relevant Affected**]** Reference Rate to determine the Floating Rate of Interest for the immediately following Floating Interest Period and all following Floating Interest Periods, subject to the subsequent operation of this § 3.2(**[**5**][**6**][**7**]**); or

(ii) es keinen Nachfolgezinssatz aber einen Alternativzinssatz gibt, dann ist dieser Alternativzinssatz (vorbehaltlich etwaiger Änderungen gemäß § 3.2 Absatz **[**5**][**6**][**7**]**(c)) an Stelle des **[**jeweiligen betroffenen**]** Referenzsatzes maßgeblich, um den Variablen Zinssatz für diese Variable Zinsperiode und alle folgenden Variablen Zinsperioden vorbehaltlich der weiteren Anwendbarkeit dieses § 3.2 Absatz **[**5**][**6**][**7**]** zu bestimmen.

(c) Wenn der Unabhängige Berater nach billigem Ermessen bestimmt, dass

(i) eine Anpassungsspanne auf den Nachfolgezinssatz oder gegebenenfalls den Alternativzinssatz anzuwenden ist und

(ii) den Umfang, eine Formel oder die Methode zur Bestimmung einer solchen Anpassungsspanne festlegt,

dann findet eine solche Anpassungsspanne auf den Nachfolgezinssatz oder gegebenenfalls Alternativzinssatz Anwendung.

(d) Sobald ein entsprechender Nachfolgezinssatz, Alternativzinssatz oder eine entsprechende Anpassungsspanne gemäß diesem § 3.2 Absatz **[**5**][**6**][**7**]** festgelegt wird und der Unabhängige Berater nach billigem Ermessen

(e) Ein Nachfolgezinssatz, Alternativzinssatz, eine entsprechende Anpassungsspanne und die Bedingungen von Benchmark Änderungen gemäß diesem § 3.2

(ii) there is no Successor Rate but that there is an Alternative Rate, then such Alternative Rate shall (subject to adjustment as provided in § 3.2(**[**5**][**6**][**7**]**)(c)) subsequently be used in place of the **[**Relevant Affected**]** Reference Rate to determine the Floating Rate of Interest for the immediately following Floating Interest Period and all following Floating Interest Periods, subject to the subsequent operation of this § 3.2(**[**5**][**6**][**7**]**).

(c) If the Independent Adviser determines in its discretion

(i) that an Adjustment Spread is required to be applied to the Successor Rate or the Alternative Rate (as the case may be) and

(ii) the quantum of, or a formula or methodology for determining, such Adjustment Spread,

then such Adjustment Spread shall apply to the Successor Rate or the Alternative Rate (as the case may be).

(d) If any relevant Successor Rate, Alternative Rate or Adjustment Spread is determined in accordance with this § 3.2(**[**5**][**6**][**7**]**) and the Independent Adviser in its discretion

(i) determines that amendments to these Conditions are necessary to ensure the proper operation of such Successor Rate, Alternative Rate and / or Adjustment Spread (such amendments, the "**Benchmark Amendments**") and

(a) Wenn ein Benchmark Ereignis in Bezug auf den EUR CMS**[**$_{(1)}$, bzw. den EUR CMS$_{(2)}$ (EUR CMS$_{(1)}$, bzw. EUR CMS$_{(2)}$ jeweils soweit von einem Benchmark Ereignis betroffen der "**jeweilige betroffene EUR CMS**")**]** eintritt und ein Variabler Zinssatz für eine Variable Zinsperiode noch anhand dieses **[**jeweiligen betroffenen**]** EUR CMS festgelegt wird, dann ernennt die Emittentin unverzüglich unter zumutbaren Bemühungen einen Unabhängigen Berater, der, sobald wie vernünftigerweise möglich, einen Nachfolgezinssatz oder anderenfalls einen Alternativzinssatz (jeweils gemäß § 3.2 Absatz **[**5**][**6**][**7**]**(b)) und in beiden Fällen gegebenenfalls eine Anpassungsspanne (gemäß § 3.2 Absatz **[**5**][**6**][**7**]**(c)) festlegt und etwaige Benchmark Änderungen (gemäß § 3.2 Absatz **[**5**][**6**][**7**]**(d)) vornimmt.

Außer im Falle von grober Fahrlässigkeit oder Vorsatz, übernimmt der Unabhängige Berater keinerlei Haftung gegenüber der Emittentin, der Emissionsstelle, – soweit vorhanden – der bzw. den weitere(n) Zahlstelle(n) oder den Gläubigern für seine Festlegungen gemäß diesem § 3.2 Absatz **[**5**][**6**][**7**]**.

Wenn

(i) es der Emittentin unter zumutbaren Bemühungen nicht möglich ist, einen Unabhängigen Berater zu ernennen; oder

(ii) der ernannte Unabhängige Berater fünf Geschäftstage vor dem unmittelbar nachfolgenden Variablen Zinsfestlegungstag keinen Nachfolgezinssatz oder anderenfalls keinen Alternativzinssatz gemäß diesem § 3.2 Absatz **[**5**][**6**][**7**]** festlegt,

(a) If a Benchmark Event occurs in relation to the EUR CMS **[**$_{(1)}$, or the EUR CMS$_{(2)}$ (EUR CMS$_{(1)}$, or the EUR CMS$_{(2)}$, in each case as far as affected by a Benchmark Event, the "**Relevant Affected EUR CMS**")**]** when the Floating Rate of Interest for any Floating Interest Period remains to be determined by reference to such **[**Relevant Affected**]** EUR CMS, then the Issuer shall use its reasonable endeavors to appoint without delay an Independent Adviser, who as soon as reasonably practicable, shall determine a Successor Rate, failing which an Alternative Rate (in each case in accordance with § 3.2(**[**5**][**6**][**7**]**)(b)) and, in either case, an Adjustment Spread, if any (in accordance with § 3.2(**[**5**][**6**][**7**]**)(c)) and any Benchmark Amendments (in accordance with § 3.2(**[**5**][**6**][**7**]**)(d)).

In the absence of gross negligence or willful misconduct, the Independent Adviser shall have no liability whatsoever to the Issuer, the Fiscal Agent, the Paying Agent(s) (if any) or the Holders for any determination made by it pursuant to this § 3.2(**[**5**][**6**][**7**]**).

If

(i) it is not possible for the Issuer making reasonable efforts to appoint an Independent Adviser; or

(ii) the Independent Adviser appointed by it fails to determine a Successor Rate or, failing which, an Alternative Rate in accordance with this § 3.2(**[**5**][**6**][**7**]**) five Business Days prior to the immediately

following Floating Interest Determination Date,

entspricht der **[**jeweilige betroffene**]** EUR CMS der unmittelbar nachfolgenden Variablen Zinsperiode dem **[**jeweiligen betroffenen**]** EUR CMS, der zum letzten Variablen Zinsfestlegungstag anwendbar war. Falls es keinen ersten Variablen Zinszahlungstag gab, ist der **[**jeweilige betroffene**]** EUR CMS der entsprechende EUR CMS, der für die erste Variable Zinsperiode anwendbar war. Die Möglichkeit der vorzeitigen Rückzahlung durch die Emittentin gemäß § 3.2 Absatz **[**5**]**[6]**[**7**]**(h) bleibt hiervon unberührt.

The **[**Relevant Affected**]** EUR CMS applicable to the immediately following Floating Interest Period shall be the **[**Relevant Affected**]** EUR CMS applicable as at the last preceding Floating Interest Determination Date. If there has not been a first Floating Interest Payment Date, the **[**Relevant Affected**]** EUR CMS shall be the Reference Rate applicable to the first Floating Interest Period. The option of an Early Redemption by the Issuer pursuant to § 3.2(**[**5**]**[6]**[**7**]**)(h) shall remain unaffected hereby.

Anpassungen gemäß diesem § 3.2 Absatz **[**5**]**[6]**[**7**]** gelten für die unmittelbar nachfolgenden Variablen Zinsperioden. Jede unmittelbar nachfolgende Variable Zinsperiode unterliegt aber der weiteren Anwendbarkeit dieses § 3.2 Absatz **[**5**]**[6]**[**7**]**, soweit ein Benchmark Ereignis in Bezug auf den **[**jeweiligen betroffenen**]** Referenzsatz eintritt.

Any adjustment pursuant to this § 3.2(**[**5**]**[6]**[**7**]**) shall apply to the immediately following Floating Interest Periods. Any subsequent Floating Interest Period may be subject to the subsequent operation of this § 3.2(**[**5**]**[6]**[**7**]**) if a Benchmark Event occurs in relation to the **[**Relevant Affected**]** EUR CMS.

(b) Im Fall, dass der Unabhängige Berater nach billigem Ermessen bestimmt, dass:

(i) es einen Nachfolgezinssatz gibt, dann ist dieser Nachfolgezinssatz (vorbehaltlich etwaiger Änderungen gemäß § 3.2 Absatz **[**5**]**[6]**[**7**]**(c)) an Stelle des **[**jeweiligen betroffenen**]** EUR CMS maßgeblich, um den Variablen Zinssatz für diese Variable Zinsperiode und alle folgenden Variablen Zinsperioden vorbehaltlich der weiteren Anwendbarkeit dieses § 3.2 Absatz **[**5**]**[6]**[**7**]** zu bestimmen; oder

(ii) es keinen Nachfolgezinssatz aber einen Alternativzinssatz gibt, dann ist dieser Alternativzinssatz (vorbehaltlich etwaiger Änderungen gemäß § 3.2 Absatz **[**5**]**[6]**[**7**]**(c)) an Stelle des **[**jeweiligen betroffenen**]** EUR CMS maßgeblich, um den Variablen Zinssatz für diese Variable Zinsperiode und alle folgenden Variablen Zinsperioden vorbehaltlich der weiteren Anwendbarkeit dieses § 3.2 Absatz **[**5**]**[6]**[**7**]** zu bestimmen.

(b) If the Independent Adviser determines in its discretion that:

(i) there is a Successor Rate, then such Successor Rate shall (subject to adjustment as provided in § 3.2(**[**5**]**[6]**[**7**]**)(c)) subsequently be used in place of the **[**Relevant Affected**]** EUR CMS to determine the Floating Rate of Interest for the immediately following Floating Interest Period and all following Floating Interest Periods, subject to the subsequent operation of this § 3.2(**[**5**]**[6]**[**7**]**); or

(ii) there is no Successor Rate but that there is an Alternative Rate, then such Alternative Rate shall (subject to adjustment as provided in § 3.2(**[**5**]**[6]**[**7**]**)(c)) subsequently be used in place of the **[**Relevant Affected**]** EUR CMS to determine the Floating Rate of Interest for the immediately following Floating Interest Period and all following Floating Interest Periods, subject to the subsequent operation of this § 3.2(**[**5**]**[6]**[**7**]**).

(c) Wenn der Unabhängige Berater nach billigem Ermessen bestimmt, dass

(i) eine Anpassungsspanne auf den Nachfolgezinssatz oder gegebenenfalls den Alternativzinssatz anzuwenden ist und

(ii) den Umfang, eine Formel oder die Methode zur Bestimmung einer solchen Anpassungsspanne festlegt,

dann findet eine solche Anpassungsspanne auf den Nachfolgezinssatz oder gegebenenfalls Alternativzinssatz Anwendung.

(d) Sobald ein entsprechender Nachfolgezinssatz, Alternativzinssatz oder eine entsprechende Anpassungsspanne gemäß diesem § 3.2 Absatz **[**5**][**6**][**7**]** festgelegt wird und der Unabhängige Berater nach billigem Ermessen

(i) bestimmt, dass Änderungen hinsichtlich dieser Bedingungen notwendig sind, um die ordnungsgemäße Anwendung eines Nachfolgezinssatz, Alternativzinssatz und / oder einer Anpassungsspanne zu gewährleisten (diese Änderungen, die "**Benchmark Änderungen**") und

(ii) die Bedingungen dieser Benchmark Änderungen bestimmt,

dann gelten jene Benchmark Änderungen für die Schuldverschreibungen, vorbehaltlich einer gemäß § 3.2 Absatz **[**5**][**6**][**7**]**(e) vorgeschriebenen Mitteilung durch die Emittentin, ab dem in der Mitteilung angegebenen Zeitpunkt.

(e) Ein Nachfolgezinssatz, Alternativzinssatz, eine entsprechende Anpassungsspanne und die Bedingungen von Benchmark Änderungen gemäß diesem § 3.2 Absatz **[**5**][**6**][**7**]** sowie der Zeitpunkt, ab dem die Benchmark Änderungen gelten, werden unverzüglich, jedoch keinesfalls weniger als fünf Geschäftstage vor dem nächstfolgenden Variablen Zinsfestlegungstag, durch die Emittentin an die Emissionsstelle, die Berechnungsstelle und – soweit vorhanden – die weitere(n) Zahlstelle(n) sowie gemäß § **[**11**][**12**]** an die Gläubiger mitgeteilt. Eine solche Mitteilung ist unwiderruflich.

(c) If the Independent Adviser determines in its discretion

(i) that an Adjustment Spread is required to be applied to the Successor Rate or the Alternative Rate (as the case may be) and

(ii) the quantum of, or a formula or methodology for determining, such Adjustment Spread,

Then such Adjustment Spread shall apply to the Successor Rate or the Alternative Rate (as the case may be).

(d) If any relevant Successor Rate, Alternative Rate or Adjustment Spread is determined in accordance with this § 3.2(**[**5**][**6**][**7**]**) and the Independent Adviser in its discretion

(i) determines that amendments to these Conditions of Issue are necessary to ensure the proper operation of such Successor Rate, Alternative Rate and / or Adjustment Spread (such amendments, the "**Benchmark Amendments**") and

(ii) determines the terms of the Benchmark Amendments,

Then, subject to the Issuer giving notice thereof in accordance with § 3.2(**[**5**][**6**][**7**]**)(e), such Benchmark Amendments shall apply to the Notes with effect from the date specified in such notice.

(e) Any Successor Rate, Alternative Rate, Adjustment Spread and the specific terms of any Benchmark Amendments, determined under this § 3.2(**[**5**][**6**][**7**]**) and the effective date of the Benchmark Amendments will be notified promptly, but in no event less than five Business Days prior to the immediately following Floating Interest Determination Date, by the Issuer to the Fiscal Agent, the Calculation Agent, the Paying Agent(s) (if any) and, in accordance with § **[**11**][**12**]**, the Holders. Such notice shall be irrevocable.

Zum gleichen Zeitpunkt wie die Mitteilung an die Emissionsstelle, übergibt die Emittentin dieser und der Berechnungsstelle einen durch zwei Unterschriftsberechtigte der Emittentin unterzeichneten Nachweis, der

(i) auf Basis der Regelungen in diesem § 3.2 Absatz **[**5**][**6**][**7**]** (A) bestätigt, dass ein Benchmark Ereignis eingetreten ist, (B) den Nachfolgezinssatz oder gegebenenfalls den Alternativzinssatz bestätigt, und (C) soweit zutreffend die Anpassungsspanne mitteilt und (D) die Bedingungen der Benchmark Änderungen nachvollziehbar beschreibt; sowie

(ii) bestätigt, dass die Benchmark Änderungen notwendig sind, um die ordnungsgemäße Anwendung eines solchen Nachfolgezinssatz, Alternativzinssatz und/oder der Anpassungsspanne zu gewährleisten.

Der Nachfolgezinssatz oder Alternativzinssatz, eine Anpassungsspanne (sofern zutreffend) und die Bedingungen der Benchmark Änderungen sind in der Form des Nachweises (mit Ausnahme von offensichtlichen Fehlern oder Bösgläubigkeit bei der Festlegung des Nachfolgezinssatzes oder Alternativzinssatzes, einer entsprechenden Anpassungsspanne (sofern zutreffend) oder der Beschreibung der Bedingungen der Benchmark Änderungen) bindend für die Emittentin, die Emissionsstelle, die Berechnungsstelle, – soweit vorhanden – die weitere(n) Zahlstelle(n) und die Gläubiger.

(f) Vorbehaltlich der Verpflichtungen der Emittentin gemäß § 3.2 Absatz **[**5**][**6**][**7**]**(a), (b), (c) und (d) bleiben der Referenzsatz und die Rückfallregelungen gemäß § 3.2 Absatz 2 bis zum Eintritt eines Benchmark Ereignisses anwendbar. Jede unmittelbar nachfolgende Variable Zinsperiode unterliegt der weiteren Anwendbarkeit dieses § 3.2 Absatz **[**5**][**6**][**7**]**, soweit ein Benchmark Ereignis in Bezug auf den **[**jeweiligen betroffenen**]** EUR CMS eintritt.

No later than notifying the Fiscal Agent of the same, the Issuer shall deliver to the Fiscal Agent and the Calculation Agent a certificate signed by two authorized signatories of the Issuer:

(i) in accordance with the provisions of this § 3.2(**[**5**][**6**][**7**]**) (A) confirming that a Benchmark Event has occurred, (B) confirming the relevant Successor Rate or where applicable the relevant Alternative Rate and, (C) where applicable, confirming any relevant Adjustment Spread and (D) describing comprehensible the specific terms of any relevant Benchmark Amendments; and

(ii) certifying that the relevant Benchmark Amendments are necessary to ensure the proper operation of such relevant Successor Rate, Alternative Rate and/or Adjustment Spread.

The Successor Rate or Alternative Rate and the Adjustment Spread (if any) and the specific terms of the Benchmark Amendments specified in such certificate will (in the absence of manifest error or bad faith in the determination of such Successor Rate or Alternative Rate and such Adjustment Spread (if any) and description of the specific terms of such Benchmark Amendments) be binding on the Issuer, the Fiscal Agent, the Calculation Agent, the Paying Agent(s) (if any) and the Holders.

(f) Without prejudice to the obligations of the Issuer under § 3.2(**[**5**][**6**][**7**]**)(a), (b), (c) and (d), the Reference Rate and the fallback provisions provided for in § 3.2(2) will continue to apply unless and until a Benchmark Event has occurred. Each directly following Floating Interest Period shall be subject to the further applicability of this § 3.2(**[**5**][**6**][**7**]**) as far as a Benchmark Event has occurred in relation to the **[**Relevant Affected**]** EUR CMS.

STEUERN

Unbeschadet sonstiger Bestimmungen dieser Bedingungen ist die Emittentin zum Einbehalt oder Abzug der Beträge berechtigt, die gemäß §§ 1471 bis 1474 des U.S. Internal Revenue Code (einschließlich dessen Änderungen oder Nachfolgevorschriften), gemäß zwischenstaatlicher Abkommen, gemäß den in einer anderen Rechtsordnung in Zusammenhang mit diesen Bestimmungen erlassenen Durchführungsvorschriften oder gemäß mit dem U.S. Internal Revenue Service geschlossenen Verträgen ("**FATCA Quellensteuer**", wobei FATCA für den U.S. Foreign Account Tax Compliance Act steht) erforderlich sind als Folge davon, dass eine andere Person als die Emittentin oder deren Zahlstelle nicht zum Empfang von Zahlungen ohne FATCA Quellensteuer berechtigt ist. Die Emittentin ist nicht verpflichtet, zusätzliche Beträge zu zahlen oder einen Investor in Bezug auf FATCA Quellensteuer schadlos zu halten, die von der Emittentin, der Zahlstelle oder von einem anderen Beteiligten abgezogen oder einbehalten wurden.

(a) the Substituted Debtor is in a position to fulfil all payment obligations arising from or in connection with the Notes without the necessity of any taxes or duties being withheld at source and to transfer all amounts which are required therefor to the Fiscal Agent without any restrictions;

(b) the Substituted Debtor assumes all obligations of the Issuer arising from or in connection with the Notes;

(c) the Substituted Debtor undertakes to reimburse any Holder for such taxes, fees or duties which may be imposed upon it as a consequence of assumption of the obligations of the Issuer by the Substituted Debtor;

(d) the obligations assumed by the Substitute Debtor in respect of the Notes are subordinated on terms identical to the terms of the Notes and (i) the Substitute Debtor is a subsidiary (*Tochterunternehmen*) of the Issuer, (ii) the Substitute Debtor deposits an amount which is equal to the aggregate principal amount of the Notes with the Issuer on terms equivalent, including in respect of subordination, to the Conditions of the Notes, and (iii) the Issuer irrevocably and unconditionally guarantees in favour of each Holder the payment of all sums payable by the Substitute Debtor in respect of the Notes;

(e) such substitution is effected in a manner as prescribed by the Applicable Regulations (as defined in § 5) and the competent authority has raised no objection to such substitution; and

(f) der Emissionsstelle jeweils eine Bestätigung bezüglich der betroffenen Rechtsordnungen von anerkannten Rechtsanwälten vorgelegt wird, dass die Bestimmungen in den vorstehenden Unterabsätzen (a), (b), (c), (d) und (e) erfüllt wurden.

Für die Zwecke dieses § 9 bedeutet "**verbundenes Unternehmen**" ein verbundenes Unternehmen im Sinne von § 15 Aktiengesetz.

(2) *Bekanntmachung.* Jede Ersetzung ist gemäß § 11 bekannt zu machen.

(3) *Änderung von Bezugnahmen.* Im Fall einer Ersetzung gilt jede Bezugnahme in diesen Bedingungen auf die Emittentin ab dem Zeitpunkt der Ersetzung als Bezugnahme auf die Nachfolgeschuldnerin und jede Bezugnahme auf das Land, in dem die Emittentin ihren Sitz oder Steuersitz hat, gilt ab diesem Zeitpunkt als Bezugnahme auf das Land, in dem die Nachfolgeschuldnerin ihren Sitz oder Steuersitz hat. Des Weiteren gilt im Fall einer Ersetzung folgendes:

In § 7 gilt eine alternative Bezugnahme auf die Bundesrepublik Deutschland als aufgenommen (zusätzlich zu der Bezugnahme nach Maßgabe des vorstehenden Satzes auf das Land, in dem die Nachfolgeschuldnerin ihren Sitz oder Steuersitz hat).

(4) *Rechtsnachfolge.* Im Fall einer Ersetzung folgt die Nachfolgeschuldnerin der Emittentin als Rechtsnachfolgerin nach, ersetzt diese und darf alle Rechte und Befugnisse der Emittentin aus den Schuldverschreibungen mit der gleichen Wirkung geltend machen, als wenn die Nachfolgeschuldnerin in diesen Bedingungen als Emittentin genannt worden wäre, und die Emittentin (bzw. die Gesellschaft, die zuvor die Verpflichtungen der Emittentin übernommen hat) wird von ihren Verpflichtungen als Schuldnerin aus den Schuldverschreibungen befreit.

(f) there shall have been delivered to the Fiscal Agent one opinion for each jurisdiction affected of lawyers of recognized standing to the effect that paragraphs (a), (b), (c), (d) and (e) above have been satisfied.

For the purposes of this § 9, "**Affiliate**" shall mean any affiliated company *(verbundenes Unternehmen)* within the meaning of § 15 German Stock Corporation Act *(Aktiengesetz)*.

(2) *Notice.* Notice of any such substitution shall be published in accordance with § 11.

(3) *Change of References.* In the event of any such substitution, any reference in these Conditions to the Issuer shall from then on be deemed to refer to the Substituted Debtor and any reference to the country in which the Issuer is domiciled or resident for taxation purposes shall from then on be deemed to refer to the country of domicile or residence for taxation purposes of the Substituted Debtor. Furthermore, in case of a substitution the following shall apply:

In § 7 an alternative reference to the Federal Republic of Germany shall be deemed to have been included in addition to the reference according to the preceding sentence to the country of domicile or residence for taxation purposes of the Substituted Debtor.

(4) *Legal Succession.* In the event of any such substitution, the Substituted Debtor shall succeed to, and be substituted for, and may exercise every right and power of, the Issuer under the Notes with the same effect as if the Substituted Debtor had been named as the Issuer herein, and the Issuer (or any corporation which shall have previously assumed the obligations of the Issuer) shall be released from its liability as obligor under the Notes.

§ 10
BEGEBUNG WEITERER SCHULDVERSCHREIBUNGEN UND RÜCKKAUF

(1) *Begebung weiterer Schuldverschreibungen.* Die Emittentin ist, soweit nach den Anwendbaren Vorschriften (wie in § **[**5**]** definiert) zulässig, berechtigt, jederzeit ohne Zustimmung der Gläubiger weitere Schuldverschreibungen mit gleichen Bedingungen (gegebenenfalls mit Ausnahme des Tags der Begebung, des Betrags, der ersten darauf zu leistenden Zinszahlung und/oder des Ausgabepreises) in der Weise zu begeben, dass sie mit diesen Schuldverschreibungen eine einheitliche Serie bilden.

§ 10
FURTHER ISSUES AND PURCHASES

(1) *Further Issues.* Subject to the Applicable Regulations (as defined in § 5), the Issuer may from time to time, without the consent of the Holders, issue further Notes having the same terms and conditions as the Notes in all respects (or in all respects except for the issue date, the amount, the first payment of interest on them and/or issue price) so as to form a single Series with the Notes.

(2) *Rückkauf.* Die Emittentin ist, vorbehaltlich der nachfolgenden Bestimmungen des Absatz 3, berechtigt, jederzeit Schuldverschreibungen im Markt oder anderweitig zu jedem beliebigen Preis zu kaufen. Die von der Emittentin erworbenen Schuldverschreibungen können nach Wahl der Emittentin von ihr gehalten, weiterverkauft oder bei der Emissionsstelle zwecks Entwertung eingereicht werden. Sofern diese Käufe durch öffentliches Angebot erfolgen, muss dieses Angebot allen Gläubigern gemacht werden.

(3) *Zustimmung*. Ein Rückkauf nach Absatz 2 ist nur insoweit zulässig, wie

(i) die Voraussetzungen der Anwendbaren Vorschriften (wie in § 5 definiert) erfüllt sind und

(ii) die zuständige Behörde dem Rückkauf zugestimmt hat.

§ 11
MITTEILUNGEN

(1) *Bekanntmachung.* Alle die Schuldverschreibungen betreffenden Mitteilungen werden auf der Internetseite der Luxemburger Wertpapierbörse (derzeit www.luxse.com) veröffentlicht, solange die Schuldverschreibungen auf Veranlassung der Emittentin zum Handel an der Luxemburger Wertpapierbörse zugelassen sind und die Regeln der Luxemburger Wertpapierbörse dies vorsehen. Jede solche Mitteilung gilt am Tag ihrer Veröffentlichung (oder falls sie mehr als einmal veröffentlicht wird, am Tag der ersten Veröffentlichung) als wirksam erfolgt. Soweit die Regeln der Luxemburger Wertpapierbörse dies zulassen, kann die Emittentin eine Veröffentlichung nach § 11 Absatz 1 durch eine Mitteilung nach § 11 Absatz 2 ersetzen.

(2) *Mitteilungen an das Clearingsystem.* Die Emittentin ist berechtigt, anstelle der Veröffentlichung nach Absatz 1, eine Mitteilung an das Clearingsystem zur Weiterleitung an die Gläubiger zu übermitteln, vorausgesetzt, die Regeln der Börse, an der die Schuldverschreibungen notiert sind, lassen diese Form der Mitteilung zu. Jede derartige Mitteilung gilt am siebten Tag nach dem Tag der Mitteilung an das Clearingsystem als den Gläubigern mitgeteilt.

(3) *Bekanntmachungen im Bundesanzeiger.* Wenn eine die Schuldverschreibungen betreffende Mitteilung nach anwendbarem Recht im Bundesanzeiger bekanntzumachen ist, erfolgt zusätzlich die Veröffentlichung der betreffenden Mitteilung durch die Emittentin im Bundesanzeiger. Die Veröffentlichung einer solchen Mitteilung im Bundesanzeiger berührt nicht die Wirksamkeit einer Mitteilung gemäß § 11 Absatz 1 und Absatz 2.

(2) *Purchases.* The Issuer may at any time, subject to paragraph (3), purchase in the open market or otherwise and at any price. Notes purchased by the Issuer may, at the option of the Issuer, be held, resold or surrendered to the Fiscal Agent for cancellation. If purchases are made by tender, tenders for such Notes must be made available to all Holders of such Notes alike.

(3) *Approval*. Further, a repurchase in accordance with paragraph (2) shall be effective only to the extent, that

(i) the conditions of the Applicable Regulations (as defined in § 5) are met, and

(ii) the competent authority has approved the repurchase.

§ 11
NOTICE

(1) *Publication.* As long as the Notes are admitted to trading on the Luxembourg Stock Exchange at the request of the Issuer and the rules of the Luxembourg Stock Exchange so require, all notices concerning the Notes shall be published on the website of the Luxembourg Stock Exchange (currently www.luxse.com). Any such notice so given will be deemed to have been validly given on the day of its publication (or, if published more than once, on the day of the first such publication). To the extent the rules of the Luxembourg Stock Exchange so permit, the Issuer may deliver the relevant notice in accordance with § 11(2) instead of publication pursuant § 11(1).

(2) *Notification to Clearing System.* The Issuer may, in lieu of the publication set forth in paragraph (1) above, deliver the relevant notice to the Clearing System, for communication by the Clearing System to the Holder, provided that the rules of the stock exchange on which the Notes are listed permit such form of notice. Any such notice shall be deemed to have been given to the Holders on the seventh day after the day on which the said notice was given to the Clearing System.

(3) *Notices in the German Federal Gazette (Bundesanzeiger)*. If the publication of any notice concerning the Pfandbriefe is required to be made by applicable law in the German Federal Gazette (*Bundesanzeiger*), the relevant notice shall also be published by the Issuer in the German Federal Gazette (*Bundesanzeiger*). The publication of any such notice in the German Federal Gazette (*Bundesanzeiger*) shall be without prejudice to the efficacy of any notice made in accordance with § 11(1) and (2).

Der folgende Absatz 4 ist nur auf nachrangige Schuldverschreibungen anwendbar, bei denen eine zusätzliche Veröffentlichung erforderlich ist:

Der folgende § 12 ist nur auf nachrangige Schuldverschreibungen anwendbar, die Beschlüsse der Gläubiger vorsehen und bei denen kein Gemeinsamer Vertreter in den Bedingungen der Schuldverschreibungen bestimmt ist:

The following § 12 shall only apply to Subordinated Notes that provide for Resolutions of Holders where no Holders' Representative is designated in the Conditions of the Notes:

[§ 12
ÄNDERUNG DER BEDINGUNGEN DURCH BESCHLUSS DER GLÄUBIGER; GEMEINSAMER VERTRETER

(1) *Änderung der Bedingungen.* Die Emittentin kann gemäß §§ 5 ff. des Gesetzes über Schuldverschreibungen aus Gesamtemissionen (Schuldverschreibungsgesetz, "**SchVG**") in seiner jeweils geltenden Fassung mit den Gläubigern Änderungen an den Bedingungen vereinbaren, wenn die Gläubiger einen entsprechenden Beschluss gefasst haben. Hierbei können die Gläubiger durch Beschluss der in Absatz 2 genannten Mehrheit insbesondere Änderungen zustimmen, welche den Charakter der Bedingungen wesentlich verändern, einschließlich der in § 5 Absatz 3 SchVG genannten Maßnahmen, aber mit Ausnahme der Ersetzung der Emittentin, welche ausschließlich den Bestimmungen von § 9 unterliegt. Ein rechtmäßig gefasster Mehrheitsbeschluss ist für alle Gläubiger verbindlich.

Diese Möglichkeit zur Änderung der Bedingungen besteht vorbehaltlich der Einhaltung von Anforderungen der Anwendbaren Vorschriften (wie in § **[**5**]** definiert) an die Schuldverschreibungen als Ergänzungskapital.

(2) *Mehrheitserfordernisse.* Vorbehaltlich der Bestimmungen des folgenden Satzes und vorausgesetzt, die Anforderungen an das Quorum sind erfüllt, können die Gläubiger Beschlüsse mit einfacher Mehrheit der abgegebenen Stimmen fassen. Beschlüsse, welche den Charakter der Bedingungen wesentlich verändern, insbesondere in den Fällen des § 5 Absatz 3 Nr. 1 bis 9 SchVG, bedürfen der qualifizierten Mehrheit von mindestens **[**75**][*anderer Prozentsatz*]** % der abgegebenen Stimmen (die "**Qualifizierte Mehrheit**").

[§ 12
AMENDMENTS TO THE CONDITIONS BY RESOLUTION OF THE HOLDERS; JOINT REPRESENTATIVE

(1) *Amendment of the Conditions*. The Issuer may agree with the Holders on amendments to the Conditions by virtue of a majority resolution of the Holders pursuant to §§ 5 *et seqq.* of the German Act on Issues of Debt Securities (*Gesetz über Schuldverschreibungen aus Gesamtemissionen*, "**SchVG**"), as amended from time to time. In particular, the Holders may consent to amendments which materially change the substance of the Conditions, including such measures as provided for under § 5(3) SchVG, but excluding a substitution of the Issuer, which is exclusively subject to the provisions in § 9, by resolutions passed by such majority of the votes of the Holders. A duly passed majority resolution shall be binding upon all Holders.

These amendments to the Conditions are subject to compliance with requirements of Applicable Regulations (as defined in § 5) for the recognition of the Notes as Tier 2 capital (*Ergänzungskapital*).

(2) *Majority*. Except as provided by the following sentence and provided that the quorum requirements are being met, the Holders may pass resolutions by simple majority of the voting rights participating in the vote. Resolutions which materially change the substance of the Conditions, in particular in the cases of § 5(3) numbers 1 through 9 SchVG, may only be passed by a majority of at least **[**75**][*other percentage*]** per cent. of the voting rights participating in the vote (a "**Qualified Majority**").

(3) *Abstimmung ohne Versammlung.* Beschlüsse der Gläubiger können ausschließlich im Wege der Abstimmung ohne Versammlung gefasst werden, wie sie in § 18 SchVG vorgesehen ist. (a) Gemäß § 30 Absatz (2a) Pfandbriefgesetz besteht für den Sachwalter für ausstehende Pfandbriefe die Möglichkeit einer Verschiebung der Fälligkeiten der Tilgungszahlungen um bis zu 12 Monate (der "**Verschiebungszeitraum**"). Weiterhin kann der Sachwalter die Fälligkeit von Zinsen, die innerhalb eines Monats nach seiner Bestellung fällig werden, auf das Ende dieses Monatszeitraums verschieben. Hinausgeschobene Beträge sind für die Dauer der Fälligkeitsverschiebung nach den bis zu der Verschiebung geltenden Bedingungen zu verzinsen. Hinausgeschobene Zinszahlungen gelten dabei als Kapitalbeträge.

Der Sachwalter darf eine Fälligkeitsverschiebung gemäß § 30 Absatz (2b) Pfandbriefgesetz nur vornehmen, sofern zum Zeitpunkt des Hinausschiebens der Fälligkeit (i) das Hinausschieben der Fälligkeit erforderlich ist, um die Zahlungsunfähigkeit der Pfandbriefbank mit beschränkter Geschäftstätigkeit zu vermeiden, (ii) die Pfandbriefbank mit beschränkter Geschäftstätigkeit nicht überschuldet ist und (iii) Grund zu der Annahme besteht, dass die Pfandbriefbank mit beschränkter Geschäftstätigkeit jedenfalls nach Ablauf des größtmöglichen Verschiebungszeitraums unter Berücksichtigung weiterer Verschiebungsmöglichkeiten ihre dann fälligen Verbindlichkeiten erfüllen kann.

Further, the cover pool administrator may defer the payment of any interest due within one month of its appointment to the end of this one-month period. Deferred amounts shall bear interest for the duration of the deferral pursuant to the conditions applicable until the deferral. Deferred interest payments shall be deemed to be principal amounts.

Pursuant to § 30(2b) Pfandbrief Act, the cover pool administrator may only extend the maturity of outstanding Pfandbriefe provided that (i) the extension of the maturity is necessary to avoid the illiquidity of the Pfandbriefbank with limited business activities (*Pfandbriefbank mit beschränkter Geschäftstätigkeit*), (ii) the Pfandbriefbank with limited business activities is not over-indebted and (iii) there is reason to believe that the Pfandbriefbank with limited business activities will be able to meet its liabilities due after expiry of the maximum possible extension period, taking into account further options to extend the maturity.

For the extension of maturity which does not exceed one month from the appointment of the cover pool administrator, these requirements will be deemed irrefutable.

(b) Der Sachwalter veröffentlicht gemäß § 30 Absatz (2c) Pfandbriefgesetz jedes Hinausschieben der Fälligkeit unverzüglich unter Angabe der betroffenen Pfandbriefemissionen sowie des jeweiligen Verschiebungsumfangs auf der Internetseite der Pfandbriefbank bei den nach § 28 Pfandbriefgesetz zu der betreffenden Pfandbriefgattung veröffentlichten Angaben in mindestens einem überregionalen Börsenpflichtblatt sowie im Bundesanzeiger.

(b) The cover pool administrator will immediately publish any extension of maturity pursuant to § 30(2c) Pfandbrief Act, stating the affected Pfandbrief issues as well as the respective extension amount, on the Pfandbriefbank's website under the information published pursuant to § 28 Pfandbrief Act for the Pfandbrief category concerned, in at least one supraregional mandatory stock exchange journal as well as in the German Federal Gazette *(Bundesanzeiger)*.

Sollte die Berechnungsstelle in Bezug auf einen Indexfeststellungstag feststellen, dass der SONIA Compounded Index Value nicht verfügbar ist oder nicht anderweitig vom Administrator des SONIA Referenzsatzes oder einem anderen Vertreiber von Informationen veröffentlicht oder angezeigt wird, wird der "SONIA Compounded Index" für diese Zinsperiode von der Berechnungsstelle am betreffenden Zinsfestlegungstag auf der Grundlage des GBP-SONIA-COMPOUND berechnet.

"**GBP-SONIA-COMPOUND**" wird von der Berechnungsstelle am Zinsfestlegungstag mit der folgenden Formel (als Rendite einer täglich kumulierten Anlage, wobei der SONIA Referenzsatz als Referenzzinssatz für diese Anlage gilt) berechnet, wobei der daraus resultierende Prozentsatz, sofern notwendig, auf den nächsten zehn Tausendstel Prozentpunkt (0,0001 %) gerundet, wobei 0,00005 % aufgerundet wird:

If, in respect of any Index Determination Date, the Calculation Agent determines that the SONIA Compounded Index Value is not available or has not otherwise been published or displayed by the administrator of the SONIA Reference Rate or by another information vendor, as the case may be, "SONIA Compounded Index" for such Interest Period shall be calculated by the Calculation Agent on the relevant Interest Determination Date on the basis of GBP-SONIA-COMPOUND.

"**GBP-SONIA-COMPOUND**" will be calculated by the Calculation Agent for the relevant Interest Determination Date in accordance with the following formula (as the rate of return of a daily compound interest investment, it being understood that the reference rate for the calculation of interest is the SONIA Reference Rate), and the resulting percentage will be rounded, if necessary, to the nearest one ten-thousandth of a percentage point (0.0001 %) with 0.00005 % being rounded upwards:

Notwithstanding the paragraph above, in the event the Bank of England publishes guidance as to (i) how SONIA is to be determined or (ii) any rate that is to replace SONIA, the Calculation Agent shall, subject to receiving written instructions from the Issuer and to the extent that it is reasonably practicable, follow such guidance in order to determine SONIA for the purpose of the Pfandbriefe for so long as SONIA is not available or has not been published by the authorised distributors.

In the event that the Rate of Interest cannot be determined in accordance with the provisions of this § 3 by the Calculation Agent, the Rate of Interest shall be (i) that determined as at the last preceding Interest Determination Date or (ii) if there is no such preceding Interest Determination Date, the initial Rate of Interest which would have been applicable to such Pfandbriefe for the first Interest Period had the Pfandbriefe been in issue for a period equal in duration to the scheduled first Interest Period but ending on (and excluding) the Interest Commencement Date.**]**

(**[**2**][**3**][**4**]**) *Fälligkeitsverschiebung.*

(**[**2**][**3**][**4**]**) *Extension of Maturity.*

(a) Gemäß § 30 Absatz (2a) Pfandbriefgesetz besteht für den Sachwalter für ausstehende Pfandbriefe die Möglichkeit einer Verschiebung der Fälligkeiten der Tilgungszahlungen um bis zu 12 Monate (der "**Verschiebungszeitraum**"). Weiterhin kann der Sachwalter die Fälligkeit von Zinsen, die innerhalb eines Monats nach seiner Bestellung fällig werden, auf das Ende dieses Monatszeitraums verschieben. Hinausgeschobene Beträge sind für die Dauer der Fälligkeitsverschiebung nach den bis zu der Verschiebung geltenden Bedingungen zu verzinsen. Hinausgeschobene Zinszahlungen gelten dabei als Kapitalbeträge.

(a) Pursuant to § 30(2a) Pfandbrief Act the cover pool administrator (*Sachwalter*) may extend the maturity of outstanding Pfandbriefe by up to 12 months (the "**Extension Period**"). Deferred amounts shall bear interest for the duration of the deferral pursuant to the conditions applicable until the deferral. Deferred interest payments shall be deemed to be principal amounts.

Der Sachwalter darf eine Fälligkeitsverschiebung gemäß § 30 Absatz (2b) Pfandbriefgesetz nur vornehmen, sofern zum Zeitpunkt des Hinausschiebens der Fälligkeit (i) das Hinausschieben der Fälligkeit erforderlich ist, um die Zahlungsunfähigkeit der Pfandbriefbank mit beschränkter Geschäftstätigkeit zu vermeiden, (ii) die Pfandbriefbank mit beschränkter Geschäftstätigkeit nicht überschuldet ist und (iii) Grund zu der Annahme besteht, dass die Pfandbriefbank mit beschränkter Geschäftstätigkeit jedenfalls nach Ablauf des größtmöglichen Verschiebungszeitraums unter Berücksichtigung weiterer Verschiebungsmöglichkeiten ihre dann fälligen Verbindlichkeiten erfüllen kann.

Pursuant to § 30(2b) Pfandbrief Act, the cover pool administrator may only extend the maturity of outstanding Pfandbriefe provided that (i) the extension of the maturity is necessary to avoid the illiquidity of the Pfandbriefbank with limited business activities (*Pfandbriefbank mit beschränkter Geschäftstätigkeit*), (ii) the Pfandbriefbank with limited business activities is not over-indebted and (iii) there is reason to believe that the Pfandbriefbank with limited business activities will be able to meet its liabilities due after expiry of the maximum possible extension period, taking into account further options to extend the maturity.

Für Fälligkeitsverschiebungen, die den Zeitraum von einem Monat nach Ernennung des Sachwalters nicht überschreiten, wird das Vorliegen dieser Voraussetzungen unwiderlegbar vermutet.

For the extension of maturity which does not exceed one month from the appointment of the cover pool administrator, these requirements will be deemed irrefutable.

History and Development of Aareal Bank

Aareal Bank's predecessor was established by notarial deed on 20 July 1923 as "Deutsche Wohnstätten Bank Aktiengesellschaft" and entered in the commercial register at the District Court of Berlin-Charlottenburg under number HRB 3975 on 20 October 1923. In 1926, the Issuer was renamed into "Deutsche Bau- und Bodenbank AG".

In 1979, Deutsche Pfandbriefanstalt (its predecessor Preußische Landespfandbriefanstalt having been one of the funding shareholders of Deutsche Wohnstätten Bank Aktiengesellschaft) acquired a majority interest in Deutsche Bau- und Bodenbank AG. At the end of 1989/beginning of 1990, "Deutsche Pfandbriefanstalt" was transformed into a joint stock corporation under German law (*Aktiengesellschaft*), and its name was changed to "Deutsche Pfandbrief- und Hypothekenbank AG".

In 1998/1999, Deutsche Pfandbrief- and Hypothekenbank AG changed its name once again to "DePfa Deutsche Pfandbriefbank AG". As part of the Group restructuring at that time, the entire operational property activities were transferred to Deutsche Bau- and Bodenbank AG which later became "DePfa Bank AG" (and

today, "Aareal Bank AG"). The activities in property and public sector financing were expanded steadily, and increasingly grew into independent business units within the DePfa Group.

At the Extraordinary Shareholders' Meeting in October 2001, DePfa Deutsche Pfandbriefbank AG shareholders voted, by a majority of 99.95 per cent. of the issued share capital represented at the meeting, in favour of the proposed split of the DePfa Group into two independently listed banks, which would specialise in public sector finance and property activities, respectively.

Since 22 January 2002, Aareal Bank AG operates under the commercial name "Aareal Bank".

Since 3 March 2006, Aareal Bank holds a licence to issue Pfandbriefe.

Trend Information

There has been no material adverse change in the prospects of Aareal Bank AG since 31 March 2024, the date of its last published audited financial statements, noting that significant uncertainties with respect to geopolitics and risks relating to monetary policy tightening exist as described in "Risk Factors – A. Risk Factors relating to Aareal Bank AG – 3. Risks related to the Issuer's business activities and industry – Risks specific for Structured Property Financing, including risks relating to geopolitics and to monetary policy tightening".

Outlook for the year 2024

A variety of stress factors support the assumption that global economic activity will continue to be hampered in 2024. Specifically, Aareal Bank expects that monetary tightening will only take its full effect in 2024 and that insufficient fiscal support will be a drag on growth in many countries. A recession, however, will likely be avoided in most countries. Both overall and core inflation will continue to subside, allowing the major central banks to start cutting interest rates during the course of 2024. While lower inflation should support consumer spending, this may be countered by a slight increase in unemployment which could slow down the growth of real disposable household incomes and thus have a dampening effect on consumer spending.

The forecasts below are highly dependent on recent developments and may no longer be valid, especially in the event of unforeseen shocks.

The euro zone's real gross domestic product should see slightly stronger growth in 2024 than in the previous year, albeit at a low level given the multiple burdening factors. The economy should gain momentum throughout the year, as the purchasing power of private households will grow, whilst financial conditions will ease. Diverging economic trends between European regions should persist for the time being: In particular those economies with a large industrial sector (such as Germany) should see slower growth than the euro zone as a whole.

Positive real economic growth is also expected for the UK in the full year 2024, reaching a similarly low level as in the euro zone. Despite the ongoing decline in inflation, the full impact of monetary tightening should become palpable and prevent the upturn from gaining momentum. This will be aggravated by the expiry of economic and energy-related aids introduced during the Covid-19 pandemic and the implementation of announced tax increases, which would mean fiscal tightening and a reduction in government spending.

The US should see growth levels significantly ahead of the euro zone and the UK in 2024 due to labour market strength, a continued decline in inflation and the expected easing of financing conditions.

Aareal Bank expects positive real growth for Australia in 2024, albeit at a lower rate than in the previous year. Growth should be driven by strong private consumption and positive momentum for imports and exports. A decline in corporate investments and a rise in unemployment, on the other hand, should act as a drag on economic activity.

The key priority for central banks during 2024 will be once more to steer inflation rates back towards the target level. Once inflation approaches its target value, central banks should shift their attention to future economic conditions and adjust their monetary policy accordingly. But having lived through a period of overshooting inflation, central banks will presumably act with caution and focus on slowly lowering interest rates to less restrictive levels.

Inflation rates in most economies are expected to further decline in 2024, albeit at a slower pace than 2023. However, the speed and trajectory of the decline will differ across countries, depending on how relevant individual supply and demand factors have been to the rise in inflation.

Demand for commercial properties will vary, depending on the region and property type. It can be assumed that the high interest rate environment will continue to influence the investment decisions of buyers and sellers and reduce transaction volumes. However, Aareal Bank anticipates competition in the commercial property financing markets to remain, particularly in regions and for property types that were already in high demand over the past years.

It is expected that various factors will have an impact on how commercial property values develop this year and beyond. On average, Aareal Bank expects that elevated interest rates and financing costs compared with recent years will continue to weigh on the market values of commercial properties in 2024 and may lead to further downward pressure depending on property type and location. Looking forward, the pricing of properties will be influenced not only by the quality and location of the property, but also increasingly by compliance with sustainability criteria (ESG).

With a view to retail properties, Aareal Bank expects the structural change in shopping behaviour to have a dampening effect on the outlook of value-driving rental revenues, depending on location and segment. The current year is characterised by a cyclical headwind, i.e. higher interest rate levels and slightly weaker labour markets could mean that private consumption might not recover as expected, which, in turn, could have a negative impact on rental growth. Also depending on location and segment, Aareal Bank sees the recovery in hotel fundamentals largely achieved even if international tourism has not yet returned to pre-pandemic levels. The sector's fundamental data and income should remain sound in the near term, despite the pressure on real income and the uncertain economic outlook. Unemployment continues to be low; however, hotel income should not grow very much given that room rates have already seen substantial raises and that households are feeling inflation-related real effects upon incomes. There is a risk that further increases in operating costs or a shortage of labour could weigh on the profits of hotel properties. The high interest rate levels should continue to weigh on average market values in the short term. Aareal Bank expects a positive development for co-living, i.e. shared housing for a limited period of time, and student housing, where demand from international students has already recovered significantly as a result of the return to face-to-face teaching. Aareal Bank expects the values of office properties to suffer a more pronounced decline compared to other property types on average and that rental growth will likely slow, driven by potential changes in space requirements and the increasing influence of sustainability standards. Aareal Bank expects properties that do not match corporate sustainability criteria or government climate targets to show a weaker development overall. A significant downside risk for this forecast lies in a sharper than expected decline in the market values of office properties. The market is undergoing a period of price discovery; the small number of transactions is complicating this process, though. If the number of office properties in serious distress increased strongly, yields would rise due to higher risk premiums, while market values would plummet. Logistics properties continue to be assessed positively, as structural driver of demand remain resulting in positive rental growth prospects in the near term. However, rising yields should also generally weigh on market values for this property type in 2024. Individual properties may generally deviate from this estimate.

Mr Rinke is a Senior Managing Director of Centerbridge Partners Europe LLP, which has a direct interest in Atlantic Lux HoldCo S.à r.l. and an indirect interest in Atlantic BidCo GmbH. With regard to Ms Lulay, Chief Executive Officer of GFT Technologies SE, there exists a business relationship between Aareal Bank and GFT Technologies SE. Ms Knoflach and Mr Giesecke are only subject to a potential conflict of interest. In the event of a resolution in Aareal Bank's Supervisory Board that concerns an actual conflict of interest, the Supervisory Board members in question will abstain from the discussion the matter and passing a resolution. Supervisory Authorities

As of 4 November 2014, the European Central Bank ("**ECB**") has become Aareal Bank's competent supervisory authority in relation to the tasks referred to in Article 4 paragraph 1 of Council Regulation (EU) No. 1024/2013 of 15 October 2013 conferring specific tasks on the European Central Bank concerning policies relating to the prudential supervision of credit institutions. Such tasks comprise, *inter alia*, supervision of compliance with applicable rules for own funds requirements, large exposure limits, liquidity, leverage, robust governance arrangements, risk management processes, internal control mechanisms, remuneration policies and practices and effective internal capital adequacy assessment as well as the responsibility to grant approvals in relation to acquisitions, asset sales, transformation of companies and related matters. Further, from 4 November 2014 the ECB has become responsible for conducting the stress tests of Aareal Bank. BaFin only remains responsible for the supervision in relation to topics not explicitly conferred to ECB, e.g. supervision on issues related to the German Pfandbrief Act.

In addition, the ECB requires certain credit institutions, including Aareal Bank, to hold minimum reserves on accounts maintained with their respective National Central Banks, which, in the case of Aareal Bank, are held by the Deutsche Bundesbank. These minimum reserves must equal a certain percentage of the credit institutions' liabilities resulting from certain deposits, plus the issuance of bonds.

Share Capital

Aareal Bank's current share capital amounts to EUR 179,571,663 – divided into 59,857,221 no-par value registered shares. Each share carries one vote. There are no pre-emptive rights or constraints with respect to dividend payouts.

Major Shareholders

According to the transfer report pursuant to § 327c of the German Stock Corporation Act (*Aktiengesetz*) prepared for purposes of the Squeeze-out Procedure, Atlantic BidCo, as of 13 March 2024, owns 95.50 per cent. of the share capital and the voting rights of Aareal Bank. To the Issuer's knowledge, Atlantic BidCo is indirectly held by funds controlled, managed or advised by Advent International Corporation (approximately 39 per cent.), Centerbridge Partners (approximately 39 per cent.) as well as CPP Investment Board Europe S.à.r.l., a wholly-owned subsidiary of Canada Pension Plan Investment Board (less than 20 per cent.) and other minority shareholders. With regard to the Atlantic BidCo Takeover Offer, refer to the respective section on page 603 of the Prospectus.

Regulatory Indicators

The following table sets forth certain regulatory figures and ratios of Aareal Bank Group.

	31 March 2024	31 December 2023	31 December 2022
Regulatory Indicators[1)]			
Basel IV			
Common Equity Tier 1 ratio (CET1 ratio) (%)	19.7	19.4	19.3

1) 31 December 2022: including originally proposed dividend of € 1.60 per share in 2022 and pro rata temporis accrual of interest on the AT1 bond, excluding profits for 2022 under commercial law.

31 December 2023: including profits for 2023 and pro rata temporis accrual of interest on the AT1 bond since no payout of profits for 2023 will be made in 2024.

Adjusted total risk exposure amount (in accordance with Article 3 CRR – RWAs), in accordance with currently applicable law (CRR II) and applying the partial regulation for the "output floor" in connection with commercial property lending and equity exposures, based on the European Commission's proposal dated 27 October 2021 for implementation of Basel IV (CRR III). The adjusted risk-weighted exposure amount for commercial property lending and equity exposures is determined using the higher of (i) total RWAs calculated in accordance with CRR II currently in force, and (ii) the figure calculated in accordance with the revised CRSA (pursuant to CRR III), applying the transitional provisions for 2025 (50 % output floor).

31 March 2024: including the interim profits for 2024 less the pro-rata dividend in accordance with the dividend policy and pro-rata accrual of the interest payable on the AT1 bond.

The CET1 ratio, determined as the higher of the amounts under Basel III and Basel IV (phase-in), as shown in Aareal Bank's regulatory report as at 31 March 2024, was 18.5 %, reflecting the fact that Aareal Bank had not submitted an application for inclusion of profits on that reporting date to the ECB.

The SREP recommendations concerning the NPL inventory and the ECB's NPL guidelines for the regulatory capital of new NPLs and an additional voluntary and preventive capital deduction for regulatory uncertainties from ECB tests were taken into account.

Financial Information concerning Aareal Bank Group's Assets and Liabilities, Financial Liabilities, Financial Position and Profits and Losses

The unaudited consolidated interim financial information as at 31 March 2024 of Aareal Bank was prepared in accordance with the International Financial Reporting Standards, as adopted by the EU ("**IFRS**"), whereby such unaudited consolidated interim financial information does not qualify as an interim report in terms of IAS 34 (International Accounting Standards).

The consolidated financial statements of Aareal Bank as at and for the fiscal year ended 31 December 2022 and as at and for the fiscal year ended 31 December 2023 were prepared in accordance with IFRS.

The date of the latest published audited financial information for Aareal Bank Group is 31 December 2023.

Description of the expected financing of the Issuer's activities

Aareal Bank is an active issuer of Pfandbriefe, which account for a major share of its long-term funding. To cater to a broad investor base, Aareal Bank uses a wide range of other refinancing tools, including senior preferred and senior non-preferred bonds, as well as promissory notes and registered bonds. Depending on market conditions, Aareal Bank places large-sized public issues or private placements. In the Banking & Digital Solutions segment Aareal Bank also generates deposits from the housing industry. In addition, Aareal Bank raises deposits from retail clients via the Raisin platform. Both types of deposit business represent a strategically important additional source of funding. Furthermore, Aareal Bank generates funding via institutional money market investor deposits and its European Commercial Paper Programme.

No Significant Change in the Financial Position or Financial Performance

There has been no significant change in the financial position or financial performance of Aareal Bank and its subsidiaries since 31 March 2024, noting that significant uncertainties with respect to the impact of geopolitics and risks relating to monetary policy tightening exist as described in "Risk Factors – A. Risk Factors relating to Aareal Bank AG – 3. Risks related to the Issuer's business activities and industry – Risks specific for Structured Property Financing, including risks relating to geopolitics and to monetary policy tightening".

Rating of the Issuer

The following credit ratings have been assigned by rating agencies to Aareal Bank[(153)]:

Ratings by Fitch

Fitch Ratings Ireland Limited ("**Fitch**")[154] has assigned a Long-Term Issuer Default Rating ("**IDR**") of BBB and a Short-Term Issuer Default Rating (IDR) of F2 to Aareal Bank.

The stable rating outlook on the IDR reflects Fitch's expectation that Aareal Bank's pre-impairment operating profit will continue to provide a sufficient buffer for higher loan impairment charges in the coming quarters, which should allow Aareal Bank to generate adequate operating profitability. It also incorporates Fitch's view that Aareal Bank's funding and liquidity, which benefits from a stable deposit base and Aareal Bank's established role as a Pfandbrief issuer, remains sound.

Fitch's Long-Term Issuer Default Ratings (IDR) rating scale ranges from "AAA" (highest credit quality, lowest expectation of default risk) over categories "AA", "A", "BBB", "BB", "B", "CCC", "CC", "C", "RD" to category "D" (default, indicate an issuer that in Fitch's opinion has entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, or which has otherwise ceased business). A plus ("+") or minus ("–") sign may be appended to a rating to denote the relative status within major rating categories. Such suffixes are not added to the "AAA" category or to categories below the "CCC" category. "BBB" ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

Fitch short-term IDR rating scales ranges from F1 (highest short-term credit quality, indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature) over categories "F2" (good short-term credit quality; good intrinsic capacity for timely payment of financial commitments), "F3", "B", "C" to category "D" (default, indicates a broad-based default event for an entity, or the default of a short-term obligation).

Ratings by Moody's

Moody's Deutschland GmbH ("**Moody's**")[155] has assigned a Long-term Issuer Rating of Baa1 and a Short-term Issuer Rating of P-2 to Aareal Bank.

The negative outlook on the issuer rating reflects Moody's expectation that the weak economic environment for commercial real estate exposures will likely require Aareal Bank to take additional provisions, that will continue to drag on its profitability.

---

(153) A credit rating assesses the creditworthiness of an entity and informs an investor therefore about the probability of the entity being able to redeem invested capital. It is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

The European Securities and Markets Authority publishes on its website (https://www.esma.europa.eu/credit-rating-agencies/cra-authorisation) a list of credit rating agencies registered in accordance with the CRA Regulation. That list is updated within five working days following the adoption of a decision under Article 16, 17 or 20 CRA Regulation. The European Commission shall publish that updated list in the Official Journal of the European Union within 30 days following such update.

(154) Fitch is established in the European Union and is registered under the CRA Regulation.

(155) Moody's is established in the European Union and is registered under CRA Regulation.

Moody's Global Long-Term Rating Scale ranges from "Aaa" (judged to be of the highest quality, subject to the lowest level of credit risk) over categories "Aa", "A", "Baa", "Ba", "B", "Caa", "Ca" to category "C" (obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest). Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category. Obligations rated "A" are judged to be upper-medium grade and are subject to low credit risk.

Moody's Global Short-Term Rating Scale ranges from P-1 (issuer with a superior ability to repay short-term debt obligations) over categories "P-2", "P-3" to "NP" (issuers rated "Not Prime" do not fall within any of the Prime rating categories P-1 to P-3). An issuer rated "P-2" has a strong ability to repay short-term debt obligations.

Legal or Arbitration Proceedings

Due to the nature of its business Aareal Bank is involved in a number of legal proceedings in different jurisdictions. There are no nor have there been any governmental, legal or arbitration proceedings, involving Aareal Bank or any of its subsidiaries (and, so far as Aareal Bank is aware, no such proceedings are pending or threatened) which may have or have had during the twelve months prior to the date of this Prospectus a significant effect on the financial position or profitability of Aareal Bank or its subsidiaries taken as a whole.

Material Contracts

In August 2020 Aareal Bank sold a 30 per cent. stake in its IT-Subsidiary Aareon AG to the private equity investor AI Houses (Luxembourg) S.à r.l., belonging to the Advent International group. Furthermore, Aareal Bank entered into a shareholders' agreement with AI Houses (Luxembourg) S.à r.l.

In December 2023, Aareal Bank sold a 74.9 per cent. stake in First Financial to Aareon. The partnership aims to create further growth potential, ensure long-term cooperation between all three organizations at the common interface of providing expertise to the housing industry, and supplement Aareal Bank's deposit-taking business. In that context, the three parties entered into a shareholders' agreement.

Except for the contracts mentioned in this section, neither Aareal Bank nor any of its consolidated subsidiaries have entered into, in the last two years, any contracts outside the ordinary course of business that have had or may reasonably be expected to have a material effect on their business.

USE OF PROCEEDS

The net proceeds from each issue of senior Notes and Pfandbriefe by the Issuer will be used for its general financing purposes unless otherwise specified in the applicable Final Terms. The net proceeds from each issue of Subordinated Notes will be used to strengthen the regulatory total capital of the Issuer unless otherwise specified in the applicable Final Terms.

If, in respect of any issue of Instruments, there is a particular identified use of proceeds other than using the net proceeds for the above-mentioned reasons, this will be stated in the relevant Final Terms. The Issuer may use an amount equivalent to the net proceeds from an issue of any Green Bonds specifically for Eligible Green Loans as described in the applicable Final Terms and in the Green Finance Framework.

SUMMARY OF GREEN FINANCE FRAMEWORK

The below is a summary of the Green Finance Framework. The information only applies to Notes and Pfandbriefe issued in compliance with the Green Finance Framework.

Use of Proceeds

An amount equivalent to the net proceeds of any Green Bond will be used to finance or re-finance in whole or in part commercial property financing loans, which fulfil the eligibility criteria (each an "**Eligible Asset**"). In order to be eligible, the loan or investment must relate to an asset, which fulfils the criteria as described below, i.e. either a Green Property or an Energy Efficiency Upgrade ("**Eligible Asset Categories**").

Eligible Asset Categories:

A. Green Properties

The Issuer defines green properties as environmentally sustainable properties ("**Green Properties**"). This definition is based on the Issuer's own assessment expertise as well as on existing green building certificates.

The respective applicable eligibility criteria may vary depending on the asset class/type of use or the relevant country in which the asset is located or in which the proceeds of the loan shall be used. The eligibility criteria are reviewed annually and adapted to changes in statutory environmental requirements and, if necessary, to current market developments.

Eligibility of properties qualifying as Eligible Assets is assessed at the property level on the basis of the below described eligibility criteria. Individual Green Properties, that are part of portfolio transactions in which several properties are financed, can also be utilised as Eligible Assets. In these cases, portions of the overall loan which are allocated to the individual Green Properties can be classified as eligible. In case of portfolio transactions loan portions are allocated to individual properties of the portfolio weighted according to market values.

To qualify as a Green Property, properties must meet at least one of the following three eligibility criteria both at the time of the financing commitment and over the entire financing period:

1. Properties meet the EU Taxonomy criteria set out in Chapter 7.7 (Acquisition and ownership of existing buildings) of the EU Commission Delegated Regulation (EU) 2021/2139.

2. Existence of a reputable (i.e. World Green Building Council) green building certificate with an above-average rating, as described in the Green Finance Framework ("**Green Property**").

3. The property meets the national requirements for a nearly zero-energy building (as defined in the EU Energy Performance of Buildings Directive (Directive 2010/31/EU)) valid at the time the financing commitment is made and/or the property falls below the following maximum energy reference values (reference values for total final energy consumption (heating and electricity) for each type of commercial property, which are derived from national requirements/green building requirements and the Issuer's internal evaluation practice):

Building Type	**Final Energy Consumption***
Residential	< 75 KWh/(m^2 x a)
Office	< 140 KWh/(m^2 x a)
Retail	< 140 KWh/(m^2 x a)
Hotel	< 140 KWh/(m^2 x a)
Logistics	< 65 KWh/(m^2 x a)

* Final energy consumption is considered after offsetting measures such as on-site generation of electricity through renewable sources i.e., photovoltaic systems or district heating networks. Until global data availability has improved, final/primary energy demand/consumption can be used as a proxy. Generally, for purposes of receiving proof of final energy consumption, a third party will be engaged (i.e. energy performance certificates or utilities providers).

B. Energy Efficiency Upgrades

The Issuer defines an "**Energy Efficiency Upgrade**" as the financing of a modernisation/renovation measure (including refurbishments or acquisition development and construction financing) after which the financed property meets one of the following three criteria (after completion) and hence the loan that is partially used to finance the relevant modernisation/renovation also qualifies as an Eligible Asset:

1. **Classification as EU Taxonomy compliant:** Energy-efficient modernisation/renovation measures meet the EU Taxonomy criteria according to Chapter 7.2 (Renovation of existing buildings) of the EU Commission Delegated Regulation (EU) 2021/2139.

2. **Green Property**: Completion of the modernisation/renovation measure levels the property to meet the Green Property standard defined above.

3. **Energy efficiency of the property**: Completion of the modernisation/renovation measure results in an energy efficiency improvement of at least 30 per cent. (based on Regulation (EU) 2020/852, whereby final energy consumption is considered after offsetting measures such as on-site generation of electricity through renewable sources i.e., photovoltaic systems or district heating networks) or – preferably – reduces final energy consumption of a building below the maximum thresholds defined above.

Process for Project Evaluation and Selections

All Eligible Assets are subject to the Issuer's standard lending process and have to pass the Issuer's credit procedure while they are in addition subject to specific ESG requirements. For this assessment, the Issuer has established a multi-step process to identify Eligible Assets subject to one of the Eligible Asset Categories which ultimately shall be included in the Issuer's eligible asset pool ("**Eligible Asset Pool**").

The Issuer's loan managers identify potentially suitable green loans as part of a pre-examination according to the defined criteria, as defined above. The Issuer's valuation department applies the eligibility criteria when assessing the value of properties to be financed.

The Green Finance Committee ("**GFC**") is supported by the Issuer's ESG expert group, which provides guidance on the sustainability criteria for financing transactions and reviews the Green Finance Framework on a regular basis (the "**ESG Expert Group**"). The GFC may consist of credit, valuation, portfolio management, treasury, legal, compliance, risk and sustainability experts. The objective is to ensure that the Green Finance Framework remains up-to-date, appropriate, market-relevant, actionable and of a suitable standard. The GFC may request a review of the Green Finance Framework and the underlying sustainability criteria conducted by the ESG Expert Group, when the GFC deems this necessary.

Management of Proceeds

The Issuer manages the proceeds of any Green Financing Instrument on a portfolio basis. This means that the amount equivalent to the net proceeds of any Green Bond will be used to finance or refinance the Issuer's assets included in the Eligible Asset Pool. The net proceeds of such Green Bonds will be placed in the general funding accounts and earmarked in the IT systems for allocation only and without legal segregation. The Issuer will strive to reach full allocation of proceeds to Eligible Assets within 24 months from the date of issuance.

For managing the Eligible Assets, the Issuer has established internal functions in the IT systems, where Eligible Assets can be marked and monitored respectively.

The assets, which have been selected and marked (activated) as Eligible Assets in the IT systems by the GFC, will be reviewed at least quarterly and maturing exposures and assets sold will be excluded immediately from the Eligible Asset Pool.

The Issuer will strive, at any point in time, to maintain an Eligible Asset Pool that is larger than the total net proceeds of all outstanding Green Bonds.

Since the Eligible Asset Pool is routinely monitored by the GFC any potential shortfall in the Eligible Asset Pool (e.g., the Eligible Asset Pool not providing for sufficient Eligible Assets (in terms of, and hereby taking into consideration, the total nominal amount of the Eligible Assets) to be financed via the net proceeds of any Green Bonds) should be detected in a reasonably short time frame. The GFC is tasked to develop a monitoring and escalation process to facilitate such detection. In case Eligible Assets in sufficient quantity should not be available, the Issuer will direct, at its own discretion, the corresponding shortfall amount towards a liquidity portfolio, consisting of cash and/or cash equivalents, and/or other liquid marketable instruments until Eligible Assets to invest in are again available.

The GFC will aim to remedy any shortfall by taking appropriate measures, including suspending issuance of green bonds, encouraging suspension of disposals of, or sourcing of additional Eligible Assets.

Reporting

The Issuer will publish a report ("**Green Financing Report**") for as long as there is any Green Bond outstanding. The Green Financing Report will be made available on the Issuer's investor relation website (https://www.aareal-bank.com/en/responsibility/implementing-solutions/refinancing-business) at least on an annual basis and consist of two parts: (i) the 'allocation reporting' and (ii) the 'impact reporting' (whereby the publication of the latter report is subject to availability of sources and relevant data).

External Review

The Issuer has obtained the Second Party Opinion from Sustainalytics GmbH to confirm the alignment of the Green Finance Framework with the four core components of the ICMA Green Bond Principles (June 2021). The Second Party Opinion will be made available on the Issuer's investor relation website (https://www.aareal-bank.com/en/responsibility/implementing-solutions/refinancing-business). The Issuer may appoint Sustainalytics GmbH, or any other equally credible second party opinion provider, to certify and produce, on an annual basis, a verification report on the allocation of the proceeds.

IMPORTANT NOTICE

Neither the Green Finance Framework nor the Second Party Opinion is incorporated into or form part of this Prospectus. None of the Arranger, the Dealers, any of their respective affiliates or any other person mentioned in this Prospectus makes any representation as to the suitability of such Notes to fulfil environmental, social and/or sustainability criteria required by any prospective investors. The Arranger and the Dealers have not undertaken, nor are responsible for, any assessment of the Green Finance Framework or the Green Projects, any verification of whether any Green Projects meets the criteria set out in the Green Finance Framework or the monitoring of the use of proceeds. Please refer to the section "Risk Factors" above for further information regarding risks associated with Green Bonds.

PFANDBRIEFE AND THE MORTGAGE BANKING SECTOR

The following is a description reduced to some of the more fundamental principles governing the laws regarding Pfandbriefe and Pfandbrief Banks in overview form and without addressing all the laws' complexities and details. Accordingly, it is qualified in its entirety by reference to the applicable laws.

Introduction

The Pfandbrief operations of Aareal Bank are subject to the German Pfandbrief Act (*Pfandbriefgesetz*) ("**Pfandbrief Act**").

Since 19 July 2005, German credit institutions such as the Issuer are permitted, subject to authorisation and further requirements of the Pfandbrief Act, to engage in the Pfandbrief business and to issue Pfandbriefe.

German credit institutions wishing to take up the Pfandbrief business must obtain a special authorisation under the Banking Act from the German Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht* – the "**BaFin**") and, for that purpose, must meet some additional requirements as specified in the Pfandbrief Act. The Issuer holds such authorisation.

The operations of all banks engaged in the issuance of Pfandbriefe are regulated by the Pfandbrief Act and the Banking Act and the Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No 646/2012, as amended (the "**CRR**"), and are subject to the supervision of the BaFin. In particular, the BaFin carries out regular audits of the assets forming part of any Cover Pool (as defined below).

In this overview, banks authorised to issue Pfandbriefe will generally be referred to as "**Pfandbrief Banks**".

Rules applicable to all Types of Pfandbriefe

Pfandbriefe are standardised debt instruments issued by a Pfandbrief Bank. The structure of Pfandbriefe is strictly governed by provisions of the Pfandbrief Act and subject to the supervision of the BaFin. Pfandbriefe generally are medium- to long-term bonds, typically with an original maturity of two to ten years, which are secured or "covered" at all times by a pool of qualifying Cover Assets as described below. Pfandbriefe are obligations of the issuing bank. Hence, no separate vehicle is created for their issuance or for the issuance of any specific series of Pfandbriefe. Due to statutory provisions the terms and conditions of Pfandbriefe may not provide the option for an early redemption at the option of the holders.

Pfandbriefe may either be Mortgage Pfandbriefe (*Hypothekenpfandbriefe*), Public Sector Pfandbriefe (*Öffentliche Pfandbriefe*) or Ship Mortgage Pfandbriefe (*Schiffspfandbriefe*) as well as Aircraft Pfandbriefe (*Flugzeugpfandbriefe*). The outstanding Pfandbriefe of any one of these types must be covered by a separate pool of qualifying Cover Assets: a separate pool for each of Mortgage Pfandbriefe, Public Sector Pfandbriefe, Ship Mortgage Pfandbriefe and Aircraft Pfandbriefe ("**Cover Pool**"). An independent trustee (*Treuhänder*) appointed by the BaFin monitors that in each case the prescribed cover exists and whether the assets used as cover are correctly entered in the cover register.

The coverage (*Deckung*) of all outstanding Pfandbriefe must be ensured at all times according to the net present value (*Barwert*), which shall include interest and principal obligations. Moreover, the present value of the cover assets (*Deckungswerte*) contained in the Cover Pool must exceed the net present value of all outstanding Pfandbriefe of this type by currently at least two per cent. (*barwertige sichernde Überdeckung*).

Such present value excess cover must consist of:

(i) debt securities, debt register claims, treasury bills and treasury certificates of the German government, a special fund of the German government, a German federal state, the European Communities, another member state of the European Union, another member state of the European Economic Area (the "**EEA States**"), the European Investment Bank, the IBRD-World Bank, the Council of Europe Development Bank, or the European Bank for Reconstruction and Development, Switzerland, the United States, the UK, Canada, Japan to the extent that their risk weight has been assigned to the credit rating 1 according to table 1 of Article 114 paragraph 2 CRR by a recognized international rating agency;

(ii) debt securities the interest and redemption of which is guaranteed by any of the foregoing entities; and

(iii) credit balances, if the amount of the claims of the Pfandbrief Bank is already known at the time of acquisition, the fulfilment is not conditional, limited in time, subordinated to other claims by legal

transaction or otherwise restricted and which are maintained with the European Central Bank, the central banks of member states of the European Union or another member state to the Agreement on the European Economic Area;

(iv) credit balances, the fulfilment of which is not conditional, limited in time, subordinated to other claims by legal transaction or otherwise restricted, and only provided that the Pfandbrief Bank knows the amount of the claim at the time of the purchase, and the credit balances are maintained with appropriate credit institutions having their seat in a state named in sub-clause (i) above where the equivalence of the respective state's supervisory framework within the meaning of Article 107(4) of Regulation (EU) No 575/2013 has been determined by the European Commission, if the state is not a member state of the European Union or another member state to the Agreement on the European Economic Area, and where the credit institution has, a risk weight equalling the credit rating 1 or 2 according to table 3 of Article 120 paragraph 1 of the CRR. Credit balances from the same banking group will not be permissible.

The claims maturing under recorded cover assets and maturing liabilities under Pfandbriefe outstanding and derivative transactions included in cover shall be reconciled against each other on a same-day basis for the next 180 days in order to safeguard liquidity. The highest negative amount so calculated must at all times within the next 180 days be covered by the sum of the cover values listed under sub-clauses (i) to (iv) above and the entered recorded cover assets which the European System of Central Banks have classified as being eligible for central bank credit. The registered cover assets permitted to cover liquidity requirements must comply with the requirements of Art. 10, 11 or 12 of Delegated Regulation (EU) 2015/61 and be recognised by the credit institution in accordance with Art. 9 of this Delegated Regulation. Credit balances against eligible credit institutions as described under (iv) the remaining maturity of which does not exceed three months will also be eligible. In addition, it is specified that the aggregate amount of the Nominal Amounts of the cover assets registered for a class must exceed the aggregate amount of the Nominal Amounts of the outstanding Pfandbriefe of this class by the following percentages: (i) in the case of Mortgage Pfandbriefe and Public Sector Pfandbriefe, by at least 2 per cent; and in the case of (ii) Ship Mortgage Pfandbriefe and Aircraft Pfandbriefe, by at least 5 per cent (*nennwertige sichernde Überdeckung*).

The Pfandbrief Bank must record in the register of cover assets for any Cover Pool of a given Pfandbrief type each asset and the claims or liabilities arising from Cover Pool eligible derivatives (*Deckungsgeeignete Derivategeschäfte*). Cover Pool eligible derivatives may be entered in such register only with the consent of the trustee and the counterparty.

The Pfandbrief Bank must maintain a suitable risk management system meeting the requirements specified in detail in the Pfandbrief Act and must comply with comprehensive disclosure requirements on a quarterly and annual basis set out in detail in the Pfandbrief Act.

As Aareal Bank may issue Pfandbriefe as Mortgage Pfandbriefe (Hypothekenpfandbriefe) or Public Sector Pfandbriefe (öffentliche Pfandbriefe) (see "General Description of the Programme", inter alia, Set of Terms and Conditions for Option V, Option VI and Option VII), the following paragraphs set out some of the more fundamental principles in overview form governing the laws regarding these two types of Pfandbriefe only.

Cover Pool for Mortgage Pfandbriefe

The principal assets qualifying for the Cover Pool for Mortgage Pfandbriefe are loans secured by mortgages or land charges respectively which may serve as cover up to the initial 60 per cent. of the value of the property (mortgage lending value / *Beleihungswert*), as assessed by experts of the Pfandbrief Bank not taking part in the credit decision in accordance with comprehensive evaluation rules designed to determine the market value of the property. Moreover, the mortgaged property must be adequately insured against risks relevant to the type and location of the property.

The property that may be encumbered by the mortgages must be situated in a member state of the European Union or any state of the European Economic Area, Switzerland, the United Kingdom, the United States, Canada, Japan, Australia, New Zealand or Singapore.

The total volume of claims against debtors in non-European Union states for which it is not ensured that the preferential right of the Public Sector Pfandbrief creditors pursuant to § 30(1) Pfandbrief Act extends to the claims may not exceed 10 per cent. of the total volume of claims for which the preferential right is ensured or for which there is an obligation pursuant § 30(2a) sentence 3 Pfandbrief Act.

In addition, the cover prescribed in § 12(1) Pfandbrief Act for Mortgage Pfandbriefe may comprise a limited portion of other assets as follows:

(ii) up to a total of 10 per cent. of the total amount of Mortgage Pfandbriefe in circulation

(a) by money claims, provided that the Pfandbrief Bank knows the amount of the claim at the time of purchase, the fulfilment of which is not conditional, limited in time, subordinated to other claims by way of a legal transaction or restricted in any other way, against credit institutions which meet the conditions of § 4(1)(3) no. 3 Pfandbrief Act and to which a risk weighting corresponding to credit rating 2 has been assigned;

(b) by respective credit balances from an account relationship with the credit institutions specified in (a) above;

(c) by claims to the amount to be paid uniformly to the Pfandbrief Bank in the event of early termination of the framework agreement in respect of a derivative transaction concluded with a credit institution which meets the conditions of § 4(1)(3) no. 3 Pfandbrief Act and to which a risk weighting corresponding to credit rating 2 has been assigned;

(iii) subject to certain qualifications, up to a total sum of 15 per cent. of the aggregate amount of outstanding Mortgage Pfandbriefe, claims,

(a) by cover assets of the type specified in § 4(1)(3) no. 1 and 2 Pfandbrief Act;

(b) provided that the Pfandbrief Bank knows the amount of the claim at the time of purchase, the fulfilment of which is not conditional, limited in time, subordinated to other claims by way of a legal transaction or restricted in any other way, money claims against the European Central Bank, the central banks of member states of the European Union or another member state to the Agreement on the European Economic Area, or against credit institutions which meet the conditions of § 4(1)(3) no. 3 Pfandbrief Act and to which a risk weighting corresponding to credit rating 1 has been assigned;

(c) by respective credit balances from an account relationship with the credit institutions specified in (a) above;

(d) by claims to the amount to be paid uniformly to the Pfandbrief Bank in the event of early termination of the framework agreement in respect of a derivative transaction concluded with the Federal Republic of Germany, a German state or a credit institution which meets the conditions of § 4(1)(3) no. 3 Pfandbrief Act and to which a risk weighting corresponding to credit rating 1 has been assigned;

(iv) up to a total of 20 per cent. of the total amount of Mortgage Pfandbriefe outstanding by means of cover assets of the type specified in § 20(1) Pfandbrief Act, provided that such cover assets are bonds.

Mortgage Pfandbriefe, as well as Public Sector Pfandbriefe, are subject to a minimum level of 2 per cent. of overcollateralization as defined in point (14) of Article 3 of Directive (EU) 2019/2162.

The limitations which apply to Mortgage Pfandbriefe as described under "Cover Pool for Public Sector Pfandbriefe" apply here as well.

Insolvency Proceedings

In the event of the institution of insolvency proceedings over the assets of the Pfandbrief Bank, any Cover Pool maintained by it would not be part of the insolvency estate (Separation Principle), and, therefore, such insolvency would not automatically result in an insolvency of any Cover Pool. Only if at the same time or thereafter the relevant Cover Pool were to become insolvent, separate insolvency proceedings would be initiated against such Cover Pool by the BaFin. In this case, holders of Pfandbriefe would have a preferred claim against the respective Cover Pool. Their preferential right would also extend to interest on the Pfandbriefe accrued after the commencement of insolvency proceedings. Furthermore, but only to the extent that holders of Pfandbriefe suffer a loss, holders would also have recourse to any assets of the Pfandbrief Bank not included in the Cover Pools. As regards those assets, holders of the Pfandbriefe would rank equal with other unsecured and unsubordinated creditors of the Pfandbrief Bank.

For each Cover Pool a Cover Pool Administrator will be appointed in the case of the insolvency of the Pfandbrief Bank to administer the Cover Pool. The Cover Pool Administrator will be appointed by the court having jurisdiction at the location of the head office of the Pfandbrief Bank upon recommendation of the BaFin. The Cover Pool Administrator will be subject to the supervision of the court and also of the BaFin with respect to the duties of the Pfandbrief Bank arising in connection with the administration of the assets included in the relevant Cover Pool. The purpose of separating the Cover Pool assets from the insolvency estate is the timely fulfilment of the Pfandbrief liabilities and the proper administration of the cover pool assets. The Cover Pool Administrator is entitled to undertake all legal transactions having effect on the relevant Pfandbrief Bank with limited business activities which are necessary for a correct administration of the Cover Pool assets in the interests of the fullest and timely fulfilment of the relevant Pfandbrief liabilities; the administrator may in particular procure liquid funds to ensure the complete settlement of outstanding Pfandbriefe. The insolvency administrator is entitled to demand the transfer of cover pool assets to the insolvency estate if and to the extent that those assets are obviously not necessary to satisfy Pfandbrief claims.

The German Pfandbrief Act provides for the protection of rights of holders of Pfandbriefe by provisions which clarify that measures that may be implemented on the basis of the SAG that increase the powers of the competent resolution authority in case of financial difficulties of a credit institution do not apply to the Pfandbrief business of the respective credit institution, but only to the remaining part of the business of the respective credit institution.

Any transfer in relation to cover pool assets shall be made in accordance with the Pfandbrief Act. A transfer of cover pool assets may also comprise the direct transfer of assets registered in the cover registers and the corresponding Pfandbrief obligations.

Further, in the case of a liquidity shortfall, as of 1 July 2021 the possibility exists that the maturity of outstanding Pfandbriefe, including of Pfandbriefe issued prior to 1 July 2021, is deferred up to 12 months pursuant to §§ 30(2a) *et seq.* Pfandbrief Act. Such maturity deferral can only be effected by the Cover Pool Administrator. The appointment of the Cover Pool Administrator must be made in accordance with § 31(1) and (11) Pfandbrief Act and is possible only in certain cases; in particular, the Cover Pool Administrator may be appointed prior to the opening of insolvency proceedings, for example, if the requirements of § 46 KWG are met or in connection with reorganisation proceedings.

Each Dealer has acknowledged, and each further Dealer appointed under the Programme will be required to acknowledge, that, other than with respect to the admission of the Instruments to listing, trading and/or quotation by the relevant listing authorities, stock exchanges and/or quotation systems, no action has been or will be taken in any jurisdiction by the Issuer that would permit a offering of the Instruments, or possession or distribution of any offering material in relation thereto, in any country or jurisdiction where action for that purpose is required.

With regard to each Tranche, the relevant Dealer will be required to comply with such other additional restrictions as the Issuer and the relevant Dealer shall agree and as shall be set out in the applicable Final Terms or in a supplement to the Prospectus.

Unless the relevant Final Terms in respect of any Instruments specify "Prohibition of Sales to European Economic Area Retail Investors" as "Not Applicable", each Dealer in relation to any issue of Instruments will be required to represent, warrant and agree, and each further Dealer appointed under the Programme will be required to represent, warrant and agree, that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Instruments which are the subject of the offering contemplated by the Prospectus as completed by the Final Terms in relation thereto to any retail investor in the EEA. If the relevant Final Terms in respect of any Instruments specify "Prohibition of Sales to European Economic Area Retail Investors" as "Not Applicable", in relation to each Member State of the EEA (each, a "**Relevant Member State**"), each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not made and will not make an offer of Instruments which are the subject of the offering contemplated by this Prospectus as completed by the final terms in relation thereto to the public in that Relevant Member State except that it may make an offer of such Instruments to the public in that Relevant Member State:

provided that no such offer of Instruments referred to in paragraphs (b) to (d) above shall require the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation.

For the purposes of this provision, the expression an "**offer of Notes to the public**" in relation to any Instruments in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the Instruments to be offered so as to enable an investor to decide to purchase or subscribe the Instruments.

(a) With regard to each Tranche, each Dealer has acknowledged, and each further Dealer appointed under the Programme will be required to acknowledge, that the Instruments have not been and will not be registered under the United States Securities Act of 1933, as amended (the "**Securities Act**") and may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. With regard to each Tranche, each Dealer has represented, warranted and undertaken, and each further Dealer appointed under the Programme will be required to represent, warrant and undertake, that it has not offered or sold, and will not offer or sell, any Instrument constituting part of its allotment within the United States except in accordance with Rule 903 of Regulation S under the Securities Act. In addition, until 40 days after the commencement of the offering, an offer or sale of Instruments within the United States by a dealer that is not participating in the offering may violate the registration requirements of the Securities Act.

(b) From and after the time that the Issuer notifies the Dealers in writing that it is no longer able to make the representation set forth in Article 4(1)(n) of the Dealer Agreement, each Dealer (i) has acknowledged, and each further Dealer appointed under the Programme will be required to acknowledge, that the Instruments have not been and will not be registered under the Securities Act and may not be offered or sold within the United States or to, or for the account or benefit of, U. S. persons except in certain transactions exempt from the registration requirements of the Securities Act; (ii) has represented, warranted and undertaken, and each further Dealer appointed under the Programme will be required to represent, warrant and undertake, that it has not offered, sold or delivered any Instruments, and will not offer, sell or deliver any Instruments, (x) as part of its distribution at any time or (y) otherwise until 40 days after the later of the commencement of the offering and closing date, except in accordance with Rule 903 of Regulation S under the Securities Act; and accordingly, (iii) has further represented, warranted and undertaken and each further Dealer appointed under the Programme will be required to represent, warrant and undertake, that neither it, its affiliates nor any persons acting on its or their behalf have engaged or will engage in any directed selling efforts with respect to any Instrument, and it and they have complied and will comply with the offering restrictions requirements of Regulation S; and (iv) has also agreed, and each further Dealer appointed under the Programme will be required to agree, that, at or prior to confirmation of any sale of Instruments, it will have sent to each distributor, dealer or person receiving a selling concession, fee or other remuneration that purchases Instruments from it during the distribution compliance period a confirmation or notice to substantially the following effect:

S. persons by any person referred to in Rule 903(b)(2)(iii) of Regulation S under the Securities Act (i) as part of their distribution at any time or (ii) otherwise until 40 days after the completion of the distribution of the Tranche of Instruments of which such Instruments are a part, except in either case in accordance with Regulation S under the Securities Act. Terms used above have the meanings given to them by Regulation S under the Securities Act."

(c) With regard to each Tranche, each Dealer has represented, warranted and undertaken, and each further Dealer appointed under the Programme will be required to represent, warrant and undertake, that it has not entered and will not enter into any contractual arrangement with respect to the distribution or delivery of Instruments, except with its affiliates or with the prior written consent of the Issuer.

(d) Instruments, other than Instruments with an initial maturity of one year or less or that are cleared through Clearstream Banking AG ("**CBF**") pursuant to the Book-Entry Registration Agreement dated 28 May 2014, entered into between the Issuer and CBF in respect of the Programme, will be issued in accordance with the provisions of U.S.Treas. In addition, where the C Rules are specified in the relevant Final Terms as being applicable to any Tranche of Instruments, Instruments must be issued and delivered outside the United States and its possessions in connection with their original issuance. Each Dealer has represented, warranted and undertaken that, in connection with the original issuance of Instruments, it has not offered, sold or delivered and will not offer, sell or deliver, directly or indirectly, Instruments within the United States or its possessions. Further, each Dealer has represented, warranted and undertaken in connection with the original issuance of Instruments, that it has not communicated, and will not communicate, directly or indirectly, with a prospective investor if either such Dealer or such purchaser is within the United States or its possessions and will not otherwise involve its U.S. office in the offer and/ or sale of Instruments. Terms used in this paragraph have the meanings given to them by the U.S. Internal Revenue Code and regulations thereunder, including the C Rules.

In addition, in respect of Instruments issued in accordance with the D Rules, each Dealer has represented, warranted and undertaken, and each further Dealer appointed under the Programme will be required to represent, warrant and undertake that:

(iii) if such Dealer is a United States person, it represents that it is acquiring the Instruments for purposes of resale, in connection with their original issuance and if such Dealer retains Instruments for its own account, it will only do so in accordance with the requirements of U.S.Treas. Reg. § 1.163–5(c)(2)(i)(D)(6) (or substantially identical successor provisions); and

(iv) with respect to each affiliate that acquires from such Dealer Instruments for the purposes of offering or selling such Instruments during the restricted period, such Dealer either (x) repeats and confirms the representations and agreements contained in sub-clauses (i), (ii) and (iii) above on such affiliate's behalf or (y) agrees that it will obtain from such affiliate for the benefit of the purchaser of the Instruments and the Issuer the representations and agreements contained in sub-clauses (i), (ii) and (iii) above.

Terms used in this paragraph (d) have the meanings given to them by the U.S. Internal Revenue Code and regulations thereunder, including the D Rules.

(e) Each issue of index-, commodity- or currency-linked Instruments shall be subject to such additional U.S. selling restrictions as the Issuer and the relevant Dealer may agree as a term of the issue and purchase of such Instruments, which additional selling restrictions shall be set out in the Final Terms. Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it shall offer, sell and deliver such Instruments only in compliance with such additional U.S. selling restrictions.

(f) Any United States person who holds an obligation that has been sold pursuant to the C Rules or D Rules will be subject to limitation under the United States income tax laws, including the limitations provided in Section 165(j) and 1287(a) of the U.S. Internal Revenue Code.

The yield of fixed rate instruments (including Senior Fixed Rate Notes which are no Step-up / Step-down Notes and no Zero Coupon Notes, Subordinated Notes which are no Subordinated Step-up / Step-down Notes and no Subordinated Callable Fixed Rate Reset Notes, Fixed Rate Pfandbriefe which are no Step-up / Step-down Pfandbriefe and no Zero Coupon Pfandbriefe, Step-up / Step-down Senior Fixed Rate Notes, Subordinated Step-up / Step-down Notes, Step-up / Step-down Pfandbriefe, Senior Zero Coupon Notes and Zero Coupon Pfandbriefe) is calculated on the basis of the issue price at the issue date. It is not an indication on future yield.

Rating Agency

Credit ratings have been assigned to Aareal Bank by the rating agencies Fitch Ratings Ireland Limited and Moody's Deutschland GmbH and are expected to be assigned to the Instruments issued under the Programme by the rating agencies Fitch Deutschland GmbH and / or Moody's Deutschland GmbH. Fitch Ratings Ireland Limited and Moody's Deutschland GmbH are (pursuant to the list of registered and certified credit rating agencies published on the website of the European Securities and Markets Authority ("**ESMA**") (*https://www.esma.europa.eu/credit-rating-agencies/cra-authorisation*)) established in the European Union and are registered pursuant to Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies, amended by Regulation (EC) No 513/2011 of the European Parliament and of the Council of 11 March 2011 and by Regulation (EC) No. 462/2013 of the European Parliament and of the Council of 21 May 2013, as amended (the "**CRA Regulation**"). That list published by ESMA is updated within five working days following the adoption of a decision under Article 16, 17 or 20 CRA Regulation. The European Commission shall publish that updated list in the Official Journal of the European Union within 30 days following such update.

Listing and Admission to Trading

Application has been made in order for the Instruments to be issued under the Programme to be listed on the Official List of the Luxembourg Stock Exchange and to be admitted to trading on the regulated market of the Luxembourg Stock Exchange appearing on the list of regulated markets issued by the European Commission (Regulated Market "*Bourse de Luxembourg*"). However, Instruments may also be listed on the Frankfurt Stock Exchange or the Düsseldorf Stock Exchange or on any other stock exchange, or will not be listed at all as the Issuer and the relevant Dealer(s) may agree.

Clearing Systems

The Instruments have been accepted for clearance through Clearstream Banking AG, Frankfurt am Main ("**CBF**"), Clearstream Banking S.A., Luxembourg ("**CBL**") and Euroclear Bank SA/NV as operator of the Euroclear system ("**Euroclear**"). The appropriate German securities identification number (WKN) (if any), Common Code (if any), FISN (if any), CFI (if any) and ISIN for each Tranche of Instruments allocated by CBF, CBL and Euroclear will be specified in the applicable Final Terms.

Interest of Natural and Legal Persons involved in the Issue/Offer

Certain of the Dealers and their affiliates may be customers of, borrowers from or creditors of the Issuer and its affiliates. In addition, certain Dealers and their affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services for the Issuer and its affiliates in the ordinary course of business.

Furthermore, in the ordinary course of their business activities, the Dealers and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer or Issuer's affiliates. Certain of the Dealers or their affiliates that have a lending relationship with the Issuer routinely hedge their credit exposure to the Issuer consistent with their customary risk management policies. Typically, such Dealers and their affiliates would hedge such exposure by entering into transactions, which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Notes issued under the Programme. Any such short positions could adversely affect future trading prices of Notes issued under the Programme. The Dealers and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

Authorisation

The initial establishment of the Programme and the issue of Instruments thereunder have been duly authorised by a resolution of the Management Board of Aareal Bank dated 24 June 2002. The update of the Programme for 2024 has been duly authorised by a resolution of the Management Board of Aareal Bank dated 29 May 2024.
